Victoria Butenko & Sergei L. Loiko, Bomb Blast at Pro-Ukraine Rally in Kharkiv Kills 2, Los Angeles Times (22 February 2015)
Bomb blast at pro-Ukraine rally in Kharkiv kills 2; Kiev blames Russia

A man holds a Ukrainian flag as he prepares to help cover the body of a victim of an explosion in Kharkiv, Ukraine, on Sunday. (Andriy Marienko / Associated Press)

A homemade bomb apparently hidden in a thin layer of snow exploded Sunday during a pro-Ukraine march in the eastern industrial city of Kharkiv, killing at least two people and wounding 11, authorities said.

Four suspected perpetrators of the attack were detained later in the day, Alexander Turchinov, secretary of the National Defense and Security Council told the UNIAN news agency. He said the detainees had been trained in the Russian town of Belgorod.

The bomb exploded shortly after 1 p.m. along the route where hundreds of people marched, many waving Ukrainian national flags, as part of a nationwide memorial to protesters who died a year ago during the so-called Maidan revolution in Kiev that ousted Russian-backed President Viktor Yanukovich, said Anton Gerashchenko, an Interior Ministry advisor.
Kharkiv is the capital of the Kharkiv region, which borders Russia as well as the Donetsk region of Ukraine, which for over 10 months has been the heart of an armed conflict between the Ukrainian government and pro-Russia separatists reportedly armed and aided by Russia.

One of the two declared dead at the scene of the bombing was a prominent local activist and the other a high-ranking police officer, Gerashchenko said. Five police officers were among the wounded, he said.

Dramatic video taken by a passerby and broadcast by TSN, a private television network, shows a column of people with flags and posters marching along the street, chanting and singing. An explosion shatters the scene, and people can be seen screaming, running and then trying to help the wounded.

"We have enough evidence to believe that this terrorist attack was organized and carried out by a group of terrorists armed and sponsored by Moscow," Gerashchenko said in an interview. "This cynical attack against peaceful marchers on the national mourning day clearly shows that regardless of the Minsk accords the Kremlin is set to continue to destabilize the situation in eastern Ukraine."

A cease-fire agreement was reached this month after talks in Minsk, Belarus, among the leaders of Germany, France, Russia and Ukraine. The accord called for a halt in hostilities and a withdrawal of heavy armaments and foreign fighters from the battle zone.

It has been repeatedly violated, and was again Sunday when separatists launched two tank attacks on the Ukrainian military near the seaport of Mariupol in eastern Ukraine, Andriy Lysenko, spokesman for the National Defense and Security Council, said at a briefing in Kiev. Both attacks were repelled, he said. No casualty figures were given.

More than 5,600 people have been killed in eastern Ukraine since the conflict broke out in April. More than 1 million people have fled the war zones for safe refuge in western Ukraine or across the eastern border with Russia.

“The explosion which these subhumans organized during a peaceful march in Kharkiv is yet another attempt to expand the territory of terrorism,” Ukrainian President Petro Poroshenko said in televised remarks.

*Special correspondent Butenko reported from Kiev and Times staff writer Loiko from Moscow.*

2. FIRING INSTRUCTIONS

12. The following designations are used in the cells of the Firing Tables:

- $D$ – topographic distance to the target in meters, in 200-meter increments
- $P$ – aim in mils;
- $X_{mil}$ – change in distance per one-mil change in aim, in meters;
- $B$ – narrow bracket (4 $Bd$) in mils;
- $Bd, Bb$ – average deflection (distance and lateral) in meters;
- $Y_a$ – height of powered trajectory in meters.

Corrections to elevation in mils:

- $\Delta Z_{Waz}$ – for 10 m/s crosswind during powered phase;
- $\Delta Z_{Wax}$ – for 10 m/s no value wind during powered phase;
- $\Delta Z_{Wnz}$ – for 10 m/s crosswind during passive phase.

Corrections to aim in mils:

- $\Delta P_{Wax}$ – for 10 m/s no value wind during powered phase;
- $\Delta P_{Waz}$ – for 10 m/s crosswind during powered phase.

Corrections to range in meters:

- $\Delta X_{Wnx}$ – for 10 m/s no value wind during passive phase;
- $\Delta X_{TB}$ – for 10-degree deviation in ballistic air temperature;
- $\Delta X_N$ – for 10 mm Hg deviation in surface air pressure.
$\Delta X_{73}$ – for 10° C deviation in missile temperature;
\[\alpha\] – inclination angle in degrees;
\[\theta_s\] – angle of impact in degrees;
\[V_s\] – final velocity in m/s;
\[t_s\] – total flight time in seconds;
\[Y_{bull}\] – height of entry into Meteo bulletin in meters;
\[Y_s\] – height of trajectory in meters.

Yandex and Sberbank of Russia Finalise Yandex.Money Joint Venture

July 4, 2013

MOSCOW and THE HAGUE, Netherlands, July 4, 2013 (GLOBE NEWSWIRE) -- Yandex (Nasdaq:YNDX) and Sberbank of Russia OJSC today announced the completion of the previously announced joint venture for electronic money solutions. Under the terms of the deal, Sberbank has acquired 75% interest (minus one ruble) in the charter capital of Yandex.Money for approximately $60M. The key objective of this strategic partnership is to drive innovation in online retail payment solutions.

The Yandex-Sberbank joint venture aims to create a general-purpose payment solution for small and medium-sized businesses, as well as to make recurring payments and transactions simpler for both online and offline customers. As the first step towards streamlining online payments, beginning in June 2013, Sberbank has waived its commission for Yandex.Money top-ups from any bank card at its ATMs and payment terminals.

The Yandex.Money team will leverage Sberbank’s infrastructure to develop new online payment solutions based on Yandex’s technologies. Customers of Yandex.Money will continue to be served by Yandex.Money, a non-banking credit organization operating under a license issued by the Central Bank of Russia.

Evgenia Zavalishina, CEO of Yandex.Money since 2006, will head the new joint venture. The JV's board of directors will include two representatives of Yandex — Evgenia Zavalishina and Yandex's CEO Arkady Volozh, joined by three members representing Sberbank of Russia - Alexander Torbakhov, Denis Bugrov and Svyatoslav Ostovsky.

Yandex will retain a substantial interest in the JV (25% plus one ruble). Yandex will stop consolidating the financial results of Yandex.Money beginning with the third quarter of 2013.

About Yandex

Yandex (Nasdaq:YNDX) is one of Europe's largest internet companies, providing the world with search and online services one market at a time. Yandex's mission is to help users solve their everyday problems by building people-centric products and services. Based on innovative technologies, the company offers the most relevant, locally tailored experience on all digital platforms and devices. Yandex is the leading internet search service in Russia with 61.6% of the country's search market (according to LiveInternet, June 2013) and a monthly audience of 54.3 million (according to comScore, May 2013). Yandex also operates in Turkey, Ukraine, Belarus and Kazakhstan. More information about Yandex can be found at http://company.yandex.com.
About Sberbank

Sberbank of Russia is the largest bank in Russia and holds almost one third of aggregate Russian banking sector assets. The Central Bank of the Russian Federation is the founder and principal shareholder of Sberbank owning 50% of the Bank's authorized capital plus one voting share. The rest of the shares are held by international and domestic investors. More than 100 million individual customers bank with Sberbank and about 1 million of businesses. The Bank has the largest distribution network in Russia with more than 18,000 offices as well as subsidiaries in 20 countries including the CIS, Central and Eastern Europe and Turkey.

The Bank holds the general banking license No.1481 issued by the Bank of Russia.

The official website is [www.sberbank.ru](http://www.sberbank.ru).

About Yandex.Money

Yandex.Money is the largest electronic payment system on the Russian internet, offering easy, safe and reliable methods for paying for purchases online. Every day, the system adds more than 9,000 new accounts to its user base of more than 14 million (as of July 2013) and handles over 120,000 payments for products and services. According to TNS, Yandex.Money is Russia's best known payment service, with 84% of the Russian population having heard of it, while 17% make payments with Yandex.Money at least once in six months. Currently, Yandex.Money is accepted in over 20,000 internet stores in Russia, Ukraine, Belarus and Kazakhstan.

Note on Forward-Looking Statements

This press release contains forward-looking statements that involve risks and uncertainties. These include statements regarding the future of the Yandex.Money business and the success of this joint venture. Actual results may differ materially from the results predicted or implied by such statements. The potential risks and uncertainties that could cause actual results to differ from the results predicted or implied by such statements include, among others, competitive pressures, changes in advertising patterns, changes in user preferences, changes in the legal and regulatory environment, and technological developments, as well as those risks and uncertainties included under the captions "Risk Factors" and "Operating and Financial Review and Prospects" in our Annual Report on Form 20-F for the year ended December 31, 2012, which is on file with the Securities and Exchange Commission and is available on our investor relations website at [http://ir.yandex.com/sec.cfm](http://ir.yandex.com/sec.cfm) and on the SEC website at [www.sec.gov](http://www.sec.gov). All information in this release and in the attachments is as of July 4, 2013, and Yandex undertakes no duty to update this information unless required by law.

Archived Website “Panoramio” Showing Geo-Tagged Photographs
Panoramio has been discontinued. We’ve appreciated your contributions over the years and hope you will continue to share amazing photos with the world.

Sincerely,
The Panoramio team

Frequently-asked questions

1. What happened to my Panoramio data?

If your Panoramio profile was linked with your Google account, then all your Panoramio photos are being copied to your Google Album Archive at full resolution (this could take a few weeks). All other data has been permanently deleted.

2. Will my Panoramio photos continue to appear in Google Earth and Google Maps?

If your Panoramio photos were appearing in Google Maps with the name of your Google Account, then they will continue to appear along with their original view counts. If they were only attributed to your Panoramio username they will no longer appear.

Thank you for stopping by.

Panoramio has been discontinued. We’ve appreciated your contributions over the years and hope you will continue to share amazing photos with the world.

Sincerely,
The Panoramio team

JUDGMENT

OF THE CONSTITUTIONAL COURT OF UKRAINE

In the case on the constitutional petition of the Acting President of Ukraine, the Chairman of the Verkhovna Rada of Ukraine, the Ukrainian Parliament Commissioner for Human Rights concerning the compliance with the Constitution of Ukraine (constitutionality) of the Resolution of the Verkhovna Rada of the Autonomous Republic Crimea “On holding of the all-Crimean referendum” (the case on the all-Crimean referendum in the Autonomous Republic of Crimea)

Kyiv
Case No. 1-13/2014
March 14, 2014
No. 2-rp/2014

The Constitutional Court of Ukraine consisting of Judges:

Baulin Yuriy Vasyliovych - the Chairman,
Bryntsev Vasyl Dmytrovyčh,
Vdovichenko Sergey Leonidovych,
Hutai Mykytailo Myroslavovych,
Zaporozhets Mykhailo Petrovyčh,
Lytvynov Oleksandr Mykolaiovych,
Melnyk Mykola Ivanovych,
Sas Sergii Volodymyrovych,
Serhetchuk Oleh Anatoliyovych,
Slidenko Igor Dmytrovyčh,
Stetsiuk Petro Bogdanovych – Rapporteur,
Tupyskiii Oleksandr Mykolaiovych – Rapporteur,
Shapala Natalia Kostiantynivna,
Shevchuk Stanislav Volodymyrovych,
Shyshkin Victor Ivanovych,

considered in the plenary session the case on the constitutional petition of the Acting President of Ukraine, the Chairman of the Verkhovna Rada of Ukraine and the Ukrainian Parliament Commissioner for Human Rights concerning the compliance with the Constitution of Ukraine (constitutinility) of the Resolution of the Verkhovna Rada of the Autonomous Republic Crimea No. 1702-6/14 “On holding of the all-Crimean referendum” dated March 6, 2014 (the newspaper “Krymskaye zvestiya”, March 7, 2014).

The consideration of the case in accordance with Articles 39, 40 and 41 of the Law of Ukraine “On the Constitutional Court of Ukraine” was caused by the constitutional petition of the Acting President of Ukraine, the Chairman of the Verkhovna Rada of Ukraine and the Ukrainian Parliament Commissioner for Human Rights.

The ground for considering the case in accordance with Article 71 of the Law of Ukraine “On the Constitutional Court of Ukraine” is the assertion of the subjects of the right in the constitutional petition of unconstitutionality of the Resolution of the Verkhovna Rada of the Autonomous Republic
Crimea No. 1702-6/14 “On holding of the all-Crimean referendum” dated March 6, 2014.

Having heard the Judge-Rapporteurs Stetsiuk P.B., Tupytskii O.M. and having investigated the materials of the case the Constitutional Court of Ukraine

established:

1. Verkhovna Rada of the Autonomous Republic of Crimea by the Resolution No. 1702-6/14 “On holding of the all-Crimean referendum” dated March 6, 2014 (hereinafter referred to as “the Resolution”) decided:

- To accede to the Russian Federation as a subject of Russian Federation;
- To hold on March 16, 2014, of the all-Crimean Referendum (including the City of Sevastopol), to which to submit the following alternative questions:

  1) Do you support the reunification of the Crimea with Russia as a subject of the Russian Federation?
  2) Do you support the restoration of the Constitution of the Republic of Crimea of 1992 and the status of the Crimea as a part of Ukraine?

- To approve the text of the ballot for the all-Crimean referendum on March 16, 2014, and to establish that the ballots to vote in the referendum printed in Russian, Ukrainian and Crimean Tatar;
- To adopt the Temporary regulation on a republican (local) referendum in the Autonomous Republic of Crimea;
- To establish the Commission of the Autonomous Republic of Crimea on holding of an all-Crimean referendum;
- To address the President and the Federal Council of the State Duma of the Russian Federation to initiate the procedure of accession to the Russian Federation as a subject of Russian Federation.

In the Regulation it is also provided that the option supported by the majority of votes shall be deemed a direct expression of will by the Crimean population, and instructed the Commission of the Autonomous Republic of Crimea on holding of an all-Crimean referendum to organize conducting of the referendum in accordance with the Temporary regulation on a republican (local) referendum in the Autonomous Republic of Crimea, and the Council of Ministers of the Autonomous Republic of Crimea to organize financial, technical and other support of holding of the all-Crimean referendum.

2. The subject of the right to constitutional petition – the Acting President of Ukraine, the Chairman of the Verkhovna Rada of Ukraine – under Article 112, paragraph 2 of Article 137 of the Constitution of Ukraine by the Decree of the President of Ukraine No. 261 “On suspending the Resolution of the Verkhovna Rada of the Autonomous Republic of Crimea No. 1702-6/14 ‘On holding of the all-Crimean referendum’ dated March 6, 2014,” dated March 7, 2014, has suspended the Resolution and at the same time submitted to the Constitutional Court of Ukraine the request to consider its conformity with the Constitution of Ukraine (its constitutionality). According to the author of the petition, the Verkhovna Rada of the Autonomous Republic of Crimea by adopting the Resolution violated the constitutional principles of state sovereignty of Ukraine, basics of the constitutional order, territorial organization and exercise of state power in Ukraine. As the subject of the right to constitutional petition alleges the Resolution does not
match Articles 2, 5, 8, 13, 73, 75, paragraphs 2, 3 of Article 85, Article 91, Articles 13, part 20 of Article 92, Articles 132 - 138 of the Constitution Ukraine, parts 1, 3 of Article 1, paragraph 7 of Article 18, Article 26 of the Constitution of the Autonomous Republic of Crimea, Articles 1, 9, 10 of the Law of Ukraine “On the Verkhovna Rada of the Autonomous Republic of Crimea.”

The subject of the right to constitutional petition – the Ukrainian Parliament Commissioner for Human Rights – requested the Constitutional Court of Ukraine to recognize the Resolution as non-conforming with Article 73, paragraph 2 Article 85, Article 137, 138 of the Constitution of Ukraine and noted that the issue of altering the territory of Ukraine must be resolved exclusively by an all-Ukrainian referendum.

3. Under the Decision of the Second panel of Judges of the Constitutional Court of Ukraine of March 11, 2014, constitutional proceedings in the cases on the constitutional petitions of the Acting President of Ukraine, the Chairman of the Verkhovna Rada of Ukraine and the Ukrainian Parliament Commissioner for Human Rights concerning the compliance with the Constitution of Ukraine (constitutionality) of the Resolution were consolidated in one constitutional proceeding.

4. Resolving of the issues initiated in the constitutional petition the Constitutional Court of Ukraine proceeds from the following:

4.1. The Constitution of Ukraine proclaimed that sovereignty of Ukraine extends throughout its entire territory; integral part of sovereignty is integrity and inviolability of the territory of Ukraine within its present borders; protecting the sovereignty and territorial integrity of Ukraine is the most important function of the state and a matter of concern for all the Ukrainian people (Article 2, part 1 of Article 17 of the Constitution of Ukraine).

The Constitution of Ukraine shall be regarded as superior law; laws and other regulatory legal acts shall be adopted on the basis of the Constitution of Ukraine and shall conform to it; norms of the Constitution of Ukraine shall be the norms of direct effect; public authorities and bodies of local self-government and their officials shall be obliged to act only on the grounds, within the powers, and in the way determined by the Constitution and laws of Ukraine (Article 8, Part 2 of Article 19 of the Constitution of Ukraine).

The territorial structure of Ukraine, the legal regime of the state border shall be determined exclusively by law of Ukraine (paragraphs 13, 18 of part 1 of Article 92 of the Constitution of Ukraine).

4.2. The people shall be the bearer of sovereignty and the sole source of power in Ukraine; the people shall exercise power directly or through the state authorities and local self-government bodies; the right to determine and change the constitutional order in Ukraine shall belong exclusively to the people and shall not be usurped by the state, its bodies, or officials; no one shall usurp the state power (Article 5 of the Fundamental Law of Ukraine).

The expression of the will by the people shall be exercised through elections, referendum and other forms of direct democracy; citizens shall have the right to participate in the administration of state affairs, in all-Ukrainian and local referendums, to freely elect and to be elected to the bodies of state power and local self-government (part 1 of Article 38, Article 69 of the Constitution of Ukraine).

The right of citizens to participate in a referendum is their inalienable constitutional right. Questions submitted on the all-Ukrainian referendum must be national-level issues, i.e. the resolution of which affects the fate of all Ukrainian people – citizens of Ukraine of all nationalities. Questions submitted on the local referendum may be only issues within the jurisdiction of the local authorities of relevant administrative and territorial unit.

4.3. Under Article 152 of the Constitution of Ukraine the territorial structure of Ukraine shall be based on the principles of unity and integrity of the state territory, the combination of centralization and decentralization in the exercise of the state power, and the balanced socio-economic development
of regions taking into consideration their historical, economic, ecological, geographic, and demographic characteristics as well as ethnic and cultural traditions. Such constitutional principles of territorial structure are determined by the form of state structure of Ukraine as a unitary state.

The Constitutional Court of Ukraine in its Judgment No. 11-rp/2001 of July 13, 2001, (the case of administrative and territorial structure) established that administrative and territorial unit is a compact part of the united territory of Ukraine, which is the spatial basis for organization and activity of public authorities and local governments.

The system of the administrative and territorial structure of Ukraine shall include: the Autonomous Republic of Crimea, oblasts, rayons, cities, city districts, settlements and villages (Article 133 of the Constitution of Ukraine). According to Article 133 of the Fundamental Law of Ukraine the Autonomous Republic of Ukraine Crimea and the City of Sevastopol are parts of Ukraine as separate subjects of administrative and territorial structure of Ukraine. The City of Sevastopol is not a part of the Autonomous Republic of Crimea, has a special status determined by the law of Ukraine.

The Constitutional Court of Ukraine stressed that the principles of integrant territorial inviolability of Ukraine within its present borders, extendine of sovereignty of Ukraine throughout its entire territory are established by the Constitution of Ukraine. Reduction of the existing borders of Ukraine, withdrawal of any subject of the administrative and territorial structure of Ukraine from its body, changing of the constitutional status of administrative units, in particular of the Autonomous Republic of Crimea and the City of Sevastopol as an integral part of Ukraine, within holding of a local referendum contradicts the above-mentioned constitutional principles.

4.4. Any changes to the territory of Ukraine shall be resolved exclusively by the all-Ukrainian referendum (Article 73 of the Constitution of Ukraine). Authority to call the all-Ukrainian referendum on issues indicated in said Article of the Constitution of Ukraine belongs to the Verkhovna Rada of Ukraine (paragraph 2 of part 1 of Article 85 of the Fundamental Law of Ukraine). Organization and procedure for conducting elections and referendums shall be determined exclusively by the laws of Ukraine (paragraph 20 of part 1 of Article 92 of the Constitution of Ukraine).

The Autonomous Republic of Crimea shall be an integral constituent part of Ukraine and shall resolve issues delegated to its authority within the frame determined by the Constitution of Ukraine (Article 134 of the Constitution of Ukraine). The list of matters that are under the authority of the Autonomous Republic of Crimea and areas in which it effects normative regulation is determined in Articles 137, 138 of the Constitution of Ukraine.

The constitutional status of the Autonomous Republic of Crimea complies with European Charter of Local Self-Government ratified by the law of Ukraine No. 452/97-VR dated July 15, 1997, according to which the basic powers and responsibilities of local authorities shall be prescribed by the constitution or by statute; local authorities shall, within the limits of the law have full discretion to exercise their initiative with regard to any matter which is not excluded from their competence nor assigned to any other authority (paragraphs 1, 2 of Article 4).

4.5. According to the Constitution of Ukraine it is under the authority of the Autonomous Republic of Crimea to organize and hold of local referendums (paragraph 2 of Article 138) in the manner determined by the law of Ukraine (paragraph 20 of par one of Article 92). Regulatory legal acts of the Verkhovna Rada of the Autonomous Republic of Crimea and decisions of the Council of Ministers of the Autonomous Republic of Crimea shall not contradict the Constitution and laws of Ukraine and shall be adopted in accordance with and in pursuance of the Constitution of Ukraine, laws of Ukraine, acts of the President of Ukraine and the Cabinet of Ministers of Ukraine (part 2 of Article 135 of the Fundamental Law of Ukraine).

The Constitutional Court of Ukraine considers that the Verkhovna Rada of the Autonomous Republic of Crimea by adopting the Resolution, which provides for accession to the Russian Federation as its subject, addressing to the President and Federal Council of the State Duma of the Russian Federation to initiate the procedure of accession to the Russian Federation as a subject of Russian Federation, putting to the referendum mentioned questions, violated constitutional principle of territorial integrity of Ukraine and exceeded its authorities, and thus the Resolution does not comply with
5. By the Resolution, the Commission of the Autonomous Republic of Crimea on holding of an all-Crimean referendum is established. Under the Temporary regulation on a republican (local) referendum in the Autonomous Republic of Crimea it is provided for establishing of territorial and district commission on preparing and holding of the referendum

According to the Resolution, the Council of Ministers of the Autonomous Republic of Crimea shall organize financial, technical and other support of holding of the all-Crimean referendum. Due to the fact that the Resolution contradicts the Constitution of Ukraine and according to Article 81 of the Law of Ukraine “On the Constitutional Court of Ukraine” activity of all organs created to hold of this referendum as well as financing activities to hold of the referendum should be terminated, and ballots and campaign materials should be destroyed.

Thus, based on the materials of the case the Constitutional Court Ukraine came to the conclusion that the Verkhovna Rada of the Autonomous Republic of Crimea by adopting the Resolution No. 1702-6/14 “On holding of the all-Crimean referendum” dated March 6, 2014, violated the Constitution of Ukraine.

Given the above and pursuant to Articles 147, 150, 153 of the Constitution of Ukraine, Articles 51, 61, 63, 65, 67, 69, 70, 73, 78, 79, 81 of the Law of Ukraine “On the Constitutional Court of Ukraine” the Constitutional Court of Ukraine

decided:

1. To recognize as non-conforming with the Constitution (unconstitutional) the Resolution of the Verkhovna Rada of the Autonomous Republic of Crimea No. 1702-6/14 “On holding of the all-Crimean referendum” dated March 6, 2014.

2. The Resolution of the Verkhovna Rada of the Autonomous Republic of Crimea No. 1702-6/14 “On holding of the all-Crimean referendum” dated March 6, 2014, declared unconstitutional shall be voided on the day of rendering by the Constitutional Court of Ukraine of this Decision.

3. To terminate the work of the Commission of the Autonomous Republic of Crimea on holding of an all-Crimean referendum, and territorial and district commissions established to hold the referendum.

4. The Council of Ministers of the Autonomous Republic of Crimea must terminate funding of activities connected with holding the referendum; ensure the destruction of ballots and campaign materials.

5. The Decision of the Constitutional Court of Ukraine shall be compulsory in the territory of Ukraine, final and may not be appealed.
The Decision of the Constitutional Court of Ukraine shall be subject to pronouncement in “Visnyk of the Constitutional Court of Ukraine” and other official publications of Ukraine.

Плохие новости.

В районе 9 часов из Макеевки в сторону Донецка по макеевскому шоссе проследовал тягач на платформе которого был установлен ЗРК Букм1-м2?

Указанная ЗРК проследовала до пересечения с бульваром Шахтостроителей. Ее сопровождал конвой в составе, 1 паркетник серого цвета Ray4, комуфлированный автомобиль УАЗ и микроавтобус жандар синего цвета с тонировкой. По состоянию на 9-15 комплекс находился на пересечении Шахтостроителей и Ильича. Боевики выходили из автомобилей заняв таким образом 2 крайних левых полосы движения. Очевидно, ожидали дальнейшего логистических указаний.

Мрачный Молочник

это как веселый, но только мрачный

Про сбитый над Торезом малазийский Боинг МН17 и террористов ДНР или крупный фейл Стрелкова Гиркина

Решил написать пост. С форматированием не заморачивался, так что извиняйте)

Итак, спустя несколько минут после того как был сбит малазийский лайнер, сепаратисты сегодня в своих хрониках покаялись "птичкопадом", дескать нефиг у нас тут летать, мы же предупреждали:
Как заметили в комментариях - у Гиркина Стрелкова официально нет аккаунтов и групп в соцсетях, но тем не менее по оперативности сводок видно, что постит кто-то явно из их команды умело разбавляя всяческой пропагандой (часто выходящей за рамки здравого смысла, но тем не менее никто ее не опровергает и не критикует). Т.е. вдумайтесь - якобы фейк аккаунт с 211 тысяч подписчиков вводит в заблуждение столько людей, то есть на пропаганду из этого аккаунта (значит работают заодно). Согласитесь, очень удобно! В случае жестких фейлов всегда можно сказать дескать "я не я, и лошадь не моя, и я не извозчик" , а тем временем инфовбросы по геббельсу выполняют свою работу: "Они пользуются тем, что средний, порядочный гражданин не в состоянии поверить в то, что можно лгать с такой наглой и бесстыдной беспечностью, с которой лгут они. Чем чудовищнее ложь, тем легче в нее поверят."

Обратите внимание на фразу в следующем видео: "ЗНАЧИТ НЕ ЗРЯ ПРИВЕЗЛИ"

Люди за кадром говорят "оно сначало летело"
Дети так же подтверждают, что чем-то сбили.

Очевидцы удивляются, что пилоты не выпрыгнули из самолета

"Посла ракета и разорвало"(0:37) !!
5/30/2018 Про сбитый над Торезом малазийский Боинг MH17 и террористов ДНР или крупный фейл Стрелкова Гиркина - Мрачный Молочник

Более полное видео с описанием: http://www.aparchive.com/metadata/-Ukraine-MH17-Crash/e5fc111e6937f181a0512444107214a8?query=ukraine%3a&orderBy=Relevance&hits=13&referrer=search&search=%2fsearch%3fquery%3dukrainto%26allFilters%3dVALIDATED%2520UGC%3aSource&allFilters=VALIDATED+UGC%3aSource&productTyp
New amateur footage has emerged of the immediate aftermath of the Malaysia Airlines MH17 crash in eastern Ukraine in which all 298 people on board were killed.

The video is perhaps the first taken immediately after the plane came down.

The mobile phone footage, shot on July 17, shows the wreckage on fire in a field in the village of Hrabove with large plumes of black smoke billowing from the site.

Residents from the village are seen gathered near the site and can be heard asking about the whereabouts of the pilot.

This is significant because multiple Ukrainian military planes had been shot down by this time, and their pilots and crew regularly taken prisoner by rebel forces.

The reaction of villagers in the video, obtained on Sunday by The Associated Press, suggests their immediate assessment too was that another Ukrainian plane had been struck.

In another exchange, a person is heard questioning whether more than one plane had crashed, since there was so much debris.

People around him quickly correct him to say only one aircraft had come down.

The video's creator, a resident of the village of Hrabove, has asked not to be named.

The footage has been authenticated against known locations and events and is consistent with Independent AP reporting.

The Boeing 777 was flying from Amsterdam to Kuala Lumpur when it was shot down on July 17 over a rebel-held area of Ukraine.

Ukraine and the West have blamed the attack on Russia-backed separatists using a ground-to-air missile.

На одном из российских ресурсов появилась запись со свидетельством очевидца.
Бойцы народного ополчения ДНР сообщили о том, что им удалось сбить украинский самолет Ан-26. Атака на воздушное судно состоялась 17 июля около 17:30 по местному времени, когда оно находилось в воздухе над городом Торез (ДНР).

По данным телеканала Life News со ссылкой на представителей ополчения, украинский транспортник упал в районе шахты «Прогресс». Жилых кварталов поблизости от места падения нет.

Как рассказал один из защитников Донбасса, когда самолет пролетал над Торезом, в воздух взялась ракета, точно поразившая цель. После сильного взрыва транспортник начал падать, оставляя за собой шлейф черного дыма. Также на землю начали падать его обломки.

Через время когда стало известно, что это был пассажирский самолет, то сепаратисты сподобились на еще одно сообщение:
Еще через некоторое время когда он понял, что по видео можно понять где именно упал Боинг, они и вовсе удалили свой первоначальный пост. И оставили только следующий за ним.

Клинический Павел Губарев на месте события утверждает, что самолет сбили над Днепропетровской областью из Бука и он пролетел еще 200 км. Кроме того он подчеркивает, что Буков у ополчения ТОЖЕ нет.

Напомним, что еще 29.06.2014 ресурс ополченцев хвастался, что у них появились ЗРК "Бук"
Так же ДНР хвастались захваченными Буками в твиттере, фото уже из твиттера выпилили - палево!

(ведь если с них никто не стрелял, то зачем тогда выпиливать фото? :)

ссылка на кеш гугла: Слава роботам! Гуглу слава!
Самоходные зенитно-ракетные комплексы "Бук" на территории зенитно-ракетного полка ПВО А1402 взятого под контроль ДНР. pic.twitter.com/bTl9BZCvB1

Остался только пост про захват зенитно-ракетной части:
@dnrpress специалисты умеющие этим пользоваться или уже есть или скоро прибудут на территорию ДНР

https://evilmilker.livejournal.com/4379.html?thread=66587#t66587
Есть заявление Кургиняна, который как известен тем, что в споре с Губаревым и Ко о поставках оружия Россией называл это помощью гражданского общества. В данном видео он снова заявляет, что высококлассные специалисты-электронщики все того же гражданского общества уже прилетели в Донецк и намерены в кратчайшие сроки починить захваченный у украинских бандитов-бандеровцев Бук, а так же делает предположение, что их может оказать даже несколько (вспомним как быстро самоклонировалась захваченная "Нона"):

Видео уже выпилили по жалобе Кургиняна - палево, да.
Но добрые люди перезалили и будут перезаливать.
Чуркин отмазывает террористов в ООН:

Днем очевидцы в социальных сетях сообщали о перемещении зенитно-ракетного комплекса "Бук" из Тореза в Снежное.

Террористы же в данный момент по российским каналам отрицают свою причастность к данной трагедии, говоря, что не имеют вооружения, способного сбить самолет на такой высоте.
Справка:
«Бук» (индекс ГРАУ — 9К37, по классификации МО США и НАТО — SA-11 Gadfly) и его модификации «Бук-М1» (9К37М и 9К37М1) — самоходный зенитно-ракетный комплекс, предназначенный для борьбы с маневрирующими аэродинамическими целями на малых и средних высотах (от 30 м до 14—18 км), в условиях интенсивного радиопротиводействия.
Фото установки в Снежном: заправка в Торезе на проспекте Гагарина. Сразу после ставка (по сообщениям местных жителей в твиттере)

Подробнее: из диалоги в ВК по сообщению местных жителей он стоял в Торезе на пересечение ул. 50 лет СССР и проспекта Гагарина. Фотография сделана с территории АЗС в направлении перекрёстка вышеназванных улиц. К слову проспект Гагарина это часть междугородней трассы H21 проходящей через Торез (Донецк–Снежное–Луганск)

Координаты: [http://maps.yandex.ru/-/CVroI2KB](http://maps.yandex.ru/-/CVroI2KB)

Фотограф стоял под крышой АЗС "Pilot" ([http://maps.visicom.ua/i/POIFON9YLM](http://maps.visicom.ua/i/POIFON9YLM))

А "Стройдом" на фото — это здание по адресу ул.50 лет СССР д.1 на карте

СБУ перехватила разговор боевиков о сбитии боинга, хотя по моему мнению тоже зафейлились и намешали в запись нарезки из разных разговоров про разные события (сбитый 14 числа Ан, казаков и прочее), тем не менее про боинг там тоже есть кусочки и если сопоставить все факты, то можно понять примерно картину.
Кроме того, участники прошлых подобных перехватов очень часто подтверждали их подлинность (в одном из нынешних перехватов Бес тоже подтвердил, что его голос)
Перехват переговоров за несколько минут до сбития:

Выпиленный с канала сюжет LieNews (пособыники террористов всегда оказываются рядом и выдают все самые горячие новости касаемо убийств и терактов сразу же после их совершения, но в этот раз ребята поторопились немного). Поспешили они его убрать и заменить на другую версию, но мы то помним первоначальный сюжет:
ЗРК БУК выдвигается на позиции по направлению к Саур-Могиле (инфо о месте съемки в описании).

Подробнее о месте: http://ukraineatwar.blogspot.nl/2014/07/russia-shoots-down-malaysian-mh17.html

Еще видео установки (как минимум без одной ракеты), точное место съемки пока не идентифицировано (говорят, что г. Краснодон). По заявлению МВД установка движется к границе РФ.
Еще одно доказательство, что это та же самая установка, что стояла в Торезе (сделал MEDISABA, вчера в 17.53 на politota)
В сети со стороны кремлеботов распространяется вот такой фейк (абсолютно без каких-либо доказательств или подтверждений):
В украинских публиках распространяется видео, где якобы ополченцы вывозят в сторону РФ стрелявший Бук. Нет на видео город Красноармейск, видны билборд с рекламой автосалона на Днепропетровской, 34. С 11 мая и до сих пор город под контролем войск жути, проводящих АТО!

На Буке не хватает одной рекеты. На фото и видео с тяжелом (тем же) есть магазин Страйдом. Адрес: Красноармейск, Горького, г. Красноармейск, Горького 49. То есть стреляющий Бук находился на территории, подконтрольной угол и до сих пор там. Какие вопросы? Все ясно как день - Бомбу сбили украинские военные вот этим вот съездом Буком, и теперь, чтобы просочившись в сеть видео не стало компроматом они просто тупо взяли все с большой головы на здоровую, типа это "ополченцы взяли".

Остаются верны своей бредовой натура (адескеры сами себя сознали, лутченецкие сами взорвали кондиционер, ДНР сама стреляет по городам и так далее).

Вот снимок указанного адреса - на нем нет ничего похожего, кроме того на видео видны провода очень сильно похожие на троллейбусные, а в Красноармейске троллейбусов нет:

Кроме того, на фото рекламный щит компании Богдан Айто на котором нет никакого адреса (привет кремлебогатам и ватникам):

https://evilmilker.livejournal.com/4379.html?thread=66587#t66587
Реклама автосалона и новой модели авто Jac.

Смотрим дилеров Jac в Луганской области
Смотрим на карту ООО "Богдан-Авто Луганск" и ближайший до границы с Россией город в котором может быть биллборд:

**КАРТА ПРОЕЗДА**

И о совпадении: Красноярск!
Несколько скринов с d3:

Смотрю активно начала распространяться инфо про то, что запись перехватов разговоров террористов обнародованная СБУ была якобы записана вообще на сутки раньше и это является доказательством, что Украина готовила все заранее и сама сбила самолет.

В качестве доказательств демонстрируются метаданные из скачанных видео, которые датируются 16 числом.

Решил записать коротенькое опровержение для того чтобы боты прекратили этот бред спамить.

Перехват переговоров ополченцев террористов ДНР про Бук-М, Грады и обстрелы Градами с РФ

https://evilmilker.livejournal.com/4379.html?thread=66587#t66587
Пару цитат про вопрос как получается стерео в записях от СБУ:
> ну это как раз нормально, на разные каналы обычно накладывается запись телефонов,
> GSM в любом случае дуплекс с частотным разделением, можно и стерео записывать

Видео про ракетный комплекс Бук

Цитата по из вики про Бук. "СОУ 9А38 является связующим звеном между ЗРК 2К12 «Куб» и 9К37 «Бук». Входит в состав ЗРК 2К12М4 «Куб-М4». Самоходная огневая установка может самостоятельно находить, опознавать и открывать огонь по целям. Таким образом СОУ 9А38 заключает в себе функции самоходной пусковой установки (СПУ) и самоходной установки разведки и наведения (СУРН). СОУ 9А38 способна находить цели в заданном секторе и выполнять захват цели, а также обеспечивает решение предстартовых задач и наведение трёх собственных ЗУР и трёх ЗУР сопряжённой с ней пусковой установки 2П25МЗ.[1] [2]."

СОУ 9А38 включает в себя следующие элементы: радиолокационную станцию 9С35, систему жизнеобеспечения, цифровую вычислительную систему, аппаратуру навигации, орентирования и топопривязки, систему распознавания «Свой-Чужой», телевизионно-оптический визир, аппаратуру связи с СУРН 1С91МЗ и СПУ 2П25МЗ.

Опять же есть куча всяких модификаций.

Так же слышал мнение, что целенаведение для установки могли произвести с территории РФ.

Нашел некоторые подтверждения. Заметки ополченца с ресурса сепаратистов:

https://evilmilker.livejournal.com/4379.html?thread=66587#t66587
Так же в фейсбуке Геращенко опубликовал фото с инверсионным следом запуска ракеты:

https://evilmilker.livejournal.com/4379.html?thread=66587#t66587
"Это фото инверсивного следа, оставленного после запуска ракеты ЗРК "Бук". Сделано через несколько минут после запуска ракеты из 3 микрорайона города Торез с запада на восток. Тысячи людей видели запуск и полет ракеты", - отметил он.

Фото с очень большой вероятностью может оказаться правдивым не смотря на отсутствие облачности. По поводу точки выстрела достаточно много материала для анализа https://meduza.io/feature/2015/03/17/sled-nad-torezом

Репост про место запуска ракеты из ЗРК Бук: http://evilmilker.livejournal.com/6167.html

Еще про место запуска ракеты: http://ukrainewar.blogspot.nl/2014/07/exact-location-pinpointed-of-Nh17.html

upd: Есть несколько любопытных записей с каналов сепаратистов Zello где очевидцы подтверждают, что видели пуск ракеты и даже обозначают район:
Пост про фальшивого испанца-диспетчера

Вот видео говорящее само за себя, представителям ОБСЕ не разрешают нормально работать. Возникает закономерный вопрос - если вы не сбивали самолет, то зачем препятствуете работе международной организации?

Ответ на этот вопрос может дать новая запись перехваченных разговоров боевиков ДНР от СБУ по поводу поиска черных ящиков:
Из комментариев:

Твиттер:

#Russia Бук менді жағы #MH17 қауіпсіздік бетінен бір жұлдыз. Бұл бланш сипатталады. #Putin, бір ортадан жылыма жатайық.
Ребята, молния! Это просто эпик фейл российских властей, на пресс-конференции Министерства Обороны они снова повторяют этот бред для лохов и в качестве доказательства приводят вот этот кадр:

ААААААААААА! У меня нет слов просто! Ссылка на пресс-конференцию [http://www.youtube.com/watch?feature=player_detailpage&v=KSspe5RqQvo#t=1482](http://www.youtube.com/watch?feature=player_detailpage&v=KSspe5RqQvo#t=1482)

РБК: военный эксперт раскритиковал доклад минобороны РФ по крушению Boeing-777 по поводу версии, что Боинг сбили штурмовиком Су-25:

Еще про фейкость и абсурд доклада МО РФ - где же такой любимый поклонниками Путина Шарий? Почему не опровергает все эти фейки??: [http://stepasyuk.livejournal.com/11763.html](http://stepasyuk.livejournal.com/11763.html)
Давайте добавим материалы от юзера drugoi чтобы ни у кого не оставалось сомнений о характере повреждений:

Фотографии: Noah Sneider and Sabrina Tavernise/The New York Times

23.07.2014, США | Журналисты «Нью-Йорк Таймс» Noah Sneider и Sabrina Tavernise, сделавшие фотографии обломков малазийского Боинга 777 под Донецком, попросили эксперта авторитетной военной исследовательской организации в США IMS Jane's Рида Фостера дать оценку повреждений на деталях фюзеляжа. Эксперт изучил фотографии и пришел к выводу, что повреждения вероятнее всего были нанесены шрапнелью после взрыва сверхзвуковой ракеты зенитного комплекса SA-11 («Бук»). Рид Фостер сказал, что по фотографиям трудно установить какая именно ракета была использована, но по характеру отверстий в деталях фюзеляжа можно судить, что это именно тот тип оружия, о котором говорили американские официальные лица после катастрофы самолета.

Если судить по местам повреждений в районе кабины пилотов, взрыв ракеты нанес удар шрапнелью в переднюю часть самолета:

Про сбитый над Торезом малазийский Боинг МН17 и террористов ДНР или крупный фейл Стрелкова Гиркина - Мрачный Молочник

https://evilmilker.livejournal.com/4379.html?thread=66587#t66587
Еще пару слов о версии с самолетом от юзера tamarovich:

[Spoiler (click to open)]

Еще немного о тотальной путинской лжи, сеанс разоблачения со ссылками.
В связи с истерикой правок Википедии в части ТТХ штурмовика Су-25 предлагаю пользоваться страницей [http://airwar.ru/enc/attack/su25.html] - там пока не покорежили... Так вот, смотрим, читаем, думаем. И что мы видим?
Да, "Грач" может подняться до 10000м... Практически без вооружения, и с большим трудом. Это его реальный потолок, достижимый только на пределе возможностей машины, если ободрать подвески, оставив только пушку. Есть сомнения в том, что техническое состояние украинских самолетов позволит им набрать предельную для находящейся в идеальном состоянии машины высоту.
Но интереснее другое: на высоте максимальная скорость (находящемся в идеальном состоянии и с пустыми подвесками) Су-25 - M0,82. Т.е., для 10000м - около 882км/ч (там скорость звука 299м/с, плюс-минус текущие погодные условия - [http://www.dpv.info/Guide/Physics/Sound/SoundSpeedAirHeight/]). На той же высоте крыжовская (не максимальная!) скорость Boeing-777 ([http://airwar.ru/enc/airliner/b777-200er.html]) - 905км/ч. Так что "догонять" Бонингу Су-25 не может никак и ни при каких условиях. Он МЕДЛЕННЕЕ. При наборе штурмовиком высоты разница, наверное, будет 70-100 км/ч. А ему надо именно догонять, потому что его ракеты можно пускать только находясь позади цели - им надо "видеть" сопла двигателей для захвата цели. Так вот: покажите мне того идиота, который пошлет для перехвата цели машину, которая имеет меньшую скорость и, вообще, с большим трудом может забраться на требуемую высоту? При том, что ВВС Украины располагают и Миг-29 и Су-27, про которые вопросов не возникает. Таких идотов в природе не существует - ну, конечно, как "ополченцы", МО РФ и среди тех, кто им верит.
Кроме того, надо понимать, что Су-25 в принципе не несет ракет, которые могут разнести 300-тонный самолет так, чтобы его экипаж даже не успел подать сигнал бедствия. Его максимальное(!) вооружение "воздух-воздух" - ракета Р-60 ([http://airwar.ru/weapon/avv/r60.html]), БЧ которой весит (ВВ и ГПЭ вместе) всего лишь около 3-3,5 килограмма. Наведение у нее инфракрасное, так что она максимум могла разнести один из двигателей - и, пожалуй, остановить Бонинг просто бы хоть до Ростова догнать. И даже если бы упал - то не сразу, а минут через десять криков в эфире.

Фотографии: Noah Sneider and Sabrina Tavernise/The New York Times
ИТОГО: рассказать о том, как "украинский Су-25 догнал и сбил Боинг" являются ВР АНЬЕМ С ПЕРВОГО И ДО ПОСЛЕДНЕГО СЛОВА. Причем, учитывая кто это "озвучивает" - враньем заведомым и умышленным.

Илья В.

Итак, продолжим - Аваков наконец-то дал координаты, хотя в принципе люди в комментариях и без него нашли место съемки своими силами, за это всем большой респект!

Про переговоры диспетчера: [http://0serg.livejournal.com/146553.html](http://0serg.livejournal.com/146553.html)

<table>
<thead>
<tr>
<th>Про переговоры диспетчера</th>
</tr>
</thead>
</table>
| Последний месяц (примерно с 8-го августа) в российских СМИ идёт целенаправленная компания – скажем так – по заблаговременной дискредитации выводов Международной Экспертной Комиссии (I.I.T.) по расследованию обстоятельств и причин катастрофы Малазийского Боинга над Донбассом. Физическими тут идут RT и LifeNews, и их статьи в перепечатывают несколько мелких газет/порталов в западной прессе – список этих «ретрансляторов» довольно короткий :) Да – и на Западе тоже есть и дураки, и любители теорий заговоров – по любому поводу.

Практически все публикации в RT и LifeNews сейчас используют один и тот же приём: «Они уже две (три, четыре) недели молчат – это очень подозрительно!», «От нас что-то скрывают! Значит – есть что! Значит, нас собираются обмануть!», «Они засекретили переговоры диспетчеров с бортом! Они там хотят что-то подтереть!!»

Друзья попросили меня прокомментировать как раз последний пункт, получилось небольшое эссе, которое мы решили вынести в открытый пост.

Итак:

«Украинцы засекретили переговоры диспетчеров с бортом!
Они там хотят что-то подтереть!!»

Это еще один мыльный пузырь от ИТАР-ТАСС.

Кратко, суть здесь, как всегда, в передёргивании слов и подмене понятий.

Довольно примитивная двухходовка:

Ход первый:

Виталий Чуркин делает заявление о том, что надо **опубликовать** записи переговоров борта с диспетчерами Днепропетровского Центра (ДДЦ), и требует этого от Украины. По его мнению это необходимо для прозрачности расследования. (Сейчас мы знаем, что такое заявление продублировал даже Лавров. Но и он говорит «опубликовать», а не «передать экспертам» – иначе его тут же поймут и возразят – все записи ДДЦ переданы в I.I.T.)

Однако, **опубликовать** записи Украине не может сразу по двум причинам –

1. Украина руководит расследованием, а DSB; соответственно, Украина не может принять решение (Чуркину свой запрос надо адресовать в DSB);
2. Есть свои инструкции НКАП, который подобные вещи запрещает, а правом исключения обладает наиболее пострадавшая страна (т.е. Голландия), и такое исключение должен утвердить Верховный (или

https://evilmilker.livejournal.com/4379.html?thread=66587#66587
Конституционный - зависит от страны) Суд.
Соответственно, Украина посылает Чуркина на три буквы, но молча (в глубине души). 

Ход второй:
Российские СМИ начинают крик по поводу нежелания Украины проводить прозрачное расследование, а самые глупые заявляют, что Украина отказалась **передать** эти записи международной комиссии (хотя Чуркин требовал: **"опубликовать"**) Ну, и конечно – "им есть что скрывать!", "они тянут время, что б подтереть компромат!" – и далее со всеми остановками :) 
Можно ещё отметить иронию в росСМИ по поводу изъятия Службой Безопасности Украины всех записей из Днепропетровского центра от 17-го июля – с той же риторикой. НО – это нормальная процедура в подобных случаях, более того – это совершенно необходимо. Диспетчерский центр не в силах обеспечить необходимый уровень безопасности, у него простой архив, но теперь эта запись из архива стала возможной уликой в очень резонансном деле. Естественно – такая мера предписана теми же правилами ИКАО (в самом Annex-13 она упоминается, расписано это в Appendix).

Теперь факты и аргументы :)
DSB, которая руководит расследованием, никаких претензий к Украине не высказывала, по причине того, что претензий нет – все требуемые материалы они от Украины получили. Однако, на шум в росСМИ им наплевать, и заявление с опровержением – мол, всё, что надо, мы от Украины получили – они не делали и не будут. Тем более, что и нужды-то нет – через два дня, 9-го сентября, будет опубликован предварительный отчет DSB по расследованию. Там обязательно будет список всех использованных материалов – и станет ясно, что записи ДДЦ – переданы.

Но главное – весь этот шум вокруг записей переговоров выезденного яйца не стоит вот почему:
Основное подозрение, аффирмированное конспирологами – ДДЦ "специально" изменил маршрут лайнера и направил его в опасную зону. Этот вариант уже опровергнут – в день катастрофы были опубликованы два заявления:  
1) Малайзия-Эрлайнз заявила, что полет проходил по заранее оформленному маршруту без отклонений от заявленного курса и коридора; 
2) ИКАО это заявление подтвердило.
Кроме того, 
3) записи FlightRadar – всем доступные – тоже это подтверждают. Рейс МН17 всю Украину пролетел практически по прямой, в пределах своего коридора. 
Ссылки на 1) и 2) можно найти в [вот тут](https://evilmilker.livejournal.com/12779.html), а что касается карт – их там целая коллекция :) 

И последнее, самое смешное – в распоряжении DSB есть записи бортового самописца – речевого (VR). Английские эксперты, которые расшифровывали их, заявили, что состояние VR удовлетворительное, и что запись считана полностью, без потерь. На этой записи есть все переговоры борта с диспетчерами. То есть, по сути – запись Днепропетровского центра не нужна (их полная копия есть в бортовом самописце), и подтереть/подделать что-либо – НЕВОЗМОЖНО.

И кстати, речевой самописец в руках у Украинских властей даже не был – бандиты его передали прямо представителям Малазии. 

Но нашим оппонентам ни объяснить, ни доказать что-то – нельзя :

Комментарии доклада комиссии по Бонигу - [http://evilmilker.livejournal.com/12779.html](http://evilmilker.livejournal.com/12779.html)

Появились фотографии "Бука", сбившего МН17, в России в составе российских войск

Данные немецкой разведки:

Думаю у каждого здравомыслящего человека возникает логичный вопрос: если ополченцы из Бука не сбивали Бониг, то почему они опровергали его наличие и до последнего пытались отмахаться используя самые невероятнейшие и абсурдные доводы? Почему они этот Бук вывозили в сторону РФ? Почему они его не перекомпилировали и не удалили? Почему они этот Бук вывозили в сторону РФ? Почему ополченцы препятствовали работе международной комиссии, расшифровывали обломки (говорили, что для извлечения тел). Да если бы Украина сбила Бониг, то Путин приказал бы там все перекомпилировать и снять на видео. И ни единого обломка не трогать. Мы же наблюдаем совершенно противоположную картину. Почему в этом отношении наши люди, которые не могут верить всей остальной лжи российскому правительству на поводу событий в Украине (например, что РФ не поставляет оружие в Украину), что и тот магнит был точно таким же грубо обманывать во всех принципиальных вопросах? Не просто преувеличивать, а переворачивать факты на голову!

Комментируйте, опровергайте, будем докапываться до истины.

Еще раз большое спасибо всем небезразличным, в пост внес некоторые ключевые моменты из комментов, хотя осталось еще много интересного.
Если кого-то забыл упомянуть в посте, то напишите в личку. Чуть попозже еще обновлю.
Пост будет обновляться по мере поступления дополнительной информации.

О, вообще супер! Я правда все никак до конца не могу понять, за каким хреном водитель поперся через Павловскую, а не раньше уехал на объездную, но видимо может или плутанул, или по высоте где-то не пролез.

Я выше кинул ссылку на видео с трёх камер в Луганске, колонна техники из России, там есть и это место. Этот маршрут у них был протоптан, почему именно этот - не понятно, я не силён в дорожных маршрутах. Но можно уверенно сказать, что БУКи не плутали, ехали уже по проторённому пути.

Провода и на видео и на фото на одном плане. Хотите защищать русский фейл о Красноармейске, предъявите вы фотографии этого места в том городе, потом поговорим.

Я не вижу, как можно из снимка vlad_igorev 2014-07-23 12:33 (UTC) (фото проводов троллейбуса) получить ту картинку подобных проводов, которую мы видим на снимке бук из видео. Чисто из последнего видно, что провода протянуты вдоль той улицы, по которой движется бук. На фото же, на предполагаемой улице движения бук таких проводов мы не видим. Они есть на другой улице, которая подходит к Нечуй-Левицкого. Но получить такую же картинку расположения этих проводов, как и в видео при различных углах мне представляется невозможным.

Далее, на фоне щита с рекламой справа мы видим сухое дерево. Его нет ни на одном из представленных фото с предполагаемого места проезда.

А у вас есть фото этого места в городе Красноармейске (как утверждает МО РФ)?
Как?! Нет! А в чем проблема??? Город Красноармейск не является закрытым для журналистов, да и сторонников РФ там хватает. Почему мин. обороны России досихпор не разжился этими снимками???
Может одна из причин то, что в Красноармейске вообще нет троллейбусов :))))

Вы можете сколько угодно требовать кадры точно с того ракурса, что и видео. И твердить "я не верю". Мне на это наплевать. Потому, что вы вообще не можете ничего предъявить в подтверждение просто голословного утверждения властей России.
На таких условиях я с вами спорить не буду. У меня есть снимки места, у вас ничего нет. Снимки из Красноармейска в студию, тогда поговорим.

Я не верил, что не верю. Мне просто хотелось убедиться, вот и все. Если я хочу сослаться на это расследование в разговоре с теми, кто верит в версию МoР, то мне хотелось бы, чтоб у них не было сомнений в правильности истолкования. Так что вы на вас просто наблюдаетесь с упреками. Не меня надо упрекать, а отсутствие убедительности в том материале, о котором я ранее сказал. Если у вас есть снимок с таким же ракурсом, как и в видео, то вы его должны выставить, тогда все вопросы отпадут.

Annex 624

Photograph Showing Geo-Location Markers (23 July 2014)
Annex 625

Actual Requests for Assistance to the Militia of Novorossia, StrelkovInfo (as archived on 10 August)

This document has been translated from its original language into English, an official language of the Court, pursuant to Rules of the Court, Article 51.

Pursuant to Rules of the Court Article 51(3), Ukraine has translated only an extract of the original document constituting this Annex. In further compliance with this Rule, Ukraine has provided two certified copies of the full original-language document with its submission. The translated passages are highlighted in the original-language document. Ukraine has omitted from translation those portions of the document that are not materially relied upon in its Memorial, but stands ready to provide additional translations should the Court so require.
Current details for making donations for the militia of Novorossiya

**Sberbank card**: 4276 8520 1089 2704 (Alexander Viacheslavovich Kononov).
Card account number: 40817810052090170029
Beneficiary’s bank: Sberbank of Russia.
BIC: 046015602
Corr. account: 30101810600000000602
Taxpayer identification number (INN): 7707083893
Code of reason for taxpayer registration (KPP): 616143001

**Webmoney** and **Yandex.Money**: after having our accounts with these payment systems repeatedly blocked, we do not publish them openly. To receive the account and make the transfer, email us at juchkovsky@gmail.com.

You can also make a transfer (including from overseas) using such payment systems as Kolibri, MoneyGram, Western Union — to do so, contact us at juchkovsky@gmail.com to receive the beneficiary’s name.

A money transfer from foreign countries (outside Russia) can be made via Western Union. Write an e-mail to juchkovsky@gmail.com in order to receive the first name and last name of the beneficiary.
Annex 626

Report on Past Deliveries, Coordination Center for New Russia (19 August 2014)
We would like to thank all those who made a donation for the right cause. We would gladly thank each and every one of those who donated either 100 roubles or 100,000 roubles, but for now we will just list those who made a considerable contribution to our future victory.

The team of the Novorossiya Assistance Coordination Center would like to thank:

1) Gennady for the hefty contribution on behalf of the company led by him.

2) Alexander Ivanovich for buying 50 sets of summer and winter footwear and clothing for the Volunteer Communist Detachment.

3) Artiom for buying a large shipment of optical equipment.

4) Igor for donating a big arsenal of interesting specimens of gear and knives.

5) Alexander and Alexey for buying us a car for transporting our cargo.

6) The MyRevolutionRus community.

1) Cash donations for the period

+ 6,000 from Irina Pushkina

+ 2,000 from the Ukrainian Front

+ 50,000 from Konstantin

+ 100,000 from Ivan

+ 2,500 from Alexander from Udelnaya

+ 5,000 from Alexander from Udelnaya

TOTAL donations: 165,500 roubles

2) Sberbank card

Balance as of September 1: 123,885.71 roubles

+ 2,007,499.30 roubles,

- 2,017,571 roubles withdrawn,

- 6,443 roubles in Sberbank commission fees for transfers.

Balance as of January 5, 2015: **107,371.01**

+ 59,334.07
- 20,000 roubles withdrawn in cash.

4) PayPal.

The PayPal administrators are not big fans of ours. For this reason, we give out our PayPal account upon request only. We will stop short of disclosing our PayPal account balance for the same reason.

- 380,000 roubles in cash has been withdrawn from the account (this is a ballpark figure).

5) Donations from corporate donors.

+1,000,000 roubles.
- 138,750 – procurement of 125 Flora winter outfits
- 523,250 – procurement of 575 Afghan (Bhutan) winter outfits
- 135,000 – procurement of 1 Quantum HD38S thermal imaging camera
- 203,000 – procurement of 58 tactical vests
Balance: 0.

Expenses.

Cash balance as of September 1: 62,842.29 roubles and 4,000 dollars.

+ 165,500 roubles donated in cash
+ 2,017,571 roubles transferred to the Sberbank card
+ 20,000 donated via Yandex.Money
+ 380,000 roubles donated via PayPal
- 260,000 – procurement of winter uniforms in Moscow
- 3,000 – cost of transporting a wounded soldier from Donetsk to Rostov
- 7,000 – cost of the funeral for the above-mentioned wounded soldier (he died before we could transport him)

- 400,000 – purchase of a mobile intensive care unit for Tigra
- 147,000 – purchase of 42 tactical vests
- 80,000 – to support a family of a militia fighter for 4 months
- 24,000 – procurement of 10 machine gun cases for 100 cartridges each and 8 “snail” cases for automatic grenade launchers
- 63,100 – procurement of magazines for AK 7.62 and tactical vests
- 5,700 – to pay for the travel of two volunteers from Moscow to the Volunteer Communist Detachment
- 100,000 – procurement of 250 sets of Flora winter outfits
- 1,300 – Dolg-M2 tactical belt
- 3,100 – reactive muzzle recoil compensator for the AK assault rifle
- 780 – Armacon adapter for the AK assault rifle
- 5,700 – Fab Defense plastic butt stock for the AK assault rifle
- 21,136 – procurement of uniforms (caps, boots, T-shirts, vests, summer and winter outfits)
- 2,590 – procurement of 2 mounts for the Dragunov sniper rifle for 30 mm
- 3,490 – procurement of a 20-60*60 spotting scope
- 9,000 – procurement of 18 coveralls for tank personnel
- 18,000 – procurement of 5 Gorka-3 (fleece) outfits
- 3,500 – procurement of Gorka outfits
- 4,000 – winter army boots
- 3,600 – procurement of 3 boresighting cartridges
- 6,500 – procurement of a tactical prismatic scope
- 13,330 – procurement of 2 optical scopes
- 8,000 – procurement of a night-vision monocular
- 1,000 – procurement of treats for the wounded soldier Alexey at the Military Medical Academy
- 3,750.50 – fees charged by shipping companies to deliver humanitarian cargo from the regions to St. Petersburg
- 10,000 – cash handed out in person to the soldier with call sign “Rybak”
- 2,080 – procurement of food supplements for the soldier with call sign “Rybak”
- 850 – procurement of athletic vitamins for the soldier with call sign “Rybak”
- 2,000 – for Berkutenko (before the campaign announced to collect donations for him)
- 8,000 – handed over to the public service institution “Spasiom Donbass” [Save Donbass] to fund the purchase of CCTV cameras
- 1,583 – medications for “Chechen"
- 2,739 – procurement of 20 torchlights and batteries for them
- 11,900 – procurement of a drone modem
- 3,780 – procurement of the Canon IXUS 45 camera with a memory card for photo reports
- 20,000 – procurement of 5 Gorka outfits (for “Kalmyk”)

Formation of the Volunteer Communist Detachment
- 87,000 roubles – payment for the training camp for the Detachment in St. Petersburg
- 95,000 roubles – placed in the Detachment’s cash fund
- 1,000 dollars – placed in the Detachment’s cash fund
- 8,000 – procurement of essential food items before dispatch of the Detachment
- 12,456 – accommodation and meals for volunteers
- 1,300 – production of seals of the Volunteer Communist Detachment
- 175,000 – procurement of 50 tactical vests
- 24,000 – procurement of 50 magazines (5.45 mm) for 45 cartridges each
- 5,000 – procurement of 10 magazines for the Dragunov sniper rifle
- 6,600 – procurement of 6 Army-issue sleeping bags
- 1,500 – procurement of 10 Army-issue sleeping pads
- 40,500 – procurement of 45 sets of summer camouflage (Russian numerals)
- 7,000 – procurement of 20 entrenching tools
- 930 – procurement of 22 canisters of gun oil
- 9,200 – digital night-vision monocular
- 5,300 – 70 sleeve patches ordered for the Detachment
- 45,000 – procurement of 9 new 6Sh23 bullet-proof vests
- 7,000 – procurement of three 6Sh7 helmets
- 6,000 – procurement of 21 food rations
- 10,000 – procurement of a GPS/Glonass navigator
- 10,000 – accommodation for 4 Spanish volunteers in Moscow
- 48,000 – procurement of 16 Kevlar helmets
- 6,400 – procurement of 10 magazines and 10 firing pins for Makarov pistols
- 32,000 – procurement of cigarettes for the Volunteer Communist Detachment (60 blocks)
- 1,000 – production of a seal for “Mechanic”
- 4,000 – winter army boots
- 600 – pistol holster for the Volunteer Communist Detachment
- 4,800 – procurement of a USB memory stick and router for the Volunteer Communist Detachment
- 1,000 – procurement of an MTS SIM card for a wounded soldier at the Military Medical Academy
- 545 – procurement of treats for a wounded soldier at the Military Medical Academy
- 3,960 – procurement of crampon transportation containers for Volunteer Communist Detachment
- 40,000 – procurement of 50 coveralls for tank personnel
- 1972.36 – hotel for a wounded soldier at the Military Medical Academy
- 3,120 – procurement of computer equipment for the Volunteer Communist Detachment
- 8,400 – procurement of 3 Rakov’s machines (for loading cartridges into machine gun belts) and 1 “snail” case for the automatic grenade launcher
- 6,600 – procurement of 2 Gorka outfits
- 6,000 – transportation for the wounded soldier Stas from Oplot
- 2,000 – procurement of a 100-cartridge case for a PKM machine gun
- 35,449 – mobile communication
- 20,000 – cost of renting a Gazel minivan to Donetsk (Nikolay)
- 15,000 – for cargo delivery from Moscow (Stas)
- 175,200 – salary of our driver (Bars) from August to December
- 309,277.14 – transportation costs / train tickets (gasoline, toll roads, commercial parking lots, train tickets for volunteers, bus rent for the Volunteer Communist Detachment, etc.)
- 746 – printing of stickers of the Novorossiya Assistance Coordination Center
- 4,800 – manufacture of lapel pins with the Novorossiya Assistance Coordination Center logo

Cash balance:

1) 33,907 roubles.

2) 3,000 dollars
THANK YOU, FRIENDS!

Annex 628

Alexander Zhuchkovsky, On the Advisability of Purchasing Armored Vehicles, StrelkovInfo (4 September 2014)

This document has been translated from its original language into English, an official language of the Court, pursuant to Rules of the Court, Article 51.

Pursuant to Rules of the Court Article 51(3), Ukraine has translated only an extract of the original document constituting this Annex. In further compliance with this Rule, Ukraine has provided two certified copies of the full original-language document with its submission. The translated passages are highlighted in the original-language document. Ukraine has omitted from translation those portions of the document that are not materially relied upon in its Memorial, but stands ready to provide additional translations should the Court so require.
I would like to respond to several reports and commentaries regarding the advisability of our purchase of several units of armored equipment. The complaint is that public funds were spent in an unreasonable manner: there is already plenty of equipment, it would be better to spend on ammunition, communications equipment and other items.

The complaint and argument in the matter deserve a separate report.

Thanks to the organizational talent of my “partner in combat” Oleg Melnikov, we ordered and acquired in early August two BRDM-2s [amphibious armored patrol cars] for 3 million (plus 100,000 for shipping) and in mid-August one BTR-80 [armored carrier], also for 3 million (shipping was included). All the vehicles are “fresh” (from being mothballed) and with “accessories” (if you know what I mean), i.e. relative to the “market price” they were very inexpensive.

The two BRDMs were purchased at the request of a donor who contributed a large sum (80,000 euros, I mentioned this contribution in the previous report) for the relevant purposes. As for the militia’s abundance of equipment, at that point it had very little. The “Mainland” [Russian Federation] was not helping the DPR [Donetsk People’s Republic] with armored at the time, and whatever was “squeezed out” of the Ukrainians, that was caught in the initial encirclements, was often damaged and inoperable. In addition, it must be understood that we were proceeding
from the needs of our unit, which was not rich in equipment. Even now, when the militia has enriched itself with a substantial number of units of armored equipment, we cannot say that it is enough, many units are not fully supplied with it. As for our BRDMs, just while being transported from the Lugansk border (when serious fighting was taking place there before the entry of a humanitarian convoy from the RF) they served the LPR [Lugansk People’s Republic] border guards well.

The BTR-80 was also ordered long before the successful replacement of the militia’s “armored vehicle fleet.” But the issue is not just the shortage of armored vehicles at the time. As you noted, the BTR that was acquired bears the name “Traveling Companion and Pogrom.” The idea of giving such a name to one of the armored vehicles came up back in July during my correspondence with several readers of this website (probably the most powerful “news advocate” of Novorossiya [New Russia]), who proposed the idea of a “people’s tank” and made several large donations totaling about 2 million rubles. Unfortunately, it was not enough for a tank (one could be bought for 8 million), so we confined ourselves to the purchase of the BTR-80. The vehicle is already deployed and is operating in Snezhnoye.

Aleksandr Zhuchkovsky
Annex 629

Regular Dispatch Is Not Humanitarian Aid, Coordination Center for Assistance to New Russia (19 November 2014)

This document has been translated from its original language into English, an official language of the Court, pursuant to Rules of the Court, Article 51.

Pursuant to Rules of the Court Article 51(3), Ukraine has translated only an extract of the original document constituting this Annex. In further compliance with this Rule, Ukraine has provided two certified copies of the full original-language document with its submission. The translated passages are highlighted in the original-language document. Ukraine has omitted from translation those portions of the document that are not materially relied upon in its Memorial, but stands ready to provide additional translations should the Court so require.
More shipments of non-humanitarian aid.

Or, to be more exact, more shipments of non-humanitarian aid. A car packed full with all kinds of useful items for the militia left for the frontline today. This shipment is special in that traditional deliveries from the Novorossiya Assistance Coordination Center to soldiers were accompanied by humanitarian aid collected by the St. Petersburg-based members of the Communist Party. Although it was an elongated version of the Gazel minivan, we had to use every available helping hand to pack it tight. The box simply would not fit. We ended up loading some of them into the driver’s cab. This shipment is only the first portion of the delivery. The next minivan is leaving for the frontline tomorrow.

The Novorossiya Assistance Coordination Center would like to thank ALL those who helped us collect donations for aid to the militia: volunteers, St. Petersburg-based members of the Communist, and the Partisan Course. Friends, we merely assemble and send off the shipment. You, on the other hand, do all those things that are vital for the militias of Novorossiya. Thank you.

(You might want to check out the photos and videos of the minivan loading process.)

Report of the CCNR on the Results of 2014, Coordination Center for New Russia (12 January 2015)

This document has been translated from its original language into English, an official language of the Court, pursuant to Rules of the Court, Article 51.

Pursuant to Rules of the Court Article 51(3), Ukraine has translated only an extract of the original document constituting this Annex. In further compliance with this Rule, Ukraine has provided two certified copies of the full original-language document with its submission. The translated passages are highlighted in the original-language document. Ukraine has omitted from translation those portions of the document that are not materially relied upon in its Memorial, but stands ready to provide additional translations should the Court so require.
Reports on previous shipments

I’ve had a bit of spare time to upload photos of our previous deliveries. One of them was a shipment for the State Security Committee (KGB) of the Luhansk People’s Republic (LNR) and Leshyi’s platoon based on Luhansk. Since the city has no electricity or water supply, to say nothing of the Internet, we received the photos only recently when our KGB contact managed to go out of town where communication is still available. The photo quality reflects the conditions under which the photos were taken. :-)

Personal weapon of Yura at KGB: “Black Mamba” – just as deadly as the snake after which it was named.
Guys at KGB also prepared several gifts for the junta punitive squads and hope to serve them in person in the near future:
The Statement on bus shelling near Volnovakha

13 January 2015

The Donetsk People`s Republic completely denies its involvement in the killing of 10 and wounding of 13 passengers of the bus hit by the shelling on the 13th of January near Volnovakha.

First published photos of the shelled bus cast doubt on the official version of the Ukrainian side about shelling carried out by the DPR military forces.

The tragedy took place near Volnovakha. These areas are out of reach of weapons and MLRS of the DPR army.

We strongly believe that the most probable explanation of happened tragedy is the shelling of the bus by the military forces of Ukraine and the representatives of the nationalistic paramilitary formations.

The Ministry of Foreign Affairs of the Donetsk People`s Republic demands independent investigation of this tragedy.

Annex 635

Social Media Page (VKontakte) of Oleksandr Zhukovsky (post of 15 March 2015)
We’ve had a very productive three days with Goodwin in Moscow. We met with and resolved work-related issues with the best friends of Novorossiya in the capital city: Strelkov, Kholmogorov, Prosvirin, Krylov, Svyatenkov, Shalimova, and Chudinova.

We collected 225,000 roubles in donations for the Novorossiya militia, for which we thank the readers of Sputnik i Pogrom (who donated 120,000) and our constant donors Dmitry (100,000) and Irina (5,000). These funds will go toward buying fuel vital to the most critical areas of the frontline.

People can’t seem to get over Boroday. They have been mocking the photo I have taken with him. Some people rushed to Strelkov to tell on me: supposedly I’ve been gallivanting between restaurants with his sworn enemy. Igor Strelkov and I had a hearty laugh about it the following day.

As for Boroday, I received answers to my questions regarding Slovyansk and Donetsk in the SiP club. At the restaurant, Boroday said “we still have to work together” in an attempt at making peace. As he was discussing Strelkov, I detected some inner distress and nervousness in him. I believe that somewhere down deep he recognizes the abnormal nature of this whole story and regrets having lost Igor as a friend. When I suggested going to Strelkov with a bottle of cognac and good intentions, Boroday rejected this as meaningless (“too much has been said”).

I have already left for Rostov. We are having a good time with “Malyi” (commander of the Semenovka Battalion, who is receiving a bit of treatment here). It will probably be long before I will have a chance at leisure again. It’s time to return. Lots of work waiting outside of Mariupol.

Ministry of Foreign Affairs of the Donetsk People's Republic, Press Conference with Aleksandr Kofman and Sergei Mironov in Donetsk (28 December 2015)

This document has been translated from its original language into English, an official language of the Court, pursuant to Rules of the Court, Article 51.

Pursuant to Rules of the Court Article 51(3), Ukraine has translated only an extract of the original document constituting this Annex. In further compliance with this Rule, Ukraine has provided two certified copies of the full original-language document with its submission. The translated passages are highlighted in the original-language document. Ukraine has omitted from translation those portions of the document that are not materially relied upon in its Memorial, but stands ready to provide additional translations should the Court so require.
Press conference with Aleksandr Kofman and Sergei Mironov in Donetsk

28 December 2015

Today, December 28, 2015 a press conference took place with the DPR Foreign Minister Aleksandr Kofman and Russian State Duma member, leader of party «Just Russia» Sergei Mironov.

Aleksandr Kofman while opening press conference thanked guest for the help and support which Sergei Mironov and his party provide to Donbass people. According to him, support of fraternal Russian nation is of great importance for the DPR citizens.

Sergei Mironov in his turn stressed that today Donbass people stand for the right to live on their native land by their own laws, speak native language, bring into effect right on freedom, their original cultural and moral values. Russian people entirely support DPR and LPR people in this struggle. He also added that Donetsk and Luhansk People’s Republics have special mission – new Donbass states become front line in struggle for rights of the whole Russian world. That is why in this struggle Russia is on their side.

According to Sergei Mironov, Donetsk People’s Republic sooner or later would become a sovereign and independent state that is why today it’s very important to elaborate law making base. «Just Russia» party is ready to provide overall assistance in elaboration of law projects and regulations, organization of DPR Parliament relevant committees’ activities.

At the end of a press conference Sergei Mironov congratulated all Donbass citizens on coming holidays and wished soonest absolute victory.

This document has been translated from its original language into English, an official language of the Court, pursuant to Rules of the Court, Article 51.

Pursuant to Rules of the Court Article 51(3), Ukraine has translated only an extract of the original document constituting this Annex. In further compliance with this Rule, Ukraine has provided two certified copies of the full original-language document with its submission. The translated passages are highlighted in the original-language document. Ukraine has omitted from translation those portions of the document that are not materially relied upon in its Memorial, but stands ready to provide additional translations should the Court so require.
Dear friends, this month our needs at the frontline and expenses have increased by an order of magnitude, which is why in early February I published an appeal calling for donations of funds and items.

Despite the fact that the heavy trench war in Donbass is taking a very long time. Despite the fact that people are tired of the war. Despite the falling incomes of Russian citizens due to the economic crisis. Despite everything else: people continue to support us.

Everything we requested in the appeal for donations have been procured, and then some more. Thanks to you, our soldiers now have all the essentials needed for continued service on the frontlines.

Between January 21 and February 23 (the report up to January 21 is available here: http://strelkov-info.ru/reports/p1675) we collected **857,000 roubles in donations** (+ the balance of 10,000 roubles from the previous donation campaigns). We used these funds to buy food rations, gear, equipment, medications, etc. for our units. **Purchases are shown in photos 2-9.**

Also, during this period, we have received a large amount of items for the militia and point-of-need packages – food, medications, tobacco, chainsaws, gear, equipment, etc. for our units. **Photos of shipments – 1 and 10-13.**

All of the items purchased or received have already been shipped to the DNR and delivered to their intended recipients. Of the items needed at the present time, we could not buy only additional batteries for drones (we order them from China).

***

**List of items purchased:**

— 500 dry food rations – 125,000.
— 120 pots (36,000) and 120 flasks (36,000) – 72,000.
— 120 sleeping pads (60,000) and 120 sitting pads (24,000) – 84,000.
— 100 sets of thermal underwear – 120,000.
— 50 winter sleeping bags – 75,000.
— 35 pairs of rubber boots – 14,000.
— 20 camouflage nets – 20,000.
— 20 boxes for AGS-17 shots with tapes (30,000) and 4 ammo boxes for PKT, PKM, and NSV (4,000) – 34,000.
— 35 magazines for AK rifles (7,000), 20 – for SVD rifles (4,000), 5 – for PM pistols (1,000), and 2 – for Stechkin automatic pistols (700) – 12,700.
— 70 cleaning panels for AK rifles (3,500) and 70 grease dispensers (3,500) – 7,000.

— From Konstantin Neverov (Moscow) (Photo 12): Stihl chainsaw with oil and spare parts, sleeping bags, sitting pads, shaving foam, tents, food, medications, etc.
— From Alexander Shveytsar and Denis Yasenev (Photo 13): binoculars, flasks, torchlights, fleece sweatshirts, raincoats, thermal socks, etc.
— From Victoria (Rostov): 10 blood glucose meters, food, clothing, and mattresses;
— Food from Alexander Zharov, singlets from Tatyana (Izhevsk), medications from Konstantin (Moscow).

We apologize if some of the donors could not find themselves on this list.

Due to the large amount of donations, we may have inadvertently omitted the names of some donors. You may send us a complaint at juchkovsky@gmail.com
Thank you all who sent and collected donations for the militia and their families. Special thanks go to Svetlana (Moscow) and Irina Vasilkova for their organizational assistance as well as Anna Abakumova, Alina Potapova, Ekaterina Volokhova, Ekaterina Trunina, Valentina Vecherko, and Yuri Starshinin.

***

We thank all sympathetic people in Russia and overseas who continue to financially support the people’s militia of Donbass:

Special thanks go to Sergey, who donated 250,000 roubles in Moscow, and Vladimir Alexandrovich S. who sent us 100,000 roubles.

We thank all people and news agencies that publish our reports and details. We would like to thank the “Sputnik and Pogrom” website for assistance with collecting the donations. Our heartfelt thanks go to our main “informational sponsor” – the VKONTAKTE page of the Situation Reports from the Militia of Novorossiya (vk.com/strelkov_info).

***

During the war in Donbass, we made 30 major deliveries of uniforms, gear, equipment, and other items worth 127 million roubles.

Detailed information about our work and all reports for previous months are available here: strelov-info.ru/go/reports.

Address your questions about aid to Donbass, reports, and other issues to juchkovsky@gmail.com.
Annex 649

This document has been translated from its original language into English, an official language of the Court, pursuant to Rules of the Court, Article 51.

Pursuant to Rules of the Court Article 51(3), Ukraine has translated only an extract of the original document constituting this Annex. In further compliance with this Rule, Ukraine has provided two certified copies of the full original-language document with its submission. The translated passages are highlighted in the original-language document. Ukraine has omitted from translation those portions of the document that are not materially relied upon in its Memorial, but stands ready to provide additional translations should the Court so require.
Owing to ongoing support from sympathetic people in Russia and overseas, we continue our efforts in the following areas:

— Procurement of gear and equipment for the people’s militia of Donbass.
— Operation of drones (aerial reconnaissance, drone manufacture and repairs).
— Treatment and rehabilitation of wounded soldiers.
— Collection of items for the militia (gear, medication, food, etc.) and delivery from Russia to Donetsk.

In March - early April, we received shipments from Rostov, Krasnodar, St. Petersburg, and Moscow intended for our offices and healthcare institutions in the Donetsk People’s Republic (photos 5-9, report on shipments received below).

Donations for the current period amount to **374,000 roubles** (+ a balance of 25,000 roubles from previous donation campaigns) This money was spent on (photos 1-5):

— 150 pots and 150 flasks – 75,000.
— Pixel uniform (VKBO) – 25 sets – 50,000.
— Gorka uniform – 20 sets – 24,000.
— Softshell uniform – 3 sets 7500.
— 100 sleeping pads – 45,000.
— 16 tactical vests – 40,000.
— 10 pairs of military boots – 18,000.
— 6 backpacks – 10,800.
— 5 radios – 10,500.
— 6B23 bullet-proof vest – 4,000
— 4 magazines for AK assault rifle (1,000) and 3 magazines for Makarov pistol (750) – 1,750.
— Handle for AK assault rifle (2,000) and Makarov pistol (1,600) – 3,600.
— Expenses for treatment of soldiers and medication – 28,000.
— Transportation costs – 16,000.
— Miscellaneous costs in the current period (fuel and lubricants, telephony, etc.) – 20,000.

Kharkiv
Official Site of Kharkov City Council, mayor, executive committee

The city of Kharkov is a center of historical and geographical area of Ukraine which has a settled name “Slobozjanshchina”.

The area of modern Kharkov is more than 300 sq. km and its population is 1 mln 450 thousand people. The territory of the city is a hilly flatland with valleys, ravines, etc. The climate is moderately continental: annual average air temperature is +6,9°, the coldest month in a year is January (-6,1°), the warmest month is July (+20,5°).

People had started to settle at the territory of modern Kharkov in ancient times. Archaeological excavations testify that different peoples lived there: Scythian and Sarmatian, Chernyakhovsky tribes, cumin people. It is also known that in the second half of the 1st th. B.C. the territory was settled by the eastern Slavic tribe of the Severians. In the VIII century the Slavs founded their settlement on the place of future Kharkiv, which was known as Donets town in the X century. Donets was not only a fortress, but a center of crafts (blacksmith’s, jewel, ceramic etc.), an important center of transit trade. The first mention about Donets in the chronicles belongs to 1185. The episode of “The Lay of Igor’s Warfare” which is the most important writing of Kievan Rus is also connected to this town. A hero of the poem Novgorod-Seversky kniaz Igor Svyatoslavovych stayed there after his capture. Donets town was destroyed by khan Baty in the middle of the XIII century. There are several versions of the appearance of the name of the city as “Kharkov”. Some of historians think that Kharkov is a transformed name from Sharukhan, the cumin capital which was located on these lands, the others connect it with the name of the leader of Ukrainian settlers Kharko (Chariton) in the middle of the XVII century. Most of the specialists consider that the city got its name from the river Kharkiv. For the first time this name was mentioned in “The Book of Great Schedule” which was composed in 1627. The name of the river is still a hydronymic enigma.

The founders of the city were the Ukrainian Kazaks and peasants who ran away from the national, religious and social pressure of the Pole landlords of the Dnieper and Western Ukraine, especially in the period of emancipative fight of Ukrainian people headed by B. Khmelnitskyi.
Ukrainian settlers started to inhabit unsettled territories which in the beginning of the XVI century were formally included into the body of Moscow state. The land was called “the Wild Field” as it was devastated after the Mongol and Tatar raids.

The Russian settlers appeared here in the same time as the Ukrainians. In the result of interaction of two migration streams: a big one from the West, which was Ukrainian, and the smaller one from the North, which was Russian, the Slobozjanian subculture was formed. In the XVII-XVIII centuries Slobozjanshchina turned into a special historical and cultural region of Ukraine with a distinctive hue of material and spiritual culture.

The first Kharkov fortress was built according to “Cherkassky (which means Ukrainian) way”. In 1656 the Moscow tsar Aleksey Mikhaylovich issued a decree about creating a separate Kharkov voivodeship. The fortress, which appeared on the place where two rivers the Lopan and the Kharkov merged together, had 10 towers and the length more than a kilometer. The oldest document where Kharkov was mentioned is the tsar decree about constructing of Kharkov fortifications to a Chuguyev vaivode Sukhotin. The decree was issued on the 28th of March 1656. According to the letter of the first Kharkov vaivode Selifontov of 1657 and name register of 1658 Kharkov was rather a big settlement. There were 578 men in the register and it is possible to suppose that there were no less than 200 houses in the town.

Kharkov became the center of Kharkov Kazak regiment. The Ukrainian settlers brought a typical for them Kazak war and administrative order. The craft people started to settled around the fortress from the very first years of its existence. The first slobodas (suburbs) such as Goncharovka, Zjuravlevka etc. appeared. This fact testified that Kharkov turned from an important border outpost to a center of crafts and trade.

To the beginning of the XIX century Podol – the district between the fortress and the river Kharkov – was settled, and in the 30-40s of the century, when the threat of Crimea and Nogay Tatars raids passed away, the settling stepped over the rivers Lopan and Kharkov. There were 1000 housings and a range of social buildings of different kinds in the town. Four of six the biggest fairs of Slobozjanshchina – Uspensky, Kchreshchensky, Troitsky and Pokrovsky – were held in Kharkov.

There were changes in the social life of the city. In 1765 the regiment administrative order was liquidated. The Slobodsko-Ukrainian governorate was created instead of sloboda regiments.
For a very long time Kharkov belonged to Bielgorod eparchy. In 1799 the Slobodsko-Ukrainian eparchy with its center in Kharkov was created. Uspensky church is among the first churches which were built in the city. The erection of it started in 1658. The modern sanctuary was built in the 70-es of the XVIII century. In 1726 Pokrovsky abbey was founded on the territory of Kharkov fortress. The abbey sanctuary is the oldest in Kharkov.

Kharkov becomes the governorate city. The city council was created (1785). Since 1734 the post service had started to work, in 1739 the first doctor appeared, in 1778 the first drug-store started to work. All these changed the living of kharkovites in a way, but during the whole century their main occupation was agriculture (to 70% of population). The titles of streets and lanes which appeared in that time testify of development of crafts and trades. They are: Chebotarskaya, Rymarskaya, Shlyapnyi, Stoliarnyi, Slesarnyi.

In the XVIII century Kharkov became an educational center.

The Kharkov Collegium (the Slavic and Latin school which was transferred in 1726 from Bielgorod got this title in 1731) became the second in importance in Ukraine after Kyiv-Mohyla Academy. A complete course of science was taught there. The Collegium library became the first in the city and in 1840 there were 5 thousand books in the library.

In the beginning of the XIX century Kharkov was developing not only as a trade center but as an industrial one. There had been more than 70 enterprises: mills, fat-melting plants, alcohol distilling plants, tan-yards in the city by 1897. Till the middle of the XIX century the city industry had a handicraft character mostly, and the main economics brunch was trade and agricultural products processing. Since the second part of the XIX century, because of serfage liquidation and the fast development of of Donets and Kryvoy Rog region, the city becomes the largest economical center of Russian Empire. In the middle of the century there were more than thirty thousand inhabitants in Kharkov. The development of railway transport became a factor which influenced the city development directly. In 1869 a railway trunk was opened, which connected the city with Moscow and than with Donbass, Kiev, ports of Black and Azov seas. A car-maintenance business was developing, in 1897 Kharkov railway engine building plant issued the its first production. Enterprises started to make the products of various kinds – from agricultural machines to engines. Therefore Kharkov became a supplier of agricultural mechanics to the empire market. The plant of Gelferih-Sade built in 1882 made the largest amount of production of this kind.
In 1828 they started to pave the city. In 1871 gas lighting appeared in the streets of Kharkov, in 1881 the first line of city plumberry was put into exploitation. In 1882 the first line of city horse railway was built, this railway existed till 1981. In the end of the XIX century the first power plant was built in the city and this enabled the development of city transport electrification. In 1905 the first electric tram appeared in the streets of the city. In 1988 Kharkov became the second electrified city of Ukraine.

In the second part of the XVIII century the Russian government tried to unify the system of education. In 1788-89 the main and the minor public schools appeared in Ukraine. In 1789 The Main Public School was opened in Kharkov and in 1805 it became the foundation of the new-created male grammar school.

New educational institutions appeared with the development of the city. By the beginning of the XX century there had been four male, two female grammar schools, two non-classical secondary schools, a seminary, several private grammar schools and boarding schools, the School for Noble Maidens, Commercial School, five higher primary schools (111 primary schools in 1902).

A lot of events in cultural and scientific life of Kharkov in the XIX century happened for the first time not in the city only, but in Ukraine. The first provincial museum in Russia was opened in Kharkov in 1886. It was the City Art and Industrial Museum. The opening of one of the oldest in the country and the first in Ukraine Kharkov university on the 17th (29th) of January of 1805 had a huge meaning. V.N.Karazin became the founder of the university. The university is a cultural and scientific center; it is famous by its scientists, graduates and teachers: N.N.Beketov, V.Y.Danilevskiy, H.F.Sumtsov, D.I.Bagaley, and many other coryphées. For the first time in the Russian Empire the grade of Doctor of History was given to a woman Yefimenko A.Y. in 1910. In 1873 the Veterinary Institute was opened in Kharkov. The Institute of agriculture and forestry was evacuated to Kharkov from Novaya Aleksahdria.
Therefore by the beginning of the XX century Kharkov had become an industrial, scientific and cultural center with a huge potential. The new age put unexpected corrections into development of the city. A lot of important events in Ukrainian history are connected to Kharkov. On the 29th of January (according to the old dating) of 1900 the first political party in the Dnieper Ukraine was created there. It was the Revolutionary Ukrainian Party (RUP). On the 12th of December of 1917 the Soviet power was declared. The boisterous flowing of economical processes conditioned the sharpening of social contradictions. In the 70-es – 80-es of the XIX century Kharkov became a center of populist movement. Spontaneous actions of workers occurred. During the Civil War Kharkov survived a red bolsheviks’ terror, Denickin’s army revelry, intervention aftermaths and nationalization.

In the beginning of the 20-es there starts a period of wide transformations in different branches of social life. Considerable changes were made in the administrative and territorial order of the city. On the 26th of January of 1919 the city was divided into three districts – Ivanovo-Lysogorskiy, Petino-Zjuravlevskiy and Oshovyansko-Kholodnogorskiy. The executive committees concentrated the management of all the sides of social life in their hands. The names and the number of districts were changed often. There were eight of them by 1938 and they corresponded to the modern division mainly. In 1919 Kharkiv appropriated the state of capital officially.

By the end of 1925 the industrial enterprises were rebuilt and reconstructed, new plants and fabrics appeared. In 1940 the industry of the city was 12 times bigger than in 1913.

In 1924 the first radio station in Ukraine began its work. The new settlements of workers appeared. They were: the one named by Artem, the one named by Kirov, the settlement of tractor builders, the Red October. The district heating supply of the city was started. In 1939 the first trolleybus line appeared. In the 20-30-es a wide net of seven years schools appeared, the struggle with ignorance was started. A period of activity of an outstanding pedagogue A.S. Makarenko is connected to Kharkov. New forms of out-class work came into life, and in 1935 the first Palace of Pioneers in Ukraine was opened in Kharkov. Considerable changes were made in the higher education system. Since 1921 there appeared the Medical Institute, the Institute of Public Maintenance, and the Law Institute in 1937 appeared after reorganization of the university. In 1930-31 there were organized 23 new higher educational institutions.
In 1920-30 there was started an activity of many new scientific organizations and institutes of the city such as the Ukrainian Profondometer Academy, the Institute of Hematology and Blood Transfusion, Charred Cole Building, the Ukrainian physical and technical institute etc. The science societies held a scientific work, regional ethnography was developing.

In the first half of the XX century the city was changed greatly because of the monuments appearance (in 1935 the best in the world monument to T.G.Shevchenko by M.G.Manizer was opened) and because of works of “The Kharkov Rossie” Beketov, architects Veryovkin, Zjukov etc. In 1925 Gosprom was built in constructivism style.

The cultural life of the city was full of events. The State Drama Theatre “Bereził” headed by Les Kurbas moved from Kiev to Kharkov in 1926, in 1929 the Ukrainian Theatre of Musical Comedy issued the first performances. In 1932 the Kharkov organization of the Union of Composers of Ukraine was organized, in 1934 – of the Union of Writers of Ukraine.

The city had incredible losses in the years of mass repressions of Stalin regime and in the years of Great Patriotic war. It became a subject of a special interest of Hitler Germany and as a result both sides fought cruelly for possessing it. The city went from one hands to others twice, it survived the occupation, hunger and ruining. By the moment of deliverance of the city 200 thousand square meters of living areas had been ruined, all the housing maintenance had been put out of work, a considerable amount of material assets of Kharkov enterprises had been also ruined in spite of evacuation. By the 23rd of August – the day of deliverance of the city – there had been no working enterprises in the city.

During the occupation thousands of kharkovites were murdered just because of their race, nation or belonging to the party, a lot of people were overtaken to Germany.

But even in these inhuman conditions people of the city tried to save and keep the cultural values.

There were killed and tortured more than 256 thousand of civilians and 164 thousand were overtaken during 21 months of occupation. There were 200 people left from 900 thousand of population before the war. The material damage of Kharkov region maintenance, organizations, cultural institutions and civilians was 33,5 milliards rubles altogether.

A lot of the streets of the city are named by the defenders and deliverers of Kharkov: platoon of lieutenant P.N.Shyronin, O.Yarosh and others.

Self-sacrificing work on the city rebuilding had been started right after the deliverance of Kharkov. But only by the beginning of the 50-es the level of production which had been observed before the war had been gained. The production itself became more and more perfect. There were new plants and factories opened: “Electrotyajmash”, “The Plant of Road Machines@ etc. By now there are more than 250 big enterprises in
the city. According to this data Kharkov is considered to be a leading industrial center of Ukraine. In the middle of the 50-es Kharkov television started its work. In 1962 the population of the city approached 1 million mark and Kharkov became the second after Kiev city with a million population in Ukraine.

In the 50-80-es the building of the whole massives of the city was begun: Pavlovo Polie, Alekseevka, Saltovka.

In 1975 the first line of Kharkov metropolitan was opened and there are three of them working now.

Though the 70-es – the first half of the 80-es are considered as a period of stagnation in the history of the country, the city succeeded in many ways in science, culture and maintenance development.

In 1985 the period of reforms – “perestroika” – was started. Declaration of Independence of Ukraine in 1991 became the culmination of democratic society processes. It allowed the new state to create the future by itself. The life of the city became a reflection of the new processes in the society. For example, because of the new Constitution issued by Verkhovna Rada the Soviet Ukraine square became the Constitution square. The city was grasped by the wave of privatization. In a result of it plenty of private enterprises, schools etc. appeared on the map of the city. The cultural life became verified. But the enterprises and organizations created after the ware are the base of it.

In 40-50-es there were created the Ukrainian SRI of selection and genetics, SRI of organization and mechanization of mine building. In 60-70-es there were opened the Institute of Public Food Industry, Institute of Cryobiology and Cryomedicine problems, North East Center of Academy of Science of Ukraine etc. And now the city is proud of its scientists. They are academicians L.T.Malaya, A.V.Pogorelov and others.

The biographies of more than 100 academicians and corresponding members of the National Academy of Science of Ukraine are connected to the Kharkov State (now National) university. Technical and military higher educational institutes made their contribution into development of techniques and science. People living in Kharkov have a possibility to visit numerous theatres, the circus (in 1974 it received a new building for 2300 visitors), the planetarium (opened in 1957) There are numerous festivals and conquests held in the city. In 1992 According to the conclusion of UNESCO the 70th anniversary of “Berezil” theatre and in 1993 there was held an international festival “Berezil-93”.

During the last years there were held the festivals “Ukrainian toloka”, festicals devoted to the memory of K.I.Shulzjenko, to the memory of the pianist V.Kraynev and others.
The history of the city of Kharkov consists of three and a half centuries of beautiful and tragic events. The city was accepted to the League of historical cities. Its development was and is and will be one of the main moments in the life of the whole state of independent Ukraine.

HUMANITARIAN AID FOR NOVOROSSIIYA
Today Donbass is one of the biggest flash points on our planet with a running death toll of 50,000 people, including 1,000 children. It is our sacred duty to help civilians survive this bloodbath. Today the honorable mission of collecting donations for Donbass and providing aid to Novorossiya rests on the shoulders of rank-and-file citizens and such public service institutions as our Novorossiya Assistance Foundation.
Our main goal is to provide as much assistance to Donbass as possible and deliver exclusively point-of-need humanitarian aid, while bypassing intermediaries and all sorts of political impostors. We guarantee: everything purchased with your funds and collected at humanitarian aid drop-off points will be delivered strictly into the hands of those who really need this aid.

The "shopping list" is prepared and items procured for humanitarian aid purposes strictly according to requests from public service institutions and specifics individuals in need. This means that people receive exactly what they need at the given time.

For our part, we ensure maximum transparency of the donation collection and spending process. The donation counter on the website is reset once every 24 hours. Detailed financial reports are published on a monthly basis complete with all account statements, photos, and videos proving the purchases.

The Novorossiya and Donbass Assistance Foundation launches various promos and activities to increase the flow of donations and raise public awareness about the war in Novorossiya.

Do not remain indifferent. Help Novorossiya any way you can right now.

Head of Novorossiya Assistance Foundation
Gleb Kornilov

HUMANITARIAN AID DROP-OFF POINTS

Central Warehouse
28 Akademika Kapitsy Street, bldg. 1, Moscow (Konkovo Metro) Daily from 11 a.m. to 11 p.m.
Be sure to warn us about your arrival by calling us at 8 (968) 792-03-00

Extract of Smerch Firing Table, Ministry of Defense of Ukraine (March 2018)

This document has been translated from its original language into English, an official language of the Court, pursuant to Rules of the Court, Article 51.

Pursuant to Rules of the Court Article 51(3), Ukraine has translated only an extract of the original document constituting this Annex. In further compliance with this Rule, Ukraine has provided two certified copies of the full original-language document with its submission. The translated passages are highlighted in the original-language document. Ukraine has omitted from translation those portions of the document that are not materially relied upon in its Memorial, but stands ready to provide additional translations should the Court so require.
Re: No. 72/17-194/510-559 of March 5, 2018

Dear Olena Dmytrivna [Ms. Zerkal],

The Command of the Infantry of the Armed Forces of Ukraine has processed your letter requesting information regarding specific questions exploring the particulars of the shelling of the town of Mariupol on January 25, 2015.

Please be informed about the findings as follows.

**Regarding the 9N235 fragmentation payload**

The 9N235 payload is designed to kill personnel and vehicles without armor (or with light armor). The payload has an overall weight of 1.75 kg, including 0.32 kg of an explosive material. On average, the exploding payload creates 96 fragments weighing 4.5 g each, and 360 fragments weighing 0.75 g each.

The approximate radius of the reduced kill zone is 10-20 m (the kill zone area is 300-1,100 m²). Fragments weighing 4.5 g pierce 5-7 mm armor from up to 10 m away, and 1-3 mm armor from up to 100 m away.

Regulatory documentation does not specify the values of nominal dimensions of the shell hole created by an explosion of the payload. Approximate estimated values of shell hole dimensions are as follows: diameter – up to 15-20 cm, depth – up to 3-5 cm.

**Regarding high-explosive fragmentation projectiles for BM-21**

The BM-21 multiple rocket launcher uses a series of rocket-propelled missiles of various types. 9M22U is the primary type of high-explosive fragmentation projectiles.

The projectile has an overall weight of 66.6 kg, including 6.4 kg of an explosive material. On average, the exploding projectile creates 1,640 fragments weighing 2.4 g each (with specific fragmentation) and 2,280 fragments of varying weight (with random fragmentation, including fragments of the projectile shell).

Regulatory documentation does not specify the values of nominal dimensions of the shell hole created by an explosion of the projectile. The dimensions depend on many factors such as the angle of incidence, type of the detonator setting (fragmentation or high-explosive action), the type of soil, etc. The approximate estimated values of the dimensions of the shell hole created by an explosion (with the detonator set to high-explosive action) in dry, medium-density soil are as follows: diameter – up to 2.0-2.5 m, depth – up to 1 m. When the detonator is set to fragmentation action, the shell hole dimensions are much smaller: diameter – up to 1.5 m, depth – up to 0.3-0.4 m.
Regarding the firing tables

We enclose an excerpt from the firing table of the Smerch multiple rocket launcher with 9M55K projectiles. The BM-21 firing tables were provided to Ukrainian Foreign Ministry representative K.A. Hipenko during a working meeting.

Attachment: above-mentioned information on 1 page, for the specified recipient only.

Best regards,

Colonel General

[V.V. Petushkov, 271-10-53]

**Designations:**
- R - range (m)
- S - sighting (milliradian)
- T₀ - flight time until the cassette head element opening point (s)
- NΦ - functional setting (imp)
- NK₁ - functional coefficient No. 1 (imp)
- NK₂ - functional coefficient No. 2 (imp)
- ΔNΦₜ - coefficient for calculation of test error (imp)
- Br - characteristics of the density of hits relative to range (m)
- Bb - characteristics of the density of hits relative to bearing (m)
- Yₐ - height of the active segment of the trajectory (m)
- Yₛ - height of the trajectory (m)
- Yₚ - height at which the cassette head element opens (m)
- Vₚ - velocity of the speed vector at the point of opening (m/s)
- θₚ - angle of inclination of the speed vector at the point of opening
- Δtₑ - payload elements flight time (s)
- ΔXₑ - payload elements flight range (m)
Annex 657

Mariupol City Council, Population (6 March 2018)

This document has been translated from its original language into English, an official language of the Court, pursuant to Rules of the Court, Article 51.

Pursuant to Rules of the Court Article 51(3), Ukraine has translated only an extract of the original document constituting this Annex. In further compliance with this Rule, Ukraine has provided two certified copies of the full original-language document with its submission. The translated passages are highlighted in the original-language document. Ukraine has omitted from translation those portions of the document that are not materially relied upon in its Memorial, but stands ready to provide additional translations should the Court so require.
Demographic Situation

According to investigative information, on the 1st of March 2010 the population decreased on 556 people and is 490739 people. The main reason of the decrease of population remains its natural decrease, that is partially compensated by positive migration nett. There is a positive migration nett in the city – 27 people, in comparison with the similar period last year it decreased on 80%. At the period under consideration 346 people arrived in the city, 319 people left it.

The number of people in Mariupol comprises 11,0% of the population in the region.

23rd Humanitarian Mission of ROD will deliver medications to the frontline village of Golubovskoe
Published: February 9, 2018 / author: Melissa
This time our humanitarian mission is heading to the village of Golubovskoe (LNR).
Golubovskoe is located near the frontline, between Kirovsk and the village of Donetsk. It is a peasant village where people “live off the land”, which is why...
We protect Russians!

On May 2, dozens of people died in a burning building in the Trade Unions House in Odesa to the sounds of laughter and joyous yelps of Ukrainian nationalists. In the wake of this tragedy, the Russian Public Movement launched the project “Help Russians” to help the families of those killed and other victims. Get to know us.

Aid to families with many children
About the Humanitarian Battalion Foundation Novorossiya

The Novorossiya Humanitarian Battalion was created by Ekaterina Gubareva on May 20, 2014 to support civilians in the DNR and LNR republics. Many Russians and public service institutions have responded to our appeal about the predicaments faced by residents of the young republics. On April 1, Ekaterina Gubareva’s foundation formed on the basis of the Novorossiya Humanitarian Battalion began its operations. We are certain that from now on we will be able to offer even more aid and support to suffering civilians in the Donetsk and Luhansk republics.

Peaceful civilians of Donbass have found themselves at the heart of a humanitarian catastrophe. The shortage of even the most basic things can fill even a strong and healthy person with despair, to say nothing of retirees and handicapped persons, families with many children or single mothers, or people whose homes were damaged by artillery fire. Many of them simply don’t know how they will live to see another day. The future outlook downright scares them. Little residents of the young republics deserve a special mention. Their lives have barely begun but they have had their carefree childhoods taken away from them. The vagaries of war force the little ones to look at life and the reality from the perspective of adults. Let us help bring smiles back to their faces and make their hearts carefree!

Since the war broke out, our foundation has been making every effort to help the underprivileged citizens of Novorossiya. Thanks to your support we have been able to make their lives at least slightly easier.
Humanitarian aid sent by Russians and public service institutions through us is fully delivered to those in need. If the package names a specific recipient, this particular recipient will get the package. Funds donated to our accounts help us buy the most essential items for the underprivileged population and provide point-of-need aid to people. All of this can be fully traced through our photo and video reports. The Novorossiya Humanitarian Battalion charitable foundation regularly launches special projects aimed at providing point-of-need aid. Over 1,500 tonnes of humanitarian aid was transported to the DNR and LNR republics since Ekaterina Gubareva’s Novorossiya Humanitarian Battalion was first launched. This is your support and contribution to the rebuilding of Donbass. We are proud to have the opportunity to act as harbingers of all things good!

Help us any way you can! **Do not remain indifferent to the predicament of the residents of Novorossiya!** Add your own drop to the common torrent of support and spiritual warmth!

**We thank all of you who responded to our appeal! May your souls never harden!**

Situation Report from the Militia of Novorossiya

Russian Spring 2.0 is coming! The spirit of Spring 2014 lives on here! Novorossiya forever! We stood strong and still stand strong. With God's help we will stand our ground and WIN!

March 21, 2018. Alexander Zhuchkovskiy’s report on procurement for the militia of Novorossiya

Thanks to ongoing support from sympathetic people in Russia and overseas, we continue buying uniforms, gear, and equipment for the people’s militia of Donbass.

The Ukrainian MTS cellular service was discontinued in the territory of the Donetsk People’s Republic in January. The republican cellular service provider Phoenix has been struggling with major service disruptions. That’s why we have spent a third of donations collected in February on communication equipment for two units.

See About Us, Sberbank (last visited 25 April 2018)
About Us

Sberbank today is the largest bank in Russia and a major international corporation. It is Russia’s most valuable brand and one of the world’s top 25 brands.

Sberbank has 12 Regional Banks that are responsible for the operations of more than 14,000 branches in 83 of Russia’s regions. The bank’s international network is made up of subsidiaries, branches and representative offices in 20 countries, including Russia, Turkey, the UK, US, CIS, and Central and Eastern Europe.

Sberbank is one of the five largest employers in Russia and serves as the source of income for every 150th Russian family.

As of Q1 2018, Sberbank has a 29.3% share of the aggregate Russian banking sector assets. As the holder of 45.8% of the country’s retail deposits, the bank acts as the key lender to the Russian economy and private clients. Sberbank has provided 40.9% of consumer loans and 32.4% of corporate loans. A joint venture bank created by Sberbank and BNP Paribas offers POS lending under the Cetelem brand.

Sberbank has more than 86 mln active retail clients and more than 2 mln corporate clients (out of Russia’s 4.5 mln registered companies). More than 11 mln people use Sberbank’s services outside Russia.

Sberbank offers a broad selection of banking services for retail customers ranging from traditional deposits and various loan solutions to bank cards, money transfers, bank insurance and brokerage services.

True to its commitment to offer more convenient, modern and technologically advanced services, Sberbank is continuously improving its system of remote banking channels, including:

- Sberbank Online internet bank (more than 24.5 mln active users)
- Sberbank Online mobile application (more than 35.9 mln active users)
- Mobile Bank SMS service (more than 28.4 mln active users)
- One of the world’s largest networks of ATMs and self-service terminals (77,000 units)

Sberbank is the country’s largest issuer of credit and debit cards.

The bank services all categories of corporate clients, with a focus on small business. Clients can take advantage of rapid (three to five minute) intrabank settlements and access a wide range of additional services, from free of charge CRM and online accounting to a guaranteed settlement service. More than a million clients receive information-based support to address issues of compliance, international economic activity and much more.
The bank actively participates in the majority of SME support programmes carried out by government agencies – the Russian Ministry of Economic Development, Ministry of Agriculture, SME Corporation, etc. The bank has a share of more than 30% in the market of subsidised lending for SMEs (provision of subsidies, guarantees/sureties).

The Sberbank Business Online internet bank (winner of a Red Dot award) is used by more than a million companies that have over 3 mln active users. 99.6% of these companies’ transactions are performed electronically.

Sberbank is at the forefront of deploying digital technology. We are transforming our in-house technological platform and creating a major, industrial-scale IT system. The bank has nine innovative laboratories operating in key areas such as artificial intelligence and machine learning, virtual and augmented reality, blockchain, the Internet of Things, robotic technology, robotisation and gamification.

In 2017, Sberbank adopted its 2020 Strategy. The strategy is focused on reaching the next level in terms of competitiveness, which will enable us to compete with global technology companies while remaining the best bank for retail customers and businesses. Sberbank’s new strategy concentrates on three priorities:

- Best client experience and ecosystem, which includes creating the best financial products and services, developing modern and convenient channels, and building an ecosystem that satisfies the non-financial needs of Sberbank clients.
- Technological leadership, which includes guaranteeing that the bank is reliable and efficient, creating a new platform, ensuring that clients are secure, and positioning Sberbank as a company that is driven by data, algorithms and innovation.
- People with new skills in effective teams, which includes a new motivation and training system for Sberbank employees, a set of new skills and competencies for employees, a teams-instead-of-hierarchy approach to personnel management, and fine-tuning of HR processes.

Russian Wikipedia, 5th Anti-Aircraft Missile Brigade (6 June 2018)

This document has been translated from its original language into English, an official language
of the Court, pursuant to Rules of the Court, Article 51.

Pursuant to Rules of the Court Article 51(3), Ukraine has translated only an extract of the
original document constituting this Annex. In further compliance with this Rule, Ukraine has
provided two certified copies of the full original-language document with its submission. The
translated passages are highlighted in the original-language document. Ukraine has omitted
from translation those portions of the document that are not materially relied upon in its
Memorial, but stands ready to provide additional translations should the Court so require.
THE 5TH ANTI-AIRCRAFT MISSILE BRIGADE

From Wikipedia – the free encyclopedia

The 5th Anti-Aircraft Missile Brigade (5 zrbr) is an anti-aircraft missile brigade (three battalions) of the 6th Combined-Arms Army, forming part of the Western Military Region of the Armed Forces of the Russian Federation. The Brigade is stationed in Gorelovo village, Krasnoselsky Region and in Lomonosov, Petrodvorets District of St. Petersburg.

It was created during the period September 20–November 20, 1961 in the town of Uzhgorod (USSR), as the 919th independent anti-aircraft missile regiment, armed with the C-75 guided missile system. The unit celebrates its annual anniversary on December 5.

Between June 1962 and April 1965, the brigade was stationed in the town of Svalyava, in the Transcarpathia Region of the USSR, and formed part of the Subcarpathian military region.

In 1968, the brigade was made part of the Central Military Force, to enable it to participate in the Danube operation, designed to suppress the attempt to reform the political system of Czechoslovakia (the Prague Spring) and transferred to the village of Chervena-Voda.

In 1971, the brigade was re-equipped with the new Krug system, transformed into the 5th Anti-Aircraft Missile Brigade, and relocated to the village of Kuřivody nr Mimon, where it formed part of the 28th Army Corps of the Central Military Force.

In 1989, the brigade changed over to the Buk-M1 system, and in June 1990 it was relocated to the town of Shuya in Ivanovo Region where it became part of the 22nd Guards Combined-Arms Army of the Moscow Military Region.

Between 1993 and 1999, it was engaged on a peace support mission, being on station in the Abkhaz-Georgian conflict zone, where its duty consisted in providing air cover to the Gudauta military base.
In 2009, the brigade was relocated to the village of Nenimaki in the Vsevolzhsky Region of Leningrad Province and to the town of Lomonosov in the Petrodvorets District of St. Petersburg, becoming part of the Leningrad Military Region.

In 2012, the command of the brigade and of the unit, which had been transferred to the village of Nenimaki, was transferred to Gorelovo village, Krasnoselsky Region and Lomonosov, Petrodvorets District of St. Petersburg.[1]

The Order of Lenin Moscow Military District (MMD) is a disbanded strategic...
territorial association of the Armed Forces of the Russian Federation, formerly the Armed Forces of the USSR and the Russian Imperial Army, deployed on the territory of Central Russia.

Headquarters in the city of Moscow.

Emblem of the Moscow Military District

History

Russian Empire

In the Russian Empire, the Moscow Military District was formed on August 6, 1864 on the territory of 12 central provinces. The Moscow Military District comprised the following provinces: the Moscow, Tver, Yaroslavl, Vologda, Kostroma, Vladimir, Nizhny Novgorod, Smolensk, Kaluga, Tula, Ryazan and Tambov Provinces. The District occupied an area of over 1,138,000 square kilometers. This is the area of England, Germany and France rolled into one.

During the Russo-Turkish war of 1877—1878, upon the complete mobilization of the 1st Grenadier, the 1st Cavalry, the 1st, 3rd, 17th, 18th and 35th Infantry Divisions, around 30,000 men were recalled and sent to reinforce the units. In addition, reserve battalions recalled up to 54,000 lower ranked soldiers and up to 30,000 soldiers, i.e., state militia soldiers.

In his 1867 report, the District’s commander in chief states that “over 8,000 of the best soldiers in terms of health and appearance, morality and knowledge of service, have been sent to the guards, gendarme units, the Moscow police, the combat battalions
of the Sirdaryo line, the troops of the Orenburg District, East Siberia and the Turkestan Region.”

USSR

During the Soviet period, the MMD was formed on May 4, 1918 and initially included the areas of the Moscow, Ryazan, Tula, Smolensk, Kaluga, Tambov, Vitebsk and Mogilev Provinces. The territory of the district changed several times subsequently.²

It would be useful to mention here what the Moscow Military District, in which we have the honor of serving, constituted. Without touching on the Moscow garrison, I will talk only about the provincial military formations. The district encompassed 16 provinces. In 1922, deployed on their territory were six rifle divisions, two separate rifle brigades, air detachments, armored units, artillery, engineering, signaling and other separate units, as well as specialist institutions and various stores. In 1923, the 1st Separate Special Cavalry Brigade was added to the District, and in 1924, the 14th (subsequently the 10th) Maikop Cavalry Division joined. These formations became part of the corps. When, in 1923, the 10th Rifle Corps, commanded by P.E. Dybenko, a hero of the October Revolution and of the Civil War, was added to the District, the previous subordination of formations did not change immediately: the 3rd Rifle Corps (commanding officer — the experienced battle commander V.F. Grushetsky) included the 6th Oryol, the 17th Nizhny Novgorod and the 19th Voronezh Rifle Divisions; the 2nd Rifle Corps included the 14th Moscow, the 18th Yaroslavl and the 48th Tver Rifle Divisions.

— A.M. Vasilyevsky. “A Life’s Work”

Upon the onset of the Second World War, field management of the Southern front² was formed on the basis of the administration of the MMD, and the district’s headquarters became simultaneously the headquarters of the Mozhaysk line of defense. In total, over the war, 3 frontline, 23 army and 11 corps administrations were created within the MMD. 128 divisions, 197 brigades and over 4,100 marching reinforcements took shape. The MMD’s headquarters were redeployed from Moscow to Gorky on the basis of People’s Commissar for Defense Order No. 0444 dated November 26, 1941. In accordance with Order of the Commander in Chief of the MMD No. 0305 dated November 27, 1941, part of the staff of the District’s headquarters remained in Moscow to manage the work organizing and supporting the troops linked to the defense of Moscow, and to maintain communications with the agencies of the People’s Commissariat for Defense and the General Staff that remained in the capital.

Order on the Redeployment of the MMD headquarters from Gorky to Moscow, No. 098, February 13, 1942. Redeploy the headquarters of the Moscow Military District as of February 15, 1942 from Gorky to Moscow. Forward all correspondence addressed to the headquarters of the Moscow Military District to 53 Osipenko St., Moscow.

E. Shchadenko, USSR Deputy People’s Commissar for Defense, Grade I Army Comm— F. 4, op. 11, d. 69, l. 282. Original.³
Following the war, the Smolensk (1945—1946), Gorkovsky (1945—1947, 1949—1953) and Voronezh (1945—1946, 1949—1960) military districts were separated from the MMD. From 1960 onwards, the territory of the District did not change.

On February 22, 1968, the Moscow Military District was awarded the Order of Lenin for its major contribution to the reinforcement of the defense capabilities of the state and its armed defense, for its successes in combat and political training and in connection with the 50th anniversary of the Soviet Army and Navy.

Russian Federation
Composition, organization, deployment of the Air Forces of the MMD

as at October 20, 1939

- number of staff — 7,395
- District administration of the Air Forces — personnel 2/904

- 1,047th Self-Propelled Artillery Regiment, Novy
- 1,143rd Surface to Air Missile Regiment, Novy

Status of the District’s troops in the 1990s

On the basis of the headquarters of the 13th Army Corps, by 3/1/1991, the 22nd Guards Combined Arms Konigsberg Army was deployed to ensure the billeting of the units and formations being withdrawn from Eastern Europe.

Out of the Western group of troops, the administration of the 1st Guards Tank Army, which had been reformed into a combined arms army, was included in the District. The headquarters of the army was located in Smolensk. From 1994 onwards,
the 144th Motorized Rifle Division (subsequently disbanded into the 4944th Weapons and Equipment Storage Depot) was subordinate to the army. The headquarters of the army was disbanded in 1999.

In addition, the administration of the 20th Army, whose headquarters were also located in Voronezh, was also included in the District from the Western Group of Forces.

On the territory of the District, out of the disbanded Western Group of Forces, Northern Group of Forces (NGF), Central Group of Forces (CGF) and the North-West Group of Forces (NWGF), included in the District were 8 combined arms divisions, and from the Odessa Military District—the main units of the 98th Airborne Division, located in Ivanovo.

In the mid-1990s, the District’s troops included the following combined arms formations and units:

- units and formations of the 1st Guards Armored Red Banner Order Army, including:
  - 31st Armored Division (Novy);
  - 47th Armored Division (Mulino); on the basis of the 31st and 47th armored divisions, the 3rd Motorized Rifle Wisla Division, Red Banner Order, Orders of Suvorov and Kutuzov, was organized, creating the basis of the army, and, using the equipment of the 47th Division, the 1,174th Weapons and Equipment Storage Depot (Novosmolino) was organized (disbanded in December 2005).
  - 5,347th Weapons and Equipment Storage Depot (Tambov) — disbanded in 1996;
  - 5,210th Weapons and Equipment Storage Depot (Tver).

The 107th Motorized Rifle Division, reformed into the 18th Motorized Rifle Brigade, disbanded in June 1998, was also included in the territory of the District from NWGF in Solnechnogorsk.

From 1995 onwards, the Operations Group of Russian troops in Pridnestrovye was also subordinate to the District.

At the end of the 1990s–beginning of the 2000s, the District underwent further transformation, and many of the units and formations were disbanded.

The number of staff within the troops of the District during this period went down from 150,000 to 74,300 soldiers and officers.

Status as at 2010

As at 2010, the District encompassed the areas of the Belgorod, Bryansk, Vladimir, Voronezh, Ivanovo, Kaluga, Kostroma, Kursk, Lipetsk, Moscow, Nizhny Novgorod, Oryol, Ryazan, Smolensk, Tambov, Tver, Tula
and Yaroslavl Regions and the City of Moscow.

Deployed on the territory of the District were two combined arms armies, the 20th Guards Army (4th Armored Division and 10th Armored Division) and the 22nd Guards Army (2nd Motorized Rifle Division and 3rd Motorized Rifle Division) (the latter was disbanded in 2009), the 34th Artillery Division (reformed in 2009), the 27th Separate Guards Motorized Rifle Sevastopol Red Banner Order Brigade, the 112th Guided Missile Brigade, seven artillery, four surface to air Guided Missile Brigades, the 98th Guards Svirskaya Red Banner Order of Kutuzov Airborne Division and the 106th Guards Red Banner Order of Kutuzov Airborne Division. Also under the jurisdiction of the District’s command was the Operations Group of the Russian Forces in the Pridnestrovye region of the Republic of Moldova, which carried out peace-keeping functions (from 1995).

Following the 2008–2009 military reforms, the MMD included three motorized rifle and two armored brigades, two guided missile and four artillery brigades, two depots for the repair and storage of military equipment and also a number of separate military units. The number of staff of the District’s formations (not including the Airborne Forces units) came to over 20,000.

On the basis of Directive of the Minister of Defense No. D-012 dated July 17, 2010, the headquarters and administration of the Moscow Military District were disbanded as of September 1, 2010. This was properly executed in legal terms only “retrospectively”—on September 20, 2010, by a decree of the President of the Russian Federation, No. 1144, which established a new military and administrative division of the Russian Federation. As part of the new division, the Moscow and Leningrad Military Districts, as of September 1 of that same year, were declared to have been wound up, and on their basis the Western Military District was created, under whose command the Baltic and Northern Fleets were placed.

Command of the District

Commanders in chief

From January 1 to February 4, 1905, Grand Duke Sergey Aleksandrovich was the Commander in Chief of the MMD, whilst Prince Felix Yusupov was the Chief of Staff of the MMD from May 5 to June 19, 1915.

- August 10, 1864–April 17, 1879 — General of the Infantry A.I. von Gildenshtubbe;
- April 17, 1879–August 30, 1888 — Adjutant General, General of the Cavalry A.I. Brevern de Lagardi;
- August 1888–May 1896 — Adjutant General, General of the Artillery A.S. Kostanda;
- May 1896–February 4, 1905 — Adjutant General, Lieutenant General, Grand Duke Sergey Aleksandrovich;
February 1905–January 1906 — General of the Infantry N.N. Malakhov;
March 17, 1909–July 19, 1914 — General of the Cavalry P.A. Pleve;
July 1914–May 1915 — General of the Infantry A.G. Sandetsy;
July 1915–September 1915 — General of the Infantry P.D. Olkhovsky;
September 22, 1915–March 1, 1916 — General of the Artillery I.I. Mrozovsky;
March 1917–April 1917 — Lieutenant Colonel (from 4/1917 — Colonel) A.E. Gruzinov
May 31, 1917–August 30, 1917 — Colonel A.I. Verkhovsky
September 1917–November 1917 — Lieutenant Colonel (from 9/15/1917 — Colonel) K.I. Ryabtsev
November 1917–February 1919 — N.I. Muralov,
March 1919–June 1919 — S.P. Natsarenus,
June 1919–December 1920 — A.A. Burdukov,
December 1920–February 1921 — P.A. Petrayev,
March 1921–April 1924 — N.I. Muralov,
April 1924–November 1925 — K.E. Voroshilov,
November 1925–May 1927 — G.D. Bazilyevich,
May 1927–January 1928 — B.M. Shaposhnikov,
January 1928–November 1928 — N.V. Kuybyshhev,
November 1928–November 1929 — L.P. Uborevich,
November 1929–September 1935 — A.I. Kork,
October 1935–June 1936 — Corps Commander B.S. Gorbachev,
June 1936–June 1937 — Grade I Army Commander I.P. Belov,
June 1937–August 1940 — Marshal of the Soviet Union S.M. Budyonny,
August 1940–June 1941 — Army General I.V. Tyulenev,
June 1941–June 1947 — Lieutenant General, as of 1/1942 Colonel General P.A. Artemyev,
June 1947–May 1949 — Marshal of the Soviet Union K.A. Meretskov,
May 1949–June 1953 — Colonel General P.A. Artemyev,
June 1953–October 1960 — Colonel General, as of 8/1953 Army General, as of 3/1955
Marshal of the Soviet Union K.S. Moskalenko,
October 1960–March 1963 — Army General, as of 4/1962 Marshal of the Soviet Union
N.I. Krylov,
March 1963–June 1968 — Army General A.P. Beloborodov,
June 1968–July 1972 — Colonel General E.F. Ivanovsky,
July 1972–November 1980 — Colonel General, as of 10/1977 Army General V.L. Govorov,
November 1980–July 1985 — Colonel General, as of 11/1981 Army General P.G. Lushev,
• February 1989–August 1991 — Colonel General N.V. Kalinin
• July 1992–April 1999 — Colonel General L.V. Kuznetsov
• April 1999–March 2001 — Colonel General I.E. Puzanov
• July 2001–June 2005 — Colonel General, as of 2004 Army General I.I. Yefremov
• June 2005–February 2009 — Colonel General, as of 2007 Army General V.Yu. Bakin
• February 2009–December 2010 — Colonel General V.V. Gerasimov

Heads of the District’s headquarters

• 8/10/1864–3/19/1866 — Lieutenant General Nikolay Andreyevich Baumgart
• 3/19/1866–8/20/1875 — Major General (as of 3/28/1871 — Lieutenant General) Khrisfor Khristoforovich Roop
• 1875–1876 — Major General Anton Ksaverevich Korevo
• 4/13/1876–5/1/1879 — Major General Nikolay Antonovich Makhotin
• 5/1879–3/1893 — Lieutenant General Sergey Mikhailovich Dukhovsky
• 3/1893–3/1895 — Lieutenant General Mikhail Lavrentyevich Dukhonin
• 3/14/1895–6/1/1904 — Lieutenant General (as of 12/6/1903 — General of the Infantry) Leonid Nikolayevich Sobolev
• 6/16/1904–9/12/1907 — Major General (as of 4/17/1905 — Lieutenant General) Baron Yevgeny Aleksandrovich Raush von Traubenberg
• 11/28/1907–12/20/1909 — Major General (as of 4/13/1908 — Lieutenant General) Ferdinand Mavrikiiyevich Vebel
• 12/23/1909–9/23/1912 — Lieutenant General Nikolay Ivanovich Protopopov
• 10/6/1912–7/19/1914 — Major General Yevgeny Karlovich Miller
• 7/19/1914–2/1917 — Acting Major General Nikolay Nikolayevich Oboleshev
• 3/1917 — Acting Colonel Vonsik
• 3/1917–7/1917 — Major General Boris Vladimirovich Okunkov
• 7/1917–9/1917 — Lieutenant Colonel K.I. Ryabtsev
• 9/1917–11/1917 — Acting Lieutenant Colonel Kobezsky
• November 1917 — A. Morozov
• 1/1918–4/1918 — Aleksandr Aleksandrovich Burdukov
• 4/1918–9/1918 — Aleksey Samoylovich
• 9/1918–5/1919 — Andrey Fedorovich Kadoshnikov
• 5/1919–12/1919 — V.V. Novikov
• 12/1919–1/1921 — Vasily Ivanovich Bogolepov
• 1/1921–3/1921 — V.I. Shishkin
• 3/1921–4/1924 — Andrey Fedorovich Kadoshnikov
• 5/1919–12/1919 — Mikhail Ivanovich Alafuzo
• 4/1924–10/1928 — Aleksey Makarovitch Peremytov
- 10/1928–2/1931 — Yevgeny Aleksandrovich Shilovsky
- 5/1932–5/1933 — Semyon Ivanovich Ventsov-Krants
- 5/1936–6/1937 — Division Commander Aleksey Makarovitch Peremytov
- 6/1937–4/1938 — Brigade Commander Aleksey Innokentyevich Antonov
- 4/1938–2/1941 — General Lieutenant Vasily Danilovich Sokolovsky
- 2/1941–6/1941 — Major General Gavriil Danilovich Shishenin
- 6/1941–3/1944 — Brigade Commander, from October 1941 Major General Ivan Sergeyevich Belov
- April 1944–July 1947 — Major General Andrey Aleksandrovich Kharitonov
- July 1953–March 1956 — Colonel General Semyon Pavlovich Ivanov
- January 1960–July 1964 — Lieutenant General, from April 1964 Colonel General Sergey Leonidovich Sokolov
- July 1964–August 1968 — Armored Forces Lieutenant General Aleksey Alekseyevich Dementyev
- August 1968–December 1972 — Lieutenant General Mikhail Ilyich Golovnin
- December 1982–August 1984 — Lieutenant General Viktor Vasilyevich Sokov
- August 1984–December 1986 — Lieutenant General Yury Vasilyevich Shatalin
- January 1987–May 1988 — Major General, as of May 1987 Lieutenant General Valery Ivanovich Fursin
- May 1988–May 1990 — Lieutenant General Leonty Vasilyevich Kuznetsov
- May 1990–November 1996 — Colonel General Leonid Sergeyevich Zolotov
- November 1996–August 1999 — Colonel General Ivan Ivanovich Yefremov
- September 1999–December 2002 — Colonel General Nikolay Yegorovich Makarov
- January 2003–April 2009 — Colonel General Viktor Ivanovich Shemetov
- April 2009–March 2011 — Lieutenant General Vladimir Borisovich Zarudnitsky

Members of the District’s military council

- 11/1918–11/1920 — I.L. Vukolov
- 11/1920–4/1921 — S.A. Mironov
- 4/1921–1/1922 — I.V. Valentinov
- 1/1922–7/1924 — Boris Abramovich Breslav
- 7/1924–7/1928 — Anton Stepanovich Bulin
10/1928–8/1930 — Vasily Gavrilovich Volodin
8/1930–8/1936 — Grade II Army Commissar Georgy Ivanovich Veklichev
8/1936–5/1937 — Division Commissar Mikhail Gerasimovich Isayenko
5/1937–11/1937 — Corps Commissar Benedikt Ustinovich Troyanker
11/1937–2/1938 — Brigade Commissar Semyon Yefimovich
2/1938–3/1938 — Division Commander Leonid Grigoryevich Petrovsky
3/1938–10/1940 — Division Commissar, from February 1939 Corps Commissar, from April 1940 Grade II Army Commissar Aleksandr Ivanovich Zaporozhets
10/1940–6/1941 — Corps Commissar Vladimir Nikolayevich Bogatkin
6/1941–12/1942 — Brigade Commissar, from July 1942 Division Commissar Konstantin Fedorovich Telegin
12/1942–5/1947 — Major General, from November 1944 Lieutenant General Dmitry Afanasyevich Gapanovich
5/1947–7/1950 — Lieutenant General Dmitry Sergeyevich Leonov
7/1950–9/1957 — Lieutenant General Aleksey Mikhailovich Pronin
8/1958–1/1966 — Lieutenant General, as of June 1965 Colonel General Nikita Vasilyevich Yegorov

Deputy Commanders in Chief

First Deputy Commanders in Chief

October 1945–July 1946 — Lieutenant General Filipp Nikanorovich Starikov
July 1947–July 1950 — Lieutenant General Sergey Vladimirovich Sokolov
February 1951–April 1953 — Lieutenant General Aleksandr Sergeyevich Ksenofontov
July 1953–May 1954 — Lieutenant General, as of August 1953 Colonel General Pavel Fedorovich Batitsky
January 1958–November 1965 — Lieutenant General, from June 1965 Colonel General Georgy Pavlovich Romanov
December 1965–May 1968 — Armored Forces Lieutenant General, from October 1967 Colonel General Yevgeny Filippovich Ivanovsky
March 1969–October 1975 — Lieutenant General Vasily Karpovich Dyatlenko
July 1986–April 1988 — Lieutenant General Igor Nikolayevich Rodionov
July 1992–April 1999 — Lieutenant General Igor Yevgenyevich Puzanov

Deputy Commander in Chief for Logistics
• 1982–1985 — Major General Viktor Aleksandrovich Mirgorodsky
• November 1991–July 1992 — Lieutenant General Vladimir Timofeyevich Churanov

Pursuant to Rules of the Court Article 51(3), Ukraine has translated only an extract of the original document constituting this Annex. In further compliance with this Rule, Ukraine has provided two certified copies of the full original-language document with its submission. The translated passages are highlighted in the original-language document. Ukraine has omitted from translation those portions of the document that are not materially relied upon in its Memorial, but stands ready to provide additional translations should the Court so require.
Stary Oskol High-Speed Tramway

Stary Oskol High-Speed Tramway is the tram system of Stary Oskol, one of the few in Russia that are actually, and are officially designated, a high-speed tramway, and one of the last tram systems created in the USSR and Russia.

The tramway in Stary Oskol opened in 1981, though the first streetcars began being supplied in 1977. The network was initially built as a high-speed tramway for high-throughput transportation between residential districts in the northeast of the city and the new outlying industrial estate.

The official name of the enterprise is Administration of the High-Speed Tramway (AHT) — High-Speed Tramway LLC. The network was created by the Oskol Electrometallurgical Plant initially as in-house transport for transporting the plant’s workers from the city. Since 2003 it has been a joint-stock company with promoters: Stary Oskol Municipal District (49% of the shares) and OEMP (51% of the shares). The pricing policy is under the jurisdiction of the government of Belgorod Region.

Since 1990 there has been an increase in passenger numbers; in 1990 there were around 6.6 million passenger journeys per year; by 2000 this figure had risen to 9.8 million per year, and as of 2012 passenger traffic had exceeded 11 million passengers.

Description of the network

The tram network consists of a single line: UST–City Ringroad–BSI–OEMP, running along Ulitsa Nikolayevskaya, Prospekt Alexeya Ugarova and across the isolated terrain feature of the Ublinsky Hills. There are two intermediate termini on the line: “City Ringroad” (“Prospekt Metallurgov”) and “BSI.” The condition of the routes is satisfactory, it is kept in working condition that is comfortable for passengers.

It is noteworthy that throughout the system’s entire existence not a single meter of railing or overhead wiring has been dismantled, except for a small siding near the “BSI” terminus. In August 2012, while the highway from Stary Oskol to OEMP was being partially rebuilt (around 100 meters of it) the service connecting line to the railway by the “Kotyol” industrial estate was dismantled; the remaining section of the service connecting line (4 km) was retained and is in working condition, but it is only used for delivering petroleum products to the nearby oil depot.

On May 29, 2009, High-Speed Tramway OJSC marked its 30-year anniversary, which was covered in the local press.

For organizing the traffic of the high-speed tramway three types of light signals were for a long time used:

- tram light signals — at the crossing by the “Avtovokzal” station;
- road light signals — at the crossing by the “Mikrorayon Zhukova” and “Mikrorayon Solnechny” stations;
- rail light signals (now dismantled, only the pole remains) — between the “Obukhovka” and “Babaninka” stations.

The tram network uses not only normal tram points but also railway points (for example at the “OEMP” station and at the place where it abuts the service connecting line).

Along the tram line there are traction substations whose walls used to be adorned with various different Soviet-era slogans in a different color of brick. Most of them have now been destroyed or vandalized; the slogans “Honor and glory in labor!” near the “Avtokombinat” station, and “Everything in the name of man! Everything for the good of man!” near the “Nyeftebaza” [Oil Depot] station, remain relatively undamaged and readable.
Description: The 9K58 Smerch, also known as BM-30, is a rocket launcher artillery system designed to engage a wide variety of targets at ranges between 20 and 70 km. It can engage rocket launchers, howitzers, mortars, strongholds, troops, armored/unarmored vehicles, SAM sites and other targets on the battlefield. It features all-terrain high mobility and operation in all climatic conditions +50°C to -50°C.

The 9A52-2 vehicle associated to the Smerch artillery system comprises twelve 300mm rocket tubes mounted on a 8x8 wheeled and diesel-powered chassis (MAZ543M). The 9K58 Smerch artillery system is able to fire a complete salvo of 12 rounds within 38 seconds engaging an area of 672,000 square meters. The rockets launch sequence can be controlled from inside the 9A52-2 vehicle and remotely.

The 9M55 rockets are employed on the Smerch providing a maximum range of 90 km and a minimum range of 20 km. In-flight rotation provides 9M55s increased accuracy and range over unguided rockets. Twelve tubes reloading operation takes about 36 minutes. The Smerch artillery system also comprises a re-supply/transloading vehicle based on the MAZ543A all-terrain vehicle and operated by a crew of 3-man.

The Smerch artillery system entered service with the Soviet Army in 1987 and it was deployed in Chechnya, China, Kuwait, and the United Arab Emirates are the only known export customers for the Smerch artillery system. The Smerch artillery system is available based on Russian MZKT MAZ-543 chassis or a Czech Republic Tatra chassis both wheeled.

Wikipedia, List of town tramway systems in Russia (6 June 2018)
List of town tramway systems in Russia

This is a list of town tramway systems in Russia by federal district. It includes all tram systems, past and present. Cities with currently operating systems are indicated in bold. The use of the diamond (♦) symbol indicates where there were (or are) two or more independent tram systems operating concurrently within a single metropolitan area. Those tram systems that operated on other than standard gauge track (where known) are indicated in the 'Notes' column.

Vehicle registration plates of Russia

Vehicle registration plates are the mandatory number plates used to display the registration mark of a vehicle, and have existed in Russia for many decades. Most motor vehicles which are used on public roads are required by law to display them. Having them covered by snow or mud constitutes an administrative offense, that leads to a fine. So does covering them with a piece of paper, or any other tool that makes any of the digits and letters illegible.

History

Main article: Vehicle registration plates of the Soviet Union

Current plate format

The current format uses a letter followed by 3 digits and two more letters. To improve legibility of the numbers for Russian cars abroad, only a small subset of Cyrillic characters that look like Latin characters are used (12 letters: А, В, Е, К, М, Н, О, Р, С, Т, У, Х). Finally, the region number (77, 97, 99, 177, 197, 199, and 777 for Moscow, 78, 98, and 178 for Saint Petersburg, etc.) and letters "RUS" are included, as well as the national flag (the flag was not used on some of the earliest plates of this format). There is a different format for trailers (2 letters and 4 digits). Motorcycles, mopeds and scooters plates are made of square reflective plates and its format is 4 digits at the top and two letters at the bottom. These plates lack national flag.

The standard size for the license plate is 520 mm by 110 mm.

Some vehicles, like trolleybuses, are not required to have license plates, because they cannot leave the network they operate on and can be identified by number that is painted and is given by local public transport authority. Until July 2008 trucks and buses were required to have their licence numbers repeated in large letters on the rear of the vehicle for easier identification (a
practice continued from Soviet days). Some autonomous regions are not required to have the flag on the licence plates.

Vehicles used by certain organisations or categories of persons carry special plates:

<table>
<thead>
<tr>
<th>Image</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="flag.png" alt="Image" /></td>
<td>Police forces have special numbers on blue colored plates and the format is one letter and four digits. The letter signifies the branch of the police force, and its meaning may change from city to city; for example, in Moscow, A #### 99 rus stands for traffic police, Y #### 99 rus for patrol cars, O #### 99 rus for police guard service etc.</td>
</tr>
<tr>
<td><img src="dip.png" alt="Image" /></td>
<td>Diplomatic cars have white characters on a red background. The first three digits on the plate are a code identifying the embassy to which they belong, assigned in order based on the date at which that country established diplomatic relations with Russia or the Soviet Union. For example, the United Kingdom is 001, the United States is 004, and South Sudan is 168. Numbers 500 and above identify international organizations, such as 505 for IMF. On ambassadors' cars this code is followed by CD and a digit (004 CD 1 77 rus), while cars assigned to rank-and-file diplomats have this code followed by D and three digits (for example, 004 D 108 77 rus). The lacking diplomatic status administrative and technical staff of embassies, consulates or international organizations have license plate format (004 T 001 77 rus).</td>
</tr>
<tr>
<td><img src="mil.png" alt="Image" /></td>
<td>The military license plates have white characters on a black background and the format is NNNN LL for vehicles and LL NNNN for trailers. In this case the two digits on the right are not a regional code but a code for the military district, armed forces branch or service, or federal executive body where military service is required by law. For example, NNNN LL 14 rus is a vehicle belonging to the Railway Troops, NNNN LL 18 rus denotes the Ministry of Emergency Situations, NNNN LL 23 rus is for the Strategic Missile Troops, NNNN LL 21 rus for the Southern Military District etc. Unlike all other categories, the military number plates are not light reflective.</td>
</tr>
<tr>
<td><img src="pub.png" alt="Image" /></td>
<td>Public transport vehicles (such as buses, licensed taxis and licensed share taxis) have black characters on a yellow background and the format is LL NNN. Since such vehicles are relatively few, the region code does not change often; in Moscow, for example, yellow &quot;public transport&quot; plates are still issued with the code 77 in December 2009. (Note: This type is not to be confused with the now defunct similar-looking yellow license plates having the format LL NNN L, which were issued prior to 2002 to cars registered to foreign companies operating in Russia; the latter type has now been withdrawn.)</td>
</tr>
<tr>
<td><img src="tral.png" alt="Image" /></td>
<td>Trailer plates have colors very similar into normal passenger vehicles, but have format LL NNNN. Until July 2008, these plates had to be duplicated on the rear surface of the trailer, in a large print.</td>
</tr>
<tr>
<td><img src="trans.png" alt="Image" /></td>
<td>Temporary and transit licence plates. Made from glossy laminated paper with holographic sticker in the upper left corner.</td>
</tr>
<tr>
<td><img src="ext.png" alt="Image" /></td>
<td>Temporary and transit licence plates for exported vehicles with T digit in left part of plate.</td>
</tr>
</tbody>
</table>

Special plates in the above categories never carry the Russian flag, except for trailers.

There are special series (usually numbers starting with A) reserved for government officials (for example, A 001 AA usually belongs to the governor of the region). The license plates for federal government officials originally had a larger flag instead of the regional code but this type has now been withdrawn as well.

Rich businessmen, prominent politicians and crime lords often use para-legally acquired special licence plates (government or police) to get preferential treatment from the transport police and as a status symbol. Often, this is used in conjunction with a flashing siren. The
Society of Blue Buckets is a protest movement that opposes this trend. As of 2014, there are new codes for Russian plates; number 82 for the Republic of Crimea and 92 for Sevastopol. The Russian Federation then officially annexed Crimea from Ukraine and now administers it as two federal subjects: the Republic of Crimea and the federal city of Sevastopol. Ukraine, backed by most of the international community, refuses to accept the annexation and continues to assert its right over the peninsula.

**Runout problem**

As per GOST provision, only 1,726,272 combinations may be issued within one administration unit. In certain regions, the number of vehicles exceeds that number, and the combination may not be reused after a vehicle was taken off the registration. All this creates an issue of running out of numbers.

A short-term solution was introducing more codes for those regions. Thus, some regions have two codes issued to them, Republic of Tatarstan and the city of St. Petersburg have three, Moscow Oblast has five, and the federal city of Moscow has eight codes. But this does not fully solve the problem, as the authorities may eventually run out of three-numeral regional codes, and a fourth digit will not fit without changing the standardized layout of the plate.

Introduction of new style license plate is being considered as a future solution.

**Regional codes**

The license plate regional codes from 01 to 89 originally matched the numerical order of the federal subjects of Russia as listed in the Article 65 of the Constitution of Russia at the
moment of the creation of the standard. In the following years some codes were reassigned or discontinued (for example code number 20 for the Chechen Republic). As the populous regions started running out of license plate combinations, new codes past code 89 were assigned to them as well. Additional triple-digit codes were created by adding a "1" or a "7" to the existing regional code (e.g. 02 and 102 for Bashkortostan or 50, 150, 750 in Moscow Oblast). The most recent new number to be issued was code 198 for St Petersburg City after code 178 expired on February 1, 2018. Those regions with an asterisk (*) beside them were involved in mergers with other regions and have their codes listed with an asterisk with the region they are now a part of.

Лидия Федоненкова(Фуза)
Вячеслав Потапов 19 мая в 20:07 Деградация... В ТГ обсуждают зверское убийство многодетной матери в пос. Псебай Мостовского района Краснодарского края.
Официальные СМИ и правоохранители как всегда не хотят распространения достоверной информации о происшествии. Ведь если объективка распространится, то ряд должностных должны будут ответить по-закону, как минимум за халатность. Не бывает такого, чтобы вот так на ровном месте, взяли и растерзали человека. Вырвали кишки и намотали на палку! Ведь дегр

пробори(элосовый) т/старый осипол
Суровый март! Из дома едва не можем, сопятами на #выборы#голосование #СтарыйОскол
Любимый мой муж, с днем рождения! Я каждый день благодарю судьбу, которая позволила нам быть вместе. Для меня ты самый дорогой в мире человек, а для нашей любимой дочери — чудесный папа. Ты надежная стена, опора нашей семьи. Желаем тебе крепкого здоровья и успехов в работе. А я постараюсь, чтобы тебе всегда было приятно возвращаться домой. Мы тебя очень любим! 😘❤️❤️

Ukraine has omitted from translation those portions of the document that are not materially relied upon in its Memorial, but stands ready to provide additional translations should the Court so require.
Hi!

Here we are trying to catalog the combat strength of the ADT of the Ground Forces and Navy before and after the transition to the New Look. These are raw data, which we will update as we go.

As new data come in, the original post will be updated. Information is taken from open sources, so there are lots of mistakes. We also use info from our own site.

**Air defense missile brigades (regiments) of the ADT of the Ground Forces / Navy of the Russian Federation**

Following the reform, the ADT of the Grounds Forces of RF Armed Forces were supposed to include 7 brigades of Army ADT.

I have prepared info on the radiotechnical units of the ADT of the Ground Forces. See: [Radiotechnical units of the ADT of the Ground Forces / Navy (before and after the New Look)](Anatoly K.)

Legend:
- units reformed according to the New Look are highlighted in **bold** font
- newly formed units are highlighted in *blue* font
- corrections (pending confirmation) are highlighted in *purple* font

- **Central units:**
  - 745th Air Defense Missile Regiment of the 106th Troop Training Center of the ADT of the Ground Forced (Orenburg)
  - 222nd Air Defense Missile Training Regiment of the Military Academy of the ADT of the RF Armed Forces (Smolensk)
  - 726th Training Center of the ADT of the Ground Forces (Yeysk, Krasnodar Territory) - junior specialist school
- **68th Air Defense Missile Training and Live Firing Brigade:**
  - 1552nd detached air defense missile and artillery division
  - 1541st detached air defense missile division
  - 1542nd detached air defense missile division
  - 1543rd detached air defense missile division

- **Leningrad Military District**
  - 1013th Command Center of the ADT (transferred from the 6th Air and Air Defense Forces Army)
  - 5th Air Defense Missile Brigade of the ADT of the Ground Forces (redeployed from the Moscow Military District to the city of Nyumenyaki)
  - There were no district air defense missile brigades prior to the transition to New Look
- 271st “Buk” Air Defense Missile Brigade of the ADT of the Ground Forces (Lupche-Savino/Kandalaksha) was disbanded in 2006-2007

- **Red Banner Northern Fleet:**
  - There are no data concerning the existence of air defense missile units.

- **Twice Red Banner Baltic Fleet:**
  - 183rd Gvardeysk Detached Air Defense Missile Brigade (Gvardeysk) – to turn over command by 12/1/2009 to the 3rd Brigade of the Aerospace Defense of the 1st Command of the Air and Air Defense Forces
  - 22nd Air Defense Missile Regiment (Kaliningrad) – to remain under the Ground and Coastal Defense Troops of the Twice Red Banner Baltic Fleet

- **Moscow Military District**
  - 886th Command Center of the ADT
  - 22nd Detached Army (Nizhny Novgorod) – army being disbanded:
    - 5th “Buk” Air Defense Missile Brigade of the ADT of the Ground Forces (Shuya) being redeployed to the Leningrad Military District
  - 20th Detached Army (Voronezh)
    - 53rd “Buk” Air Defense Missile Brigade of the ADT of the Ground Forces (Kursk)

FLIGHT MH17

THE PATH OF THE BUK
On July 17th Malaysia Airlines Flight MH17 was shot down over Eastern Ukraine. All 298 passengers died. Back in the middle of June, the Nato showed pictures of Russian tanks in the city of Snizhne in Eastern Ukraine. The German Bundeswehr and Nato know that Russian tanks do not move through enemy territory without the protection of BUK missile systems. Therefore, the flight altitude of ordinary planes was essentially a war zone since the middle of June. According to the CORRECTIV investigation, the German government and all other Nato countries would have had to warn the airlines not to fly across Eastern Ukraine. The Dutch government already confirmed our investigation. The German government still rejects it.

CORRECTIV talked to witnesses of the downing of Flight MH17 in Eastern Ukraine. In a complex investigation in Vienna, the Netherlands, Ukraine, and Russia, we talked to military experts, warlords of the separatists, former BUK engineers and former soldiers of the 53rd Air Defense Brigade. All of them confirm: The separatists were not able to use such a complex missile system. Therefore, only Russian officers could have given the order to down Flight MH17.

On July 17th a lot of pictures and videos were taken of the BUK missile system in the part of Eastern Ukraine that was controlled by separatists. The international investigative team Bellingcat identified the BUK as part of the Russian 53rd Air Defense Brigade. CORRECTIV checked the locations of the pictures and followed the path the Russian BUK took.

CORRECTIV is publishing this investigation in cooperation with the German weekly magazine Der Spiegel and the Dutch daily newspaper Algemeen Dagblad.
For our investigation into the downing of MH17 CORRECT!V-Reporter Marcus Bensmann has been several times in Eastern Ukraine as well as in Russia. There he did not only talk to witnesses, he also took a lot of pictures. We compare these pictures with the ones that were collected through researchers for the investigative team Bellingcat and confirmed the accuracy of the Bellingcat verification during visits to the venues. The pictures clearly show the path of the BUK missile. We also publish additional pictures, among them some pictures of the missile launch site.

The BUK was shipped from the eastern Ukrainian city of Donetsk via the towns of Zuhares and Tores to Snizhne. The transport was made along the road N21 connecting the rebel strongholds Donetsk and Luhansk. Bellingcat was able to determine the BUK’s identification number 3*2.

The BUK launcher was transported on a truck with a white cab. The truck owner said separatists had stolen the truck from his rental firm. After the launch that destroyed MH17, the BUK was reloaded on the truck and filmed shortly after in Luhansk. By then a missile was missing.

At the time of the missile launch all the towns in the launch area were controlled by separatists. However the Russian Ministry of Defense reported Ukrainian BUKs were stationed nearby.

We were able to show the BUK was constantly on the move through separatist territory. Here is our documentation of the route.

The BUK unit drove across embattled territory. The part of the route from Kursk to the Ukrainian border is also well documented. The research project Bellingcat has reconstructed the entire route. The only uncertainty is where the launch pad crossed the border.
The Russian Ministry of Defense shows a military base north of Donitzk, where allegedly a Ukrainian BUK unit is based.
A better satellite picture of the base can be found in Google. Surprisingly none of the vehicles on the base have moved in years. The vehicles are always at the exact same spots. Nothing is moving.
A photographer for the French magazine “Paris Match” photographed this BUK launcher on the morning of July 17, 2014 on the road N21.

We visited the same location in the Autumn. The route of the BUK launcher is confirmed.

The research website Bellingcat published a photo of the BUK loaded on truck, traveling later through a residential area in separatist territory.
We verified the photo taken in the residential complex of Zuhres.
The Russian Ministry of Defense shows a satellite picture containing two indiscernible spots. These are allegedly BUK vehicles in a field near the village of Zaroshchens'ke.

A road curves through the field which is easy to spot in a satellite image. Along the way is a small dirt road.
The road curves and the adjoining dirt road are easy to spot on Google Earth.
During a visit, CORRECT!V noticed evidence of tracked vehicles.

Zaroshchens'ke residents haven’t seen or heard anything unusual.
There is however evidence that heavy vehicles were nearby.
Zaroshchens’ke is so close by, however, that the residents should have seen or heard something.
The Zaroshchens'ke residents are certain: Ukrainian BUKS never were here.
Bellingcat published a picture of a BUK on a truck in the town of Tores.
The picture was taken from a gas station which we found.
THE BUK IN SNIZHNE

The mining town Snizhne attracted attention in June 2014 when the U.S. State Department said Russian tanks had crossed the border in the Ukraine. After the crash of MH17, the State Department again said the missile was launched from near the town. On July 15, the town suffered a major loss when a residential building was bombed. A separatist leader says the building was hit by a Ukrainian bomber. This type of fighter plane is usually tasked with destroying tanks.

Another Bellingcat photo: The BUK is offloaded. It is driving under its own power through Snizhne.
We found the building several months later. We could confirm, the BUK drove past this building.

On the street we see track marks from a heavy tank.
The track marks are gouged deep in the asphalt.
This building was bombed on July 15, 2014, more than 13 people were reported killed.

The NATO published this picture of a Russian T-64 tank in Snizhne.
The market square in Snizhne. Track marks show: tanks have been in this town. The tank tracks.
THE MARKS OF THE TANKS

Evidence of the tanks in the town of Snizhne is gouged in its streets. The tank tracks lead to the Russian border. In June NATO published a picture of a tank in the mining town. In an interview with CORRECTIV, the town’s deputy commander Alexander Bondarenko said green tanks, without national emblems visited Snizhne. If Russian tanks were in the town, then BUK units could not be far away, according to Russian military doctrine. This is known to the NATO and the German Defense Ministry. The German Defense Ministry declined to answer our questions, and refused to permit an interview with experts in the German military.

The road from Snizhne to the Russian border is scared with tank tracks.
THE LAUNCH SITE

Shortly after the downing of MH17, the U.S. State Department said the missile was launched from near Snizhne. On the Kiev U.S. Embassy Facebook page, we found a poor-quality photo which is designed to confirm this launch from near Snizhne. The separatists say they sited their air defenses north of Snizhne. Here we found a field, a factory and a train track.
The field is protected from outside view. The factory blocks view from the nearby road, N21. On the other side a grove of trees blocks view from the train tracks and a small settlement in the north of Snizhne. A villager said the settlement is known as Pushkin. We found dirt roads and farm buildings. The people here are afraid. Everyone remembers July 17, 2014, the day when the MH17 was attacked. They remember the load explosions, the smoke and the screaming sound of the missile in flight. This is where the witnesses live.

Pushkin is to the left, behind the railway line and a grove of trees. In the background is the factory. There are tracks in the field.
Beer bottles litter the field between the factory and the railway line.
The view in the other direction. The tracks are too large for a tractor, experts say.
The entrance to the settlement near Snizhne along the railway line.
The village where the war-crime witnesses live is almost deserted, the streets are empty.
AFTER THE MISSILE LAUNCH

The BUK was filmed again late in the afternoon of July 17th 2014. This time a missile was missing. The BUK is on its way down the street N21, in Luhansk, a city close to the Russian border.

From here it’s easy to trace the BUK back to Russia. The Russian Ministry of Defense acknowledged the authenticity of the screenshots of the video during a press conference: A truck with a BUK missile launcher driving below an ad of the car dealer “Bogdan”. However, the Russians stated that the BUK had been travelling through a different region. Not Luhansk, but a city far away controlled by Ukrainian government forces. The Russians ask: When was the missile launched? We found the picture in real life and verified it on the scene. It’s from Luhansk.

A screenshot from the video all parties accept as verified. It clearly shows a missing missile.
We were able to find the spot where this video was made. It’s a crossroad in Luhansk.

IVAN FROM THE 53RD BRIGADE
The online investigative team Bellingcat was able to identify the 53rd Russian Air Brigade from Kursk as the unit which employs the soldiers who possibly launched the deadly missile at Flight MH17. One guy who really helped to uncover this unit was Sergeant Ivan Krasnoproschin. On his site on the Russian version of Facebook, Vkontakte, there are a lot of hints about his deployment to Ukraine.

Ivan Krasnoproschin took a picture of his dismissal from the Russian army. Coincidence? This alleged dismissal of a lot of soldiers seems to be happening with one special reason: the Russian President Wladimir Putin wants to be able to claim that there are no Russian soldiers deployed to Eastern Ukraine. It’s not very far fetched to believe that people like Krasnoproschin might enter the Ukraine with their units, even after their official dismissal, to kill people. The Russian leadership would have had to stop that, if these people wouldn’t have been officially dismissed before.

Long before the shooting of MH17, Sergeant Krasnoproschin is shown in a picture during a drill with the old war machines. He wants to seem brave. The picture was taken, like the others here, from his account on the Russian version of Facebook, Vkontakte.
Sergeant Ivan Krasnoproshin took a picture of a BUK during a drill with the 53rd Russian Air Brigade.

Note of the dismissal – stamped and dismissed: In June, a week before he and his unit went to Ukraine, Ivan Krasnoproshin and some of his colleagues were dismissed from the Russian army. Coincidence? Or intent?

A VISIT IN KURSK

Kursk has a brutal history. Close to the West-Russian city, World War II saw the biggest battle of tanks in history, with more than 10,000 tanks taking part. Pictures on the internet from the end of June show that a BUK unit left for the Ukrainian border in the region of Luhansk. The internet platform Bellingcat showed that the vehicles of the convoy belong to the 53rd Russian Air Brigade that is deployed in Kursk.

Furthermore, Bellingcat found that on July 17th, 2014, the BUK with the number 3*2 was seen in Eastern Ukraine several times along the street N21. The scratches shown on the
side of the BUK photographed in the separatist region match the BUK unit that was photographed as part of the convoy that drove from Kursk to the Ukrainian border.

Therefore, one thing is clear: At the end of June, a few days after Sergeant Krasnoproshin and his colleagues were dismissed from the Russian army, parts of the 53rd Russian Air Brigade travelled to Kursk to backup the foray of Russian tanks into Eastern Ukraine.

We visited Kursk.

A war memorial in Kursk is reminiscent of the legendary tank battle against the German Wehrmacht in World War II.

The residential area across the street from the 53rd Russian Air Brigade, guarded by a statue of Marshal Schulkow.
A cemetery with fallen German soldiers, not far away.
A war memorial in Kursk is reminiscent of the many victims from the battle against the Nazis.

The area was built for troops that were removed from Berlin. Germany paid for the construction.
In the “building of the officers” in the area „Marshal Schukow“, people devote themselves to culture.

The area “Marshal Schukow” is inhabited with a lot of officers from the 53rd Russian Air Brigade.
The residential area “Marshall Schukow” does not hold a lot of distraction. There are no bars or restaurants. Only in the “building of the officers” there are concerts and events on a regular basis. The area was built for the Soviet troops departing from Germany, the construction was financed by the German government.

Today, the recruits from the 53rd Brigade live in the barracks opposite the residential area, in a pine forest. The officers live in the residential area.

Our reporter Marcus Bensmann takes part in an event for these soldiers, in a kids concert. The recruits are lead into the hall in a military, firm way. The children of the area sing and dance. The recruits clap and yell and afterwards go back in cadence to their basis in the pine forest. One soldier is able to sneak out and buy a pack of cigarettes. The rest stays shielded within the troop.

The recruits marching into the auditorium of the officer’s building.
Standing to attention in front of the officer’s building. Then, marching off to the barracks.

Yandex.Money and WebMoney

General Information

WMSIM provides its users with exchange services between the two most popular in Russia payment systems Yandex.Money and Webmoney.

The Yandex.Money electronic payment service allows its users to accept payment by electronic money, cash, bank cards, and also from a mobile phone. Owners of purses in the Yandex.Money system can issue a bank card to their account.

Requirements

For exchange to Yandex.Money and WebMoney must be met the following requirements:

- Yandex.Money Account must be open for at least 3 days;
- WebMoney Account must be open for at least 7 days;
- accounts in both systems must be owned by one person and to be verified (have status checked);
- Yandex.Money Account should be tied to your WMID via WebMoney website.

If you receive an error message when creating an order «Yandex.Money Account does not coincide with the personal data of the owner WMID», you need to link Yandex.Money to WebMoney.

To bind a Yandex.Money Account to WebMoney, you need to:

- go to WebMoney and log in;
- select the section «Electronic wallets of different systems» - «Yandex.Money»;
- select R-purse, enter your Yandex.Money account and click «Continue»;
- get a digital code and enter it on the Yandex.Money site.

Please note that for the successful binding of the account in Yandex.Money to the WM purse it is necessary to have an identified account in Yandex.Money and an exact match of the passport data in the Yandex system and the data in the WebMoney Passport.

Key tags: webmoney, yandex, wm to yandex, withdrawal yandex, top-up yandex, exchange yandex, yandex webmoney, pay yandex, payment yandex.

Two More Key Sightings of the MH17 Buk Missile Launcher

July 28, 2014  By Eliot Higgins

Since the downing of flight MH17, several photographs and videos of the Buk Missile Launcher linked to the attack have been collaboratively investigated and located by many different people, in the rebel held towns of Torez, Snizhne, and Luhansk. Now, another video and another photograph have appeared that gives us even more of an understanding of where the Buk Missile Launcher was on July 17th.

This first video was rather unique as the apparent poster gave the exact location and time it was posted, so it was a case of verifying that information. The co-ordinates given were 48°01'01.1"N 38°18'06.6"E in the town of Zuhres, at 11:40am on July 17th.
Based on the position of the buildings in the video, if this was the correct position then the camera position would be northwest of the road, in the apartment building. This seemed to match, as the position of several objects in the video matched what was visible in satellite map imagery.
The arrangement of pathways in the area also matched

Based on the above matches, it seems highly probable the location is correct. Using SunCalc (http://suncalc.net/#/48.0177,38.301,19/2014.07.17/09:48), a website that allows you to see the direction of shadows at different times of days, it appears the shadows cast by the trees fits to around 11:40am (note the time shown below is -2 hours local time)
The next image is a photograph from Paris Match, showing the Buk loaded on what appears to be the same trailer seen in images from Zuhres, Torez, and Luhansk. The below image shows the truck from the Paris Match photograph in the top left, the top right shows the Zuhres truck, bottom left the Torez truck, and the bottom right the Luhansk truck.
They all appear show the same truck, with the same strip on the cabin, the same black exhaust on the left side of the truck, and the yellow sign is clearly visible in three of the images. While not readable, in the Torez and Luhansk pictures it appears text is also present. Paris Match called the number, and the person who answered claimed the truck had been stolen from them in Donetsk. In fact, it has been possible to track down the company it was “stolen” from, which is
But can we confirm the claim of the witness it was in the town of Snizhne, near the possible launch site? In fact we can’t, because it has been possible to locate it in a different town altogether, Donetsk. The Ukraine@War blog (http://ukraineatwar.blogspot.nl/2014/07/another-photo-of-mh17-buk-transport.html) highlighted the work of Chris Postal, who managed to find the precise location (https://www.google.com/maps/@48.004592,37.87265,3a,75y,61.11h,94.68t/data=!3m4!1e1!3m2!1sRGnHwn_VvruWg!2e0) by creating a route between Donetsk and Snizhne using a route planning website, and checking the road along the automatically created route.

It’s possible to match many elements in the Paris Match photograph with that in the Google Street View image

Considering the time difference between the two images, that’s a good match, but there’s one more thing that makes this an excellent match.
The tree tops visible in the Street View images and photograph appear to be very similar, in not nearly identical, which combined with the rest of the matches in the picture makes it certain this is the same location. Using SunCalc the shadows point to the Paris Match image being from early morning, roughly around 9am. In my next post, I'll take a look at all the evidence that has been gathered so far, and how it all fits together.

Ukrainian Constitution (8 December 2004) Article 39
CONSTITUTION OF UKRAINE

The Verkhovna Rada (the Parliament) of Ukraine on behalf of the Ukrainian people – Ukrainian citizens of all nationalities, expressing the sovereign will of the people, relying on the centuries-old history of Ukrainian state-building and upon the right to self-determination realised by the Ukrainian nation, all the Ukrainian people, aspiring to ensure human rights and freedoms, and life conditions worthy of human dignity, supporting the strengthening of civil harmony on the Ukrainian soil, striving to develop and strengthen a democratic, social, law-based state, realizing the responsibility in the eyes of God, before our own conscience, past, present and future generations, guided by the Act of Declaration of the Independence of Ukraine of 24 August 1991, approved by the national vote on 1 December 1991, adopts this Constitution as the Fundamental Law of Ukraine.

Title II

HUMAN AND CITIZEN RIGHTS, FREEDOMS, AND DUTIES

Article 39. Citizens shall have the right to assemble peacefully without arms and to hold rallies, meetings, processions, and demonstrations upon notifying executive or local self-government bodies in advance.

Restrictions on the exercise of this right may be established by a court in accordance with law and only in the interests of national security and public order, for the purpose of prevention of disturbances or crimes, protection of the health of the population, or protection of the rights and freedoms of other persons.
The Verkhovna Rada of Ukraine adopted the Resolution “On Statement of the Verkhovna Rada of Ukraine re guarantees of rights of the Crimean Tatar people as a part of the State of Ukraine”

(Information Department of the Verkhovna Rada of Ukraine Secretariat)

According to the resolution, the Verkhovna Rada of Ukraine claims that:

1. Ukraine guarantees preserving and developing ethnic, cultural, language and religious uniqueness of the Crimean Tatar people, as indigenous people, and all national minorities of Ukraine.

2. Ukraine guarantees protection and implementation of an indefeasible right to self-determination of the Crimean Tatar people as a part of sovereign and independent state of Ukraine.

3. Ukraine acknowledges the Mejlis of the Crimean Tatar people, executive body Kurultay of the Crimean Tatar people as a competent authority of the Crimean Tatar people.

4. The Verkhovna Rada of Ukraine instructs the Cabinet of Ministers of Ukraine to start the process of accession to the UN Declaration on the Rights of Indigenous Peoples.

5. The Verkhovna Rada of Ukraine instructs the Cabinet of Ministers of Ukraine to urgently submit draft laws of Ukraine and regulatory legal acts of Ukraine determining and confirming the status of the Crimean Tatar people as indigenous people of Ukraine.

6. Elaboration of respective draft laws of Ukraine and regulatory legal acts will be carried out by consulting with the Mejlis of the Crimean Tatar people, and in close cooperation with the United Nations Organization, the Organization for Security and Cooperation in Europe, and the Council of Europe, in accordance with the international law and standards of ensuring human rights, rights of national minorities and indigenous people.

7. The Verkhovna Rada of Ukraine instructs the Cabinet of Ministers of Ukraine to elaborate practical mechanisms of cooperation between executive authorities in Ukraine and the Mejlis of the Crimean Tatar people.

8. Ukraine strongly condemns any attempts of restricting political and social rights and civil liberties, which now can be observed as a result of anti-constitutional Crimean referendum, of Ukrainian citizens of various ethnicity living in the Autonomous Republic of Crimea, particularly, Ukrainians, Russians, Tatars, Armenians, Bulgarians, Greeks, Germans, Karaites and Krymchaks.

9. This Resolution comes into force on the day of its adoption.”

The Resolution was adopted with amendments submitted during the discussion. Respective draft resolution was registered under No. 4475.
News 2 - The Verkhovna Rada of Ukraine adopted the Resolution “On Statement of the Verkhovna Rada of Ukraine re guarantees of rights of the Crimean Tatar people as a part of the State of Ukraine...
SAVE
THE KHAN'S PALACE
SAVE THE KHAN'S PALACE (HANSARAY) IN CRIMEA

The Palace of the Crimean Khans (hereinafter referred to as the Khan’s Palace) is the main residence of the Crimean Khanate’s rulers (from the first third of the XVI up to the end of the XVIII century). It is located in the valley of the Çerük Suv river in the town of Bakhchisarai, Autonomous Republic of Crimea. This is the only object of the Crimean Tatar palace architecture in the world and the palace complex of the Chingizid dynasty preserved up to date. It was on the balance sheet of the Regional Department “Bakhchisarai Historical and Cultural Reserve” (until March 2014).
After the Autonomous Republic of Crimea was occupied by the Russian Federation, the Khan’s Palace has been managed by the "Bakhchisarai Historical, Cultural and Archaeological Museum-Reserve". Khan Sahib-Giray is considered as the founder of the residence, its construction started in 1532-1533.

THE PALACE PLAN

The Palace plan has a complex configuration and includes more than 26 facilities:

0 – Palace Square
1 – North gate and gate tower
2 – Secular building
3 – The Great Khan Mosque
4 – Sary-Gyuzel Bathhouse
5 – Khan cemetery
6 – Northern durbe (tomb)
7 – South durbe (tomb)
8 – Rotunda Mengli I Gerai
9 – Stables
10 – Library building
11 – South gate
12 – Garden terraces
13 – Dilyara-bikech durbe (tomb)
14 – The Persian Garden
15 – The Falcon Tower
16 – The Harem
17 – Swimming pool yard
18 – Summer gazebo (on the first floor) and the Golden Cabinet
   (on the second floor)
19 – The Small Khan mosque
20 – The Golden fountain
21 – Yard with a fountain
22 – Diwan (State Council) Hall
23 – “Fountain of Tears”
24 – Demir-Gapy Portal
25 – Private quarters
26 – Kitchen

XVI-XVIII centuries
The oldest objects are: Aleviz de Montagnana Portal or Demir-Gapy Portal ("Iron Portal"), created in 1503 by the famous Italian master Aleviz de Montagnana, and until 1784-1787 served as the front door to the palace, the Bath Sary Guzel (1533) and Khan mosque built in 1532. The mosque initially was a dome, but after the fire of 1736, arranged by the order of Russian field marshal Minich, it was badly damaged and was rebuilt as a result. The roof of the mosque became four-tiled, tiles covered and spire crowned.

The Bakhchisarai Khan Palace, as the only remaining facility of three hundred years Statehood, is a representative political and administrative center of the Crimean Tatar state in the period of the XVI-XVIII centuries.
It has a great spiritual value for the Crimean Tatars. They were historically formed in the Crimea and in the northern Black Sea region (the process of formation of the Crimean Tatar ethnic ended in the period of the Crimean Khanate, i.e. the middle of XV - the end of the XVIII centuries).

The Bakhchisarai Khan Palace was the center of the political processes of the Crimean Tatars during the last two centuries. It was particularly there that the very first Kurultai (congress) of the Crimean Tatar people happened in 1917, and the modern delegates of Kurultay gave an oath to serve their people here as well.

Over the past 4 years since the second occupation of the Crimea by Russia the human rights defenders have consistently recorded gross violations of human rights in its territory. Even today Russia, as the legal successor to the USSR and the Russian Empire, conducts a discriminatory policy towards the Crimean Tatars, aimed at suppressing their will, the dignity of the people, forced relocation and further assimilation.

The cultural and humanitarian policy of the Russian Federation in the Crimea, which aims at destroying the historical and cultural ties of the peninsula and mainland Ukraine, the process of including the Crimea into the Russian ideological paradigm remains without the international community’s proper attention.

In this context, among the most vulnerable areas was such an important one as the protection of historical and cultural heritage and issues of guaranteeing the preservation of cultural heritage sites.

The Crimean Tatar history and culture objects that “do not fit” into Russian ideology are among the most unprotected; i.e. real, not falsified history of the Crimea and the Crimean Tatar people, the historical memory of the indigenous people of the peninsula about their statehood.
THE WORKS EXECUTED ON THE TERRITORY OF THE KHAN’S PALACE COMPLEX

The Law of Ukraine “On the Protection of Citizens’ Rights and Freedoms and the Legal Regime in the Temporarily Occupied Territory of Ukraine” (hereinafter referred to as the Law of Ukraine) [clause 7, Article 51] provides that the responsibility for the protection of cultural heritage in the temporarily occupied territory rests with the Russian Federation as the country-occupant, strictly according to the international law norms and principles.

In addition, according to the provisions of the Convention for the Protection of Cultural Property in the Event of Armed Conflict (1954) (hereinafter referred to as the “Convention”), the State which carried out the occupation is obliged to ensure the proper protection of and respect for cultural property. Article 4 thereof prohibits the use of such valuables, facilities for their protection and directly adjacent areas for purposes which can lead to these values destruction or damage, and provided for a provision to prevent any acts of vandalism against cultural property.

Despite the abovementioned norms of Ukrainian legislation and international law, the Russian Federation continues to pursue a purposeful policy of destroying the cultural heritage of the Crimean Tatar people being the indigenous people of Ukraine.

In October 2017 the restorers from the town of Bakhchisarai expressed concern about the works that are being carried out in the Great Khan Mosque, one of the Khan’s Palace complex facilities. The works carried out by the Russian Federation on the cultural heritage sites of the Autonomous Republic of Crimea were not coordinated with the Ukrainian side, there were no permits issued for their execution.

An analysis of Crimean open digital sources and photographic documentation of specialists showed that the general contractor and the author of the project is ATTA Group (http://atta-group.ru/), which never was engaged before in restoration. LLC "Kiramet" acts in this case as a subcontractor.
The commissioner of the works is the so-called Committee for the Protection of the Republic of Crimea Cultural Heritage (headed by Efimov Sergiy Oleksiyович who was engaged in cartography until 2014, and Didenko Oleksandr Yevgenovich as the first deputy, an athlete, who was never engaged in restoration before).

During the study of open sources, a number of serious violations of the cultural heritage sites preservation principles were revealed.

The careful concealment by the Russian occupation authorities of all the circumstances connected with the work on the territory of the Khan Palace makes just stronger the suspicions of the experts that a real threat of destruction is hanging over the unique historical and architectural monument of the Crimean Tatar people.

The main violation is the neglect of the basic principles of the restoration works' scientific nature, which require the maximum preservation of the monument's authenticity, the restoration of any lost elements on the basis of scientific justifications; preservation in the maximum possible inviolability and justification of any restoration intervention, keeping scientific approach.

The monument “Great Khan Mosque” was not thoroughly and comprehensively researched. Neither were held:
- Full-scale research: the possible ways of eliminating damages, the specific features of building materials and solutions their production technologies were not studied, the elements and details relating to the original appearance of the building, the existing later layers of additions and alterations, their historical and artistic value were not studied. The technological features of the monument’s construction were not studied as well. The available materials do not confirm the fulfillment of the full architectural and archaeological measurement and photographic fixation of the monument.
- Historical and archival, as well as bibliographic studies of indirect and written sources, photographs, drawings, paintings, other images of the monument, etc.
The conducted research is poor, and the engineering decisions confirm lack of professional background and approach in the field of restoration works. Disregard of the scientific nature principle, the lack of methodology in the restoration work led to the application of the common building standards to the object of historical and cultural significance.
According to the conclusion of the UkrNIIproektrestavratsiya Institute (Restoration Design Institute) (completed before 2014),
- it was planned to replace 3 beams and to restore 1 beam from 22 overlapping beams $L = 9.5\text{ m}$, as well as additional reinforcement of top of 4 beams with the metal corner on top replacement of 1 transverse beam $L = 9.5\text{ m}$ above the Maafil arch (Chorus).
- it was planned to replace 3 and restore 4 beams from 82 overlapping beams $L = 6.5\text{ m}$, as well as to reinforce 6 beams with the corner.

The results of the above conclusion were confirmed when investigating the state of overlap in 2015, and at installation of a temporary support structure above the entrance to the mosque from the side of the Çürük Suv River. However, the general contractor, subcontractor and customer of the work decided to completely replace the ceiling beams.

In addition, dismantling was carried out using heavy construction equipment with bumpers, which led to vibrations and losses of parts of the walls' decoration.

The disassembly of the original parts of the monument is, as a rule, excluded when carrying out restoration work. However, there was a complete dismantling of the authentic beam girder system, ceilings and hipped roof in the case of the Khan mosque.

The authentic materials are replaced with modern ones in full (both the beam roofing system and the roof), the modern construction technologies are used.
All authentic oak overlapping beams are replaced with composite beams using OSB technology.

FULL DISMANTLING OF THE ROOF

CONCRETE

INSTALLATION OF REBARS
All the authentic crossbeams under the Maafil arch (or chorus) are replaced with concrete ones using reinforcement.

According to the so-called project the old stretcher tile ("Tatarka") of handicraft production (an element of cultural heritage) is replaced with Monk and Nun Spanish tiles, stylized as antique. At the same time, the ancient technology of laying tiles on clay (which is also a cultural heritage) will be completely destroyed and replaced with modern fasteners, with the arrangement of a hydro-barrier, a vapor barrier and a soft insulation.

Moreover, according to the conclusion of the UkrNIIProektrestavratsiya Institute (Restoration Design Institute), a significant part of the authentic tiles is collected and is stored in a satisfactory condition.
During the restoration such stored tiles should be used, in addition, the missing quantity which is recognized by the experts as such not to be reused, is handcrafted according to an ancient technique.

Instead of quarry stone, dumped from the walls and destroyed, the gas-concrete blocks, a modern material is used in inter-beam inserts.

Provided for the UkrNIIproektrestavratsiya Institute (Restoration Design Institute) design (before 2014), the oak anti-seismic belt was subject to prosthetics and partial replacement using oak beams as similar material. However, instead of this, a reinforced concrete anti-seismic belt is poured around the perimeter of the walls of the mosque.
All the works done in the aggregate will undoubtedly weight the construction, besides, concrete will intensify the erosion of the quarry (limestone) masonry of the walls.
No one calculated the consequences of these works, scientific expert control and supervision over the work progress is not being done.

The state of the ceiling hem and the elements of the wooden decor is unknown up to date: we assume they will also be replaced.

Staircase passages of the minaret of the mosque are used to move workers and cargo inside the mosque, because there are no lifts and temporary staircases.

A system that does not meet even the elementary requirements is the facility's protection system during the works: a temporary wooden shelter which is covered by polyethylene coating is not only insufficient rain protection, but also can create a "greenhouse effect" under certain weather conditions, is mounted over the building.

As a result of the wind effect the holes were formed on the polyethylene coating, through which the precipitation enters the building. After it rained in early November 2017 the precipitation hit the building, moisture penetrated the floors and the prayer hall's floor. The balconies were soaked through; it is obvious that if they remain in the open air in the winter, the constant wetting and humidity will completely destroy them.
DAMPNESS OF THE WALLS OF THE MOSQUE

VISIBLE DAMPNESS OF THE WALLS DUE TO PRECIPITATION THROUGH HOLES

POLYETHYLENE COATING ALL IN HOLES
Both individual elements of cultural heritage inside the mosque, and those located in close proximity to the sites were not protected from mechanical impact as a result of construction works.

Thus, Mihrab remains so far open and unprotected from the effects of precipitation and mechanical damage.

The paintings on both the south and west facades of the building, made by Omer Master (XVIII century), remain open until now. The balconies in the Khan’s bed are also not protected from rain and damage.
Limestone steps of minarets are not protected from physical impact and are partially destroyed. Doors and windows are also not protected with special materials.

PAINTINGS ARE NOT PROTECTED

The tombstones of the Khan cemetery, directly adjacent to the Khan mosque, were covered with polyethylene film, which does not protect against mechanical impact. As a result, cracks appeared on the side plate of the Ferah-Sultanhanum (Giray dynasty princess) tomb found by the experts. The sketch shows the detected crack. It is fresh, triangular in shape, ribs running down all along the height. The photo of the crack could not be made due to the administration’s prohibition on photographing. The photo made by a tourist at the experts’ request shows us the damage to the “fez” crowning the grave.
And this is just what we can see!

The dismantled elements of cultural heritage have not been properly registered. Wooden roof structures, such as joists, cross beams, as a material, are a part of cultural heritage. But they were saw-cut, some of them were written-off as having no value. It is enigma what is the state of the ceiling décor elements now.
The timing of such works is also doubtful: late fall, winter, whereas, according to the rules of carrying out restoration work this period is usually used for materials to be collected, while the restoration work itself is carried out in the spring-summer period only.
CONCLUSIONS

Restoration in architecture, strengthening and restoration of destroyed, damaged or distorted history and culture monuments (architectural buildings) are carried out in order to preserve their historical and artistic significance (as a special case, in order to return their original form).

Unfortunately, the works carried out by the Russian Federation in the Great Khan Mosque has become another "Potemkin" repair, and as a result has no restorative nature and has led to distortion, as well as to irreparable losses of ancient architecture’s authentic elements, as part of the unique complex "Khan’s Palace", included in the Tentative List of UNESCO World Heritage Sites.

We believe that the works in the Bakhchisarai Khan Palace, an architectural monument, is illegal, contradict the norms of Ukrainian legislation and international law.

At the same time, taking into account the Russian officials’ statements on the further restoration of the Khan’s palace and the steel canopy installation over the Khan’s Palace main building, we consider it necessary to take all possible measures as soon as possible to immediately stop such works and prevent any activity that could lead to damage and further destruction of the "Khan Palace" complex as an object of cultural heritage of Ukraine.

Education Statistics from Ministry of Education of Ukraine (2018)

This document has been translated from its original language into English, an official language of the Court, pursuant to Rules of the Court, Article 51.

Pursuant to Rules of the Court Article 51(3), Ukraine has translated only an extract of the original document constituting this Annex. In further compliance with this Rule, Ukraine has provided two certified copies of the full original-language document with its submission. The translated passages are highlighted in the original-language document. Ukraine has omitted from translation those portions of the document that are not materially relied upon in its Memorial, but stands ready to provide additional translations should the Court so require.
Addendum to the Ministry of Education and Science letter

Sixth Committee

Summary record of the 33rd meeting
Held at Headquarters, New York, on Monday, 15 November 1999, at 3 p.m.

Chairman: Mr. Mochochoko .............................................. (Lesotho)

Contents

Agenda item 160: Measures to eliminate international terrorism (continued)
Agenda item 154: United Nations Decade of International Law (continued)
(a) United Nations Decade of International Law (continued)
(b) Outcome of the action dedicated to the 1999 centennial of the first International Peace Conference (continued)
The meeting was called to order at 3.20 p.m.

Agenda item 160: Measures to eliminate international terrorism (continued) (A/54/37, A/54/301 and Add.1; A/C.6/54/2; A/C.6/54/L.1 and L.2)

1. Mr. Al-Saidi (Kuwait) said that terrorism, which had widened in incidence and scope during recent years, was the product of an extremism which was unconnected to any specific geographical region, culture or religion. With its dangers sweeping the entire globe, terrorism constituted a major concern of the international community.

2. In that context Kuwait had adopted various legal and practical measures, particularly in regard to aviation safety, with a view to cooperating in the efforts to combat terrorism. It had also acceded to most of the international conventions on terrorism and had signed the Arab Convention on the Suppression of Terrorism. It shared the view that the capacity of the International Crime Prevention Centre of the United Nations Secretariat must be increased with a view to strengthening international cooperation in that area. It also supported the convening of a high-level conference in 2000 under the auspices of the United Nations to formulate a joint organized response of the international community to terrorism in all its forms and manifestations.

3. Efforts aimed at combatting terrorism, including the elaboration of a comprehensive legal framework of conventions and the prosecution and trial of those who perpetrated acts of terrorism, should also continue unabated, although it was important to maintain a distinction between terrorism and the struggle of peoples for self-determination. It was equally important that all countries should cooperate to provide the resources needed to combat terrorism, in which connection his delegation supported Security Council resolution 1269 (1999). With a view to eliminating terrorism, States should be encouraged to accede to the relevant international and regional conventions and other conventions should be elaborated to cover any existing gaps. It was also vital that the members of the international community should arrive at a definition of terrorism and ensure non-interference in the internal affairs of States, as well as refrain from any form of activity relating to or in furtherance of terrorism.

4. His delegation condemned all forms of terrorism, the most serious being State terrorism, which Kuwait had experienced during the Iraqi invasion. The Iraqi Government was continuing to hold in its prisons hundreds of Kuwaiti and other nationals whom it had captured during its occupation of Kuwait and remained under obligation to resume cooperation with the committees formed to determine the whereabouts of such prisoners.

5. Mr. Al-Kadhe (Iraq), speaking on a point of order, stated that the Kuwaiti representative should refrain from commenting on matters which were the concern of the Security Council and thus irrelevant to the item under discussion.

6. Mr. Gao Feng (China) said that the international community had long waged war against international terrorism, but the phenomenon was yet to be eradicated. It might be that international measures did not address the root causes of terrorism. Effective cooperation in good faith on the part of the entire international community and integrated and multidimensional action were required. If no action was taken but instead its root causes were deliberately created and protected, it would not be possible to suppress international terrorism.

7. His Government, which was committed to establishing a just and rational new international order, had acceded to most of the anti-terrorist conventions, fulfilled its convention obligations, engaged in bilateral agreements and adopted a series of domestic measures. Its approach was positive and sincere.

8. His delegation congratulated the Ad Hoc Committee established by General Assembly resolution 51/210 on formulating, within a few short years, the International Convention for the Suppression of Terrorist Bombings and the draft international convention for the suppression of the financing of terrorism (A/C.6/54/L.16) — a development of great significance and a major effort that his Government would actively support — in addition to concluding preliminary deliberations on the draft convention on the suppression of acts of nuclear terrorism. The manifestations of international terrorism were, however, increasingly complex and multifarious. Consideration should therefore be given to the early formulation of a comprehensive international convention. It would be difficult, but so long as action was taken in a cooperative spirit an appropriate solution could be found. Meanwhile, the measures contained in the existing conventions should be further strengthened.

9. Ms. Randrianarivony (Madagascar) said that international terrorism aimed to destabilize international peace and security and was a major obstacle to countries' economic and social development. Constant vigilance and stronger international cooperation were required to combat the phenomenon.

11. Within her country, measures had been taken to reassure the foreign community and investors by mounting a permanent anti-terrorist operation round diplomatic missions. At the regional level, her delegation welcomed the adoption of the Organization of African Unity Convention on the Prevention and Combating of Terrorism in July 1999. Her country had also taken an active part in the regional meeting for Africa held in Kampala in December 1998 to prepare for the Tenth United Nations session. Concerted efforts were the best way of combating terrorism. Her Government also aligned itself with the position taken at the Twelfth Conference of Heads of State or Government of the Movement of Non-Aligned Countries in 1998. It supported unreservedly the work on the two draft conventions by the Ad Hoc Committee and hoped that the draft international convention for the suppression of the Financing of Terrorism would be adopted at the current session. Concerted efforts were the best way of combating terrorism; measures taken by countries on their own would not suffice.

12. Mr. Chimimba (Malawi) said that his Government had always advocated the total elimination of nuclear weapons and other weapons of mass destruction and therefore had no difficulty in supporting the initiative by the Russian Federation for a convention on the suppression of acts of nuclear terrorism. The danger of nuclear weapons, material or know-how falling into the wrong hands was as real as the consequences were potentially devastating. Recognizing that the issues at stake were critical and based on principled positions, his delegation was ready to help overcome differences that had impeded earlier adoption of the draft convention.

13. He welcomed the completion of the draft international convention for the suppression of the financing of terrorism. Although his delegation had had difficulties with some of the approaches taken to define the scope of the draft convention, it was ready to join in its adoption, which closed a loophole in terrorist activities.

14. The achievements of the international community, especially the United Nations, over the past three years in finding practical ways of combating international terrorism had been remarkable. He also commended the adoption of the Organization of African Unity Convention on the Prevention and Combating of Terrorism in 1999. Tragic events in the recent past were a clear reminder that the international community must remain vigilant and respond quickly and resolutely to threats that arose. The Ad Hoc Committee had a modest but crucial function in that regard: it must complete its mandate and elaborate a comprehensive legal regime to deal with international terrorism.

15. His Government was party to 5, and signatory to 1, of the global instruments listed in the Secretary-General’s report (A/54/301). The Hijacking Act, which prescribed penalties commensurate with the seriousness of the crimes it proscribed, gave domestic effect to three of those instruments. The Government was studying the remaining instruments with a view to ratifying or acceding to them at the earliest opportunity. It had also entered into numerous bilateral air services agreements which had robust aviation security provisions.

16. Mr. Hetesy (Hungary) said that his delegation endorsed the statement by Finland on behalf of the European Union at the 31st meeting of the Sixth Committee. His Government had consistently supported the establishment of a global system based on a unified international approach and effective cooperation. Tangible results had already been achieved. The draft international convention for the suppression of the financing of terrorism, elaborated after wide-ranging, heated but always professional deliberations, had a far broader scope than previous related conventions and would raise international cooperation to a new level. Adoption however, would be only the first step. Success would be measured by the level of international acceptance and implementation. The progressive nature of the draft convention would make its incorporation into national legal systems more difficult than had been the case with earlier conventions. For
example, it called for prosecution or extradition for acts that were not yet criminalized in all States. His Government, as a party to all the major terrorism-related conventions, except the International Convention for the Suppression of Terrorist Bombings, which it planned to sign before the end of the year, would do its best to become party to the draft convention and would use the established frameworks for cooperation with the European Union to solve all outstanding issues.

17. His delegation was concerned at the protracted negotiations on the draft convention on the suppression of acts of nuclear terrorism, which was ripe for adoption. Although its scope had remained a major stumbling block, that could be clarified while preserving the status quo in other fields, such as disarmament, without blocking the possibility of future legal and practical developments in those areas. The Working Group of the Sixth Committee had put forward some balanced and encouraging proposals. The speedy adoption of the draft conventions would provide a further basis for deterrence and facilitate the start of discussions on the draft convention proposed by the representative of India and the convening of a conference on further international cooperation against terrorism.

18. Mr. Perera (Sri Lanka) said that his country was all too familiar with the devastating impact of terrorism on the lives of innocent people and on the process of seeking political solutions to national issues. The task before the international community was therefore to send out a strong message that terrorism against unarmed civilians was morally repugnant and legally unacceptable. His Government was party to six of the international conventions adopted over the years by the United Nations, including the most recent, the International Convention for the Suppression of Terrorist Bombings, which had been given effect at the national level through the enactment of the Suppression of Terrorist Bombings Act No. 11 of 1999. Measures were also under way to enable the Government to accede to most of the remaining conventions. That testified to the priority that the Government attached to United Nations initiatives to eliminate international terrorism.

19. His delegation was firmly committed to the adoption of the draft international convention for the suppression of the financing of terrorism. Funds collected by terrorist groups in foreign countries, often through front organizations with ostensibly charitable, social or cultural goals, were a major source of sustenance for their activities and the need to deprive terrorists of such financing was increasingly recognized. He associated his delegation with the words of caution by the Chairman of the Ad Hoc Committee against reopening the text, which had been carefully negotiated in both the Ad Hoc Committee and the Working Group. In addition to the well-tried “extradite or prosecute” regime, the draft Convention contained several new elements, taking into account the complexities of international fund-raising activities for terrorism. Its effective implementation would require the adoption of domestic measures by States to enable their financial institutions to prevent and counteract the international movement of funds for terrorism. Such measures would be crucial in countering the fund-raising networks of terrorist groups.

20. Unlike existing anti-terrorist conventions, which addressed manifestations of terrorism already experienced, the draft international convention for the suppression of acts of nuclear terrorism addressed the increasing possibility of nuclear material falling into unlawful hands. His delegation hoped that a compromise solution could be found to the one outstanding issue on the scope of application of the convention.

21. Some emerging trends in terrorist operations could assume critical proportions if not countered through enhanced international cooperation. Terrorist groups were resorting to electronic communications for international fund raising, often through front organizations ostensibly for humanitarian purposes. Another problem was the abuse of refugee status by supporters and sympathizers of terrorist groups abroad, particularly to raise financing. Organized trafficking of persons into foreign countries also provided terrorists with a source of income through extortion. His delegation was pleased that the declaration adopted in 1996 as an annex to General Assembly resolution 52/210 made it clear that the Convention relating to the Status of Refugees should not provide a basis for the protection of perpetrators of terrorist acts.

22. Convinced that concerted international action was necessary to eliminate international terrorism, his delegation welcomed the proposal by India to elaborate a comprehensive convention on international terrorism and the proposal by the Non-Aligned Movement to convene a high-level conference in 2000 under the auspices of the United Nations to further strengthen international cooperation against terrorism.

23. Mr. Yusoff (Malaysia) said that it was incumbent on the international community to define the term “terrorism” to avoid misinterpretation. None of the anti-terrorist conventions so far elaborated had defined it, and only one even mentioned the word “terrorist” in the title. His delegation understood the ordinary meaning of the term.
“terrorist” to be a person who used violence to threaten or harm the public for the purpose of imposing demands on Governments, organizations or groups. The costs involved in combating terrorism diverted scarce resources that could otherwise be used for development. Malaysia reiterated its strong condemnation of all acts of terrorism as criminal and unjustifiable, regardless of motivation, wherever and by whomsoever committed.

24. His delegation viewed with alarm the enormous devastation which could be unleashed through acts of nuclear terrorism and believed that one of the most effective means of suppressing nuclear terrorism was nuclear disarmament, leading to the ultimate elimination of nuclear weapons. States had an obligation not only to pursue disarmament negotiations in good faith but also to bring them to an early conclusion. The creation of further nuclear-weapons-free zones, like those already established in South-East Asia, Africa, the South Pacific and Latin America and the Caribbean, would be a major step in promoting nuclear non-proliferation and hence in reducing the threat of nuclear terrorism.

25. Malaysia fully concurred with the views expressed in the Committee the year before by Zimbabwe on behalf of the Non-Aligned Movement with regard to the draft international convention for the suppression of acts of nuclear terrorism. The issues of concern included but were not limited to the provisions of the preamble, article 1 and article 4 of the draft.

26. The draft international convention for the suppression of the financing of terrorism being elaborated on the initiative of the French delegation would fill a gap left by previous anti-terrorist conventions. However, since a number of its provisions had far-reaching implications, his delegation needed more time to study it.

27. It was encouraging to note in the report of the Secretary-General (A/54/301 and Add. 1) that many States had entered into agreements at the regional and international levels for the prevention and suppression of international terrorism. Malaysia was party to several of the international legal instruments related to terrorism and was considering ratifying the rest. In negotiating such instruments, it was important to take into account the views of all Member States and to strive for consensus on contentious issues, so that the conventions would truly reflect the collective will of the international community. His delegation supported the collective position stated at the Twelfth Conference of Heads of State or Government of Non-Aligned Countries held at Durban, South Africa, on the need for a comprehensive international convention on terrorism.

28. His Government had found the training programmes and seminars and workshops on aviation security organized by the International Civil Aviation Organization very useful in developing its own national aviation security training programme on combating and preventing incidents of unlawful interference with civil aviation.

29. Mr. Diab (Lebanon) said that his country was endeavouring to strengthen its laws to punish acts of terrorism, to which end it had acceded to several of the international conventions on terrorism and remained committed to effective international cooperation for the development of international law to combat the danger of terrorism. In that connection, it was essential to understand the roots of terrorism and the problems which it created, rather than simply to address its violent aspects and seek stability from a narrow political perspective. In elaborating conventions on terrorism, it was important to maintain a clear distinction between terrorism and the struggle of peoples to resist occupation and realize their right of self-determination, particularly since the realization of that right eliminated a major cause in the spread of violence and unrest. The resistance of the Lebanese people, for example, against the highly repugnant form of terrorism constituted by the Israeli occupation of their territory was but a form of struggle for freedom and of legitimate self-defence. State terrorism was more serious than terrorism by individuals, as illustrated by the arbitrary practices which Israeli forces carried out against the inhabitants of the occupied Arab territories. Referring to the many Lebanese detainees held in Israeli prisons in breach of international conventions, he said he regretted the silence of the international community in the face of such terrorist crimes, which proved the existence of double standards.

30. He emphasized that the legal framework to combat terrorism should observe the fundamental principles enshrined in the Charter of the United Nations in connection with the right to resist occupation and achieve self-determination. He therefore welcomed the reference to the Declaration on the Occasion of the Fiftieth Anniversary of the United Nations contained in the preambles of the draft international convention for the suppression of the financing of terrorism and the draft international convention for the suppression of acts of nuclear terrorism. However, in the absence of any specific definition of terrorism, both would continue to suffer substantial gaps, as in the case of the other conventions on the subject. Of these, the International Convention for the Suppression of Terrorist Bombings contained the most
explicit definition, but it did not yet have enough signatures to enter into effect. Similarly, the scope of the draft international convention for the suppression of acts of nuclear terrorism was still a matter of great controversy, particularly in connection with State terrorism. Echoing the view of the Movement of Non-Aligned Countries, he cautioned against using the same language used in the International Convention for the Suppression of Terrorist Bombings and also stressed that the draft convention should cover the subject of the illicit collection of radioactive waste, which should be regarded as a form of nuclear terrorism.

31. He hoped that those issues would not be considered from a purely political viewpoint, which would undermine international cooperation to combat terrorism and pose real difficulties in connection with interpreting the duties and commitments of States towards such conventions. It was essential to strive anew to redress such flaws with a view to achieving a more successful convention that responded to the needs of different legal systems. Moreover, solving these difficulties at the present stage would facilitate future work on the draft comprehensive convention on international terrorism. In conclusion, he said that he looked forward to the convening of a high-level conference under the auspices of the United Nations to formulate a joint organized response to terrorism in all its forms and manifestations and to genuine constructive cooperation with Committee members in the task of elaborating conventions which responded to all hopes.

32. Mr. Hoffman (South Africa) said that in its deliberations on the draft conventions before it, the Committee should bear in mind that its success or failure would affect the lives of the people of the world. Terrorism by its nature undermined the standards of life and the human rights that the Charter of the United Nations called upon Member States to promote and protect. As the world grew smaller through globalization, no State, and hence no individual, was immune from the effects of terrorism.

33. South Africa therefore reiterated its unequivocal condemnation of terrorism in all its forms and its support for the efforts of the international community to eliminate terrorism. The Government was continuing the process of reviewing national legislation to enable the country to ratify the existing international conventions on terrorism and encouraged other States to do the same. Only concerted international cooperation could ensure that terrorists found no safe haven in any corner of the world. Significant regional initiatives had also been taken. During the past year, for example, the Organization of African Unity had adopted a convention on preventing and combating terrorism.

34. Although the draft international convention on the suppression of the financing of terrorism was not the perfect legal instrument, his delegation was convinced that it was the best that could be obtained in the circumstances and would make a valuable contribution. One of the most effective means of combating criminal activity was to cut off sources of financing. The principle underlying the convention, that all forms of support to terrorists must be eradicated, was one of the basic tenets of international cooperation against terrorism.

35. It was worth considering, however, whether the continuous elaboration of limited ad hoc conventions on terrorism was an effective use of resources. The framework of international conventions on measures to eliminate terrorism so far constructed was impressive, but in elaborating each new instrument it became increasingly difficult to avoid redundancies and contradictions with existing conventions and other international law initiatives. The consequent resort to sophisticated legal mechanisms to circumvent those difficulties obscured the intent of the text and left too much to the discretion and interpretation of the States parties. A series of specific terrorist acts had been identified without ever defining the term “terrorism”.

36. Moreover, the adoption of a long series of conventions resulted in a costly and time-consuming process of review and amendment of domestic law in each case prior to ratification. Those resources might better be spent in implementing the spirit of the conventions.

37. Although many outstanding issues on the substance of terrorism remained, they could no longer be sidestepped. It was time to heed the call made at the Twelfth Conference of Heads of State or Government of Non-Aligned Countries in 1998 for an international summit conference under the auspices of the United Nations on international terrorism, a call reiterated by the Heads of State and Government of the Organization of African Unity in July 1999. The General Assembly in resolution 53/108 had decided that the question of convening a high-level conference should be addressed during the present session of the General Assembly. His delegation believed that the time was ripe for a frank and forward-looking debate on proactive approaches by the international community to terrorism in all its forms.

38. The Committee, too, was at a crossroads. It should take up the challenge of elaborating a comprehensive convention on terrorism, consolidating previous gains but
addressing the issue of terrorism squarely, and it must be prepared to devote sufficient time to that complex but imperative task.

39. Mr. Obeid (Syrian Arab Republic) said that his country had always condemned all forms of terrorism, whether perpetrated by individuals, groups or States acting alone or in concert with others. Terrorism was unacceptable in times of peace or war. It was, however, important to differentiate between pure terrorism and legitimate national struggle against foreign occupation. It was therefore important that an international conference should be held in order to agree on a definition of terrorism and distinguish it from national liberation. He recalled General Assembly resolution 53/108 which had noted that the Twelfth Conference of Heads of State or Government of Non-Aligned Countries had called for an international summit conference under the auspices of the United Nations to formulate a joint organized response of the international community to terrorism in all its forms and manifestations.

40. With regard to the draft international convention for the suppression of the financing of terrorism, his delegation had noted that the amendments it had proposed, which represented the concerns of a number of States, had not been made in the draft, and that the draft remained vague. The terms “financing” and “international terrorism” had not been defined. The draft convention dealt with persons who provided or collected funds for the purposes of terrorism, and made no mention of States, while State terrorism was a much more serious problem, as had been emphasized in Security Council resolution 1269 (1999). Instead of providing a definition of “financing”, the draft completely ignored the term. While the terms “acts of terrorism” and “terrorism” appeared in the preamble to the draft convention, they were not defined in the body of the text. In the absence of any definitions, he believed that the convention in its current form would lead to disputes between States. Despite the fact that his delegation had made repeated requests for discussion of its proposed definition of terrorism whose funding would constitute a criminal act, its proposals had been ignored. It was disturbing to realize that the definition of terrorism had been left for those in power to decide, rather than those who applied the law. He firmly believed that there was no justification for the abuse of power.

41. He wished to point out yet again that the proposal submitted by his country, contained in document A/C.6/54/WG.1/CRP.24, while correctly rendered in English, was incomplete and distorted in the Arabic version, despite having been correctly submitted on three separate occasions. He regretted that the proposals put forward in that document had not been included for discussion by the Working Group and had merely been referred to in paragraph 99 of document A/C.6/54/L.2 under “further proposals for article 2”. Other oral and written proposals submitted by his country alone or in concert with other countries had been similarly ignored. His delegation therefore could not agree that intent should constitute an offence if none of the acts specified in article 2 of the draft convention had been committed.

42. Any draft that had not been properly discussed, but was presented with the ultimatum “take it or leave it” could not meet the specifications for international codification, but must be considered as a political declaration. His delegation had made that point on many previous occasions and wished to reiterate it yet again, for the record. Although other delegations had expressed support for his country’s position, pressure was being brought to bear in order to ensure acceptance of the whole package. The issue must be fully and properly discussed and consensus reached. The conditions necessary for consensus did not exist. His delegation therefore deeply regretted its inability to support a draft convention in which it had not been properly discussed to be adopted unanimously. As it was, the draft represented an attempt to impose the convention as a fait accompli. The Working Group had not stated that it had reached consensus on the articles of the draft convention. His delegation had therefore been very surprised by the statement made to the Sixth Committee by the Chairman of the Working Group to the effect that while not all delegations had been satisfied by the draft and some had expressed their reservations with regard to certain formulations, he cautioned against reopening the instrument for discussion and recommended that the Committee should adopt the draft convention. With all due respect to the Chairman of the Working Group, his delegation believed that the oral report he had made represented only his personal views. He therefore believed that the Working Group must be given the opportunity to consider the proposals made with regard to the draft convention and that due respect should be given to the concerns of his own and many other delegations. The formulation of articles 1 and 2 needed a great deal of improvement. The draft should be referred to the Ad Hoc Committee for proper consideration in order to permit a consensus to be reached.

43. With regard to the draft international convention for the suppression of acts of nuclear terrorism, his delegation reiterated its support for the position adopted by the
Movement of Non-Aligned Countries. The excellent work done by the Ad Hoc Committee and the Working Group represented a step in the right direction. It was, however, restricted by the fact that it had only dealt with acts of nuclear terrorism committed by individuals, and had failed to include nuclear terrorism committed by States. It was difficult to imagine that ordinary individuals could commit acts of nuclear terrorism without the support of States. While the work that had already been done was greatly appreciated, the Movement of Non-Aligned Countries, which represented 113 States, together with numerous other States from different groupings, had expressed concern and reservations with regard to the formulation of the articles of the draft convention. It was vital that such an important international convention should not draw the cloak of legitimacy over State terrorism, which was infinitely more dangerous than any act committed by an individual. Security Council resolution 1269 (1999) had noted the significance of acts of international terrorism in which States were involved. It was surprising that the international community should criminalize acts of nuclear terrorism while failing to do the same for the use or threat of use of nuclear weapons, which were the most dangerous of all weapons of mass destruction. The problem of terrorism was compounded by a reluctance to call things by their proper names and by a deliberate vagueness that allowed hostile accusations to be levelled against certain peoples, despite the absence of any supporting evidence.

44. A new form of terrorism, namely, intellectual terrorism, was continually bringing pressure to bear on peoples and individuals alike with a view to persuading victims that they should accept attacks on their freedom and rights without putting up any resistance. Legitimate resistance such as that of the people of south Lebanon, whose territory had been occupied since the Israeli invasion of 1978, was designated as terrorism. Since 1967, the Syrian Arab Golan had been occupied by Israel, its people expelled from their homes and their lands expropriated; those who had stayed were subject to all manner of oppression and Israeli settlements had been established and remained there, in the face of the relevant Security Council resolutions. That could only be described as terrorism and an ongoing criminal act. The Syrian Arab Republic condemned all forms of terrorism, whether committed by an individual or by a State. Its behaviour in the Arab lands that it occupied made Israel a foremost perpetrator of State terrorism. There was no policy for dealing with State terrorism. Nevertheless, the Syrian Arab Republic was a party to a number of international and regional conventions concerning terrorism and looked forward to the beginning of serious work on the formulation of a comprehensive convention for the suppression of terrorism.

45. Mr. Lavalle Valdés (Guatemala) said that his delegation supported the statement that would be made by the delegation of Costa Rica on behalf of the Group of Central American States.

46. When the first international treaty against terrorism had been signed in 1963, a strong, although minimal, legal basis for combating terrorism had already existed for some time. Terrorist attacks, regardless of the circumstances, were very serious crimes which had always been punished by national penal codes. Such crimes included assassination, murder and physical injury, as well as criminal damage and other crimes against property. All such shameful acts were violations of natural law, known as mala in se as opposed to mala prohibita. Thus, States did not normally have to create new categories of offences in order to penalize the acts of terrorism characterized in the relevant international conventions. For over a hundred years there had been a series of treaties on extradition and judicial assistance that aimed to establish cooperation among States to fight international crime. Even before 1963, there had been some “international superstructure” to deal with terrorist attacks that went beyond a purely national context. The series of international treaties to which he had just referred was an essential complement to that structure, along with the declarations on terrorism adopted by the General Assembly by consensus in 1994 and 1996.

47. The risks associated with terrorist action were increasing, with the use of explosives that had horrendous effects. There was also concern that terrorist groups could make use of nuclear, chemical or biological weapons as well as the most recent developments in technology. Moreover, the growing internationalization of terrorism was keeping the world in a constant state of tension. The background to terrorist movements was international conflict, and terrorists aimed to achieve as much publicity as possible by means of attacks with an international dimension. The shadowy figures of what might be called the “rearguard of terrorism” could be acting from any country, and the sources of financing were equally international. People could become the victims of terrorist crimes in any part of the world. The international nature of terrorism was also reflected in the activities or circumstances of its victims. They were often performing international public duties, or were abroad on business or as tourists. Furthermore, the amount of death and destruction that could be caused by terrorist attacks also contributed to the international nature of the phenomenon:
the greater the force of an explosion in a crowded area, the greater probability of there being foreigners among the victims. Terrorism also had links with drug trafficking and arms smuggling, activities which did not stop at national borders.

48. It was inconceivable that the General Assembly should urge States to ensure that their territories were not used as a terrorist base against other States if there was no danger of that actually happening. Another danger was the possibility that the right of asylum and corresponding institutions could be abused in support of terrorism. Most of the causes promoted by terrorist organizations already caused hostility between nations, and terrorism could clearly seriously jeopardize international peace and security.

49. Even greater efforts should therefore be made at all levels and in all areas to eliminate terrorism. It was a matter of great concern to his delegation that a number of difficulties seemed to be impeding the adoption of the draft convention for the suppression of acts of nuclear terrorism. With respect to the adoption of the draft international convention for the suppression of the financing of terrorism, his delegation firmly supported draft resolution A/C.6/54/L.16. Guatemala therefore hoped that despite the comments of the previous speaker the Committee would be able to adopt the draft by consensus at the current session.

50. Mr. Keinan (Israel) said that the recent explosion of three pipe bombs in the coastal town of Netanya, Israel, had wounded at least 14 passers-by. The bombing had taken place one day before the renewal of permanent status negotiations between Israel and the Palestinians, talks that were to lay the groundwork for a final peace settlement. That brutal attack was a reminder that terrorism was not a theoretical issue, but a real and continuous hazard.

51. It had recently become evident that terrorism was not confined to certain countries or peoples, but had become an international menace to all. Extremist groups of different political and ideological streams had joined hands in an unholy alliance, which could leave no one indifferent or neutral. Indeed, neutrality on terrorism was no longer an option for any State, as the onlookers and bystanders of today were the victims of tomorrow. International terrorism knew no limits or boundaries. It had become a web of those who planned, supported, financed and gave refuge to terrorists, as well as States that sponsored and supported them. It not only affected those who were subject to its direct indiscriminate attacks, but it posed a real threat to international peace and security, and endangered the political process in the international arena, including the peace process in the Middle East.

52. The ongoing struggle against terrorism had to cover all fronts. First of all, States should take all the necessary measures within the framework of their domestic legislation and law enforcement policies. No less important, international cooperation in that struggle, on both the regional and international levels, was essential; that was a fact which had already been accepted and recognized in different international forums and recently by the United Nations Security Council. Less than one month previously, the framework for the joint international effort had been outlined in Security Council resolution 1269 (1999). In the concentrated global effort to combat international terrorism, the Sixth Committee was to promote international legal instruments, which would help the international community in its struggle to preserve peace and security.

53. Israel was party to most of the existing conventions and, as to the remainder, was either reviewing the possibility of accession or was already in the process of ratification. His delegation fully supported the resolution concerning the international convention for the suppression of the financing of terrorism. He also urged members of the Committee to participate in the speedy finalizing of the draft international convention for the suppression of acts of nuclear terrorism. Those two legal instruments, which expressed the clear determination of the international community, would be another milestone in the ongoing international effort to suppress terrorism.

54. Mr. Al-Baharna (Bahrain) said he welcomed the Secretary-General’s report (A/54/301 and Add.1), which was the follow-up to the 1994 Declaration and General Assembly resolution 50/53. Although the Secretary-General had invited all States to subscribe to the Declaration, and provide all the necessary information, only a small number of States had responded. Bahrain therefore urged all States that had not yet done so to provide the Secretary-General with the information needed to implement the Declaration.

55. In his country, no specific anti-terrorist law existed, although the Penal Code contained penalties for crimes connected with terrorism. Over the past few years, Bahrain had adopted a series of security measures to protect the population against international terrorism. It had also acceded to many of the international conventions listed in the Secretary-General’s report, including the Tokyo Convention on Offences and Certain Other Acts Committed on Board Aircraft, the Convention for the
Suppression of Unlawful Seizure of Aircraft, the Montreal Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation and its Protocol, and the Montreal Convention on the Marking of Plastic Explosives for the Purpose of Detection. As to regional cooperation, his country was a party to the Arab Convention on the Suppression of Terrorism. It was also studying the other conventions relating to terrorism and hoped to accede to them in the shortest possible time.

56. The Sixth Committee had made enormous progress in the past few years, and had adopted all the necessary legal instruments to enhance cooperation between States. He hoped the Committee would continue to play that role. The threat of international terrorism jeopardized international peace and security, which was vital for implementing programmes for developing countries. The international community had thus been compelled to make efforts to combat it, which had led to the adoption of General Assembly resolution 49/60 in 1994, supplemented by the 1996 Declaration. The Ad Hoc Committee had been given the task of developing a comprehensive legal framework of conventions dealing with international terrorism. The Sixth Committee should be in a position to adopt the draft convention for the suppression of acts of nuclear terrorism at the current session. His delegation would continue to participate in the necessary negotiations and consultations.

57. Bahrain supported draft resolution (A/C.6/54/L.16) on the international convention for the suppression of the financing of terrorism. However, the Arabic text should be brought into line with the English version. The adoption of measures for the suppression of terrorism and the prosecution of terrorists would enable States parties to the convention to put an end to international terrorism.

58. Negotiations should be held on the preparation of a comprehensive convention on terrorism in all its forms, including an unambiguous legal definition of international terrorism. It was important to distinguish terrorism from the legitimate struggle of peoples for self-determination. Moreover, although measures had to be taken against States that were guilty of terrorist acts, it was unfortunately not always possible to distinguish such acts from legitimate acts of self-defence. It was also important to distinguish between State terrorism and terrorism on the part of individuals or groups of individuals who acted without the encouragement of States. The draft conventions before the Committee all dealt with particular aspects of international terrorism, but the international community required a comprehensive international convention that would cover all the elements to which he had just referred. The draft submitted by India at the fifty-third session of the General Assembly could serve as a basis for a working paper on such a convention.

Agenda item 154: United Nations Decade of International Law (continued)

(a) United Nations Decade of International Law (continued)

(b) Outcome of the action dedicated to the 1999 centennial of the first International Peace Conference (continued) (A/C.6/54/L.9*, L.10 and L.18)

59. Ms. Flores Liera (Mexico), speaking as Chairperson of the Working Group on the United Nations Decade of International Law, introduced draft resolution A/C.6/54/L.9*. She drew attention to the second and fifth preambular paragraphs and to operative paragraphs 1 and 6. In the seventh preambular paragraph, the word “interpretation” should be changed to “implementation” to reflect the agreement reached during informal consultations. She hoped that the draft resolution would be adopted without a vote.

60. Draft resolution A/C.6/54/L.9*, as orally revised, was adopted.

61. Ms. Flores Liera (Mexico), speaking as Chairperson of the Working Group on the United Nations Decade of International Law, introduced draft resolution A/C.6/54/L.10. After drawing attention to the third, fifth and seventh preambular paragraphs and to operative paragraphs 13 and 20, she said that some issues remained outstanding. She drew attention to a conference room paper containing several revisions that was before the members of the Committee.

62. First, the sixth preambular paragraph should be redrafted thus:

“Recognizing that, inter alia, the establishment of the International Tribunal for the Former Yugoslavia in 1993, the International Tribunal for Rwanda in 1994, the International Tribunal for the Law of the Sea in 1996 and the adoption of the Rome Statute of the International Criminal Court in 1998 constitute significant events within the Decade.”

63. Second, in the fourteenth preambular paragraph, the words “plenary meeting of the” and “held” should be deleted.

64. Third, a new paragraph 15 (b) should be added, reading:
“Recalls that States have the obligation to solve their disputes by peaceful means, including resort to the International Court of Justice, and that one of the main purposes of the Decade is to promote full respect for the Court, in accordance with the relevant provisions of the Charter.”

She hoped that, in the light of those revisions, the draft resolution would be adopted without a vote.

65. The Chairman drew attention to document A/C.6/54/L.18 containing a proposed amendment by Cameroon to draft resolution A/C.6/54/L.10.

66. Mr. Tchatchouwo (Cameroon), introducing document A/C.6/54/L.18, said that the proposed amendment reiterated Article 94, paragraph 1 of the Charter of the United Nations. For short-term reasons, some delegations found it difficult to accept the inclusion of the amendment in the draft resolution. His delegation found that surprising; at the conclusion of the Decade, it appeared essential for the international community to reaffirm the need for States to comply with the decisions of the International Court of Justice.

67. Since its inception, the United Nations had endeavoured to promote the peaceful settlement of disputes between States, including resort to the Court. It was unclear what purpose would be served by resorting to the Court if States did not undertake to comply with its decisions. His delegation, having noted the hesitations, on the part of some delegations, had decided to withdraw its amendment out of concern for the preservation and strengthening of consensus. He expressed appreciation to those delegations which had supported the Cameroonian amendment; nevertheless, as the amendment had been withdrawn, his delegation would not oppose the consensus on the draft resolution.

68. Mr. Ahipeaud (Côte d’Ivoire), explaining his delegation’s position before the adoption of the draft resolution, said that codification was not an intellectual exercise. The drafting of a norm and its application went hand in hand. Accordingly, if a State voluntarily accepted the jurisdiction of an international court and submitted disputes to it, it was logical to assume that the State was bound to accept the court’s decisions.

69. His delegation found it difficult to discuss the achievement of the Decade without mentioning the decisions and jurisprudence of the International Court of Justice, which were among the sources of international law. Except in cases where the Court was requested to give an advisory opinion, its decisions were binding on the parties to a dispute before it. It was only reasonable to mention that idea in a General Assembly resolution, especially as it was clearly provided for in the Charter of the United Nations.

70. In the past three years, there had been much discussion of “preventive diplomacy”, which was designed to prevent the outbreak of hostilities in a given conflict. As the Court was one of the principal instruments of preventive diplomacy, emphasis should be placed on the need to comply with its decisions. His delegation fully supported the Cameroonian amendment; nevertheless, as the amendment had been withdrawn, his delegation would not oppose the consensus on the draft resolution.

71. Mr. Ekedede (Nigeria) said that the Committee was a forum in which issues were discussed objectively. For that reason, his delegation had no difficulties with the text proposed by the coordinator, and viewed it as a balanced reflection of the relevant Charter provisions. As such, the text should allay the fears of some delegations as to possible non-compliance by States with the Court’s decisions.

72. Mr. Fruchtbaum (Solomon Islands) said that his delegation would not join the consensus on the draft resolution. Paragraphs 15 to 18 of the text invited States and international organizations to continue their activities on behalf of international law. Under those circumstances, the sectors of society that had been largely ignored during the Decade — children, non-university youth and adults who had never had the opportunity for higher education — would continue to be ignored. It was precisely those people who must be reached, however, if the significance of international law was ever to be universally understood.

73. While the draft resolution called for encouragement to be given to the publication of books or other materials, the wide use of electronic media, including radio, television and the Internet, was not mentioned. The draft resolution referred to international organizations, but not to national or local ones, nor did it give much attention to the potential importance of non-governmental organizations or schools in fostering the widest appreciation of international law.

74. In paragraph 20, the General Assembly decided to continue considering developments in the implementation of the purposes of the Decade in the framework of agenda item 153. His delegation had proposed amendments aimed at widening the scope of the draft resolution on that item, just as it had done for the draft resolution under consideration.

75. Draft resolution A/C.6/54/L.10, as orally revised, was adopted.
The meeting rose at 6.15 p.m.
Annex 737

COMMISSION ON HUMAN RIGHTS

SUB-COMMISSION ON PREVENTION OF DISCRIMINATION AND PROTECTION OF MINORITIES

Sixteenth Session

SUMMARY RECORD OF THE FOUR HUNDRED AND ELEVENTH MEETING

Held at Headquarters, New York,
on Thursday, 16 January 1964, at 11 a.m.

CONTENTS

PRESENT:

Chairman: Mr. SANTA CRUZ (Chile)
Rapporteur: Mr. CAPOTORTI (Italy)
Members:
  Mr. ABRAM (United States of America)
  Mr. AWAD (United Arab Republic)
  Mr. BOUQUIN (France)
  Mr. CALVOCORESSI (United Kingdom of Great Britain and Northern Ireland)
  Mr. CUEVAS CANCINO (Mexico)
  Mr. INGLES (Philippines)
  Mr. IVANOV (Union of Soviet Socialist Republics)
  Mr. KETRYNSKI (Poland)
  Mr. KRISHNASWAMI (India)
  Mr. MATSCH (Austria)
  Mr. MUDAWI (Sudan)
  Mr. SAARIO (Finland)

Also present: Mrs. Lefaucheux Commission on the Status of Women

Observers from Member States:
  Mr. ROBICHAUD Canada
  Miss KRACHT Chile
  Mr. LEMA Congo (Leopoldville)
  Mr. SAJJAD India
  Mr. SCHAAFPVELD Netherlands
  Mr. QUIAMBAO Philippines
  Mrs. NASON United States of America
  Mr. MELOVSKI Yugoslavia

Representatives of specialized agencies:
  Mr. FARKAN-FARMAIAN International Labour Organisation
  Mr. SALSAMENDI United Nations Educational, Scientific and Cultural Organization
PRESENT: (continued):

Representative of a non-governmental organization:

**Category A:**
- Mr. BARTON
  - International Confederation of Free Trade Unions

**Secretariat:**
- Mr. HUMPHREY
  - Director, Division of Human Rights
- Mr. LAWSON
  - Secretary of the Sub-Commission

Mr. KRISHNASWAMI drew attention to his amendment (E/CN.4/Sub.2/L.310, para. 4) to the definition stated in article I of Mr. Abram's text (E/CN.4/Sub.2/L.306). He would introduce the word "nationality" in quotation marks and explain its meaning for the purposes of the convention in a footnote reading as follows:

"'Nationality', as the term is used in this convention, is different from the meaning of the term in public international law where it indicates a recognized link between an individual and a State to which he owes allegiance and which has an international responsibility for him. It is for that reason that this term is within quotation marks. Its meaning in the present context is that which it has in the case of States composed of groups of different origin."

With that explanatory footnote, the article could not be interpreted as denying to a State its right to make special provisions regarding aliens within its territory.

Mr. MUDAWI, commenting on the definition of racial discrimination given in the three texts before the Sub-Commission, emphasized that it should be as broad and explicit as possible. Mr. Abram's text had the great merit of clarity, while Mr. Calvocoretti's (E/CN.4/Sub.2/L.309) would gain by including in the term "person", not only groups of persons, but corporate bodies or juridical persons.

Mr. CALVOCORETTI said he was prepared to accept Mr. Mudawi's suggestion. His definition was brief for emphasis, and it reproduced the wording adopted in the UNESCO and ILO Conventions (E/CN.4/Sub.2/234).

Mr. MATSCH felt that the definition in question was too brief; it would be better to err on the side of wordiness rather than brevity.
Mr. ABRAM, noting that his definition, like the Declaration adopted by the General Assembly, specified ethnic origin as one of the grounds for discrimination, stressed the importance, in drafting the convention, of assessing the nature and scope of ethnic discrimination in the contemporary world. Ethnic discrimination might well be directed towards obliterating the social and cultural differences which defined and gave life and significance to a particular ethnic group. That would also be true of a nationality group in a multi-national State. Recent events had once again reminded the world that there were two distinct groups in Cyprus, for example. Countries with multi-racial populations, such as the United States and the USSR, had very complex ethnic groups. The Nazis had used a system of grading ethnic groups as a basis for their genocide campaign. Since the defeat of Nazi Germany, while no State had pursued a policy of genocide, some States in which discrimination was prohibited by law were carrying out policies which might have the effect of obliterating an ethnic group.

Ethnic differences were absolutely dependent for survival on language, schools, publications and other cultural institutions often regarded as characteristic of a nationality. However well-treated in other respects a member of an ethnic group might be, if he were cut off from his tradition and culture, he would be the victim of discrimination and the right of his group to survive would be jeopardized. Consequently, all forms of discrimination which deprived an ethnic group of the means of continuing its culture and maintaining its traditions was a violation of the principle stated in the Declaration on the Elimination of All Forms of Racial Discrimination and should be made an offense under the Convention. He was not certain of the precise language that should be used but there was need to be specific with regard to nationality groups and national traditions.

Mr. CAFCIORTI, after making a comparative analysis of the three drafts under discussion, said that the text of the Convention should so far as possible convey the spirit of the Declaration adopted by the Assembly. Thus, it was proper for the definition of discrimination to include discrimination on ethnic grounds. However, the problem of ethnic discrimination should not be developed beyond the framework of the Declaration and should not be equated with discrimination on grounds of national origin or nationality. The problems of national origin and nationality were manifold, but they were outside the scope of
a convention designed to protect the rights of the individual, which was the purpose of all United Nations conventions in the field of human rights. Indeed, it might even be helpful to make that purpose explicit. The definition of "person" contained in Mr. Calvocoressi's article I, as amended by Mr. Mudawi, was also a useful one, and should be retained. Finally, paragraph 2 of that article had considerable merit in that it recalled the definition of discrimination contained in the Declaration of Human Rights and in the draft Covenants.

Mr. MUDAWI observed that in some African countries small backward groups were given preferential treatment by legislation. He suggested, accordingly, that the article in which racial discrimination was defined should also include a statement to the effect that preferences designed to assist backward groups within a country did not constitute racial discrimination.

Mr. SAARIO pointed out that the problem was covered by article II, paragraph 3, of Mr. Abram's text (E/CN.4/Sub.2/L.308); however, he saw no objection to the addition suggested by Mr. Mudawi.

He always preferred brevity in definitions, particularly when they would have to be translated into many languages. He thought the word "distinction" preferable to the word "differentiation", which had too fine a shade of meaning. The words "distinction, exclusion, preference and limitation" would cover all the aspects of discrimination which should be taken into account.

While, as UNESCO had shown, there was no such thing as race, the term "race" would have to be used in the draft convention. The words "race", "colour" and "ethnic origin" all meant much the same thing, but "nationality" was a different matter. The General Assembly had used the expression "national origin" in the preamble of the Declaration on the Elimination of All Forms of Racial Discrimination and the expression "ethnic origin" in the body of the Declaration; he wondered why it had changed from the one expression to the other. In any event, everyone understood what was meant by the term "national origin", and he would not object to its use in the definition.
Mr. KRISHNASWAMI recalled that Mr. Abram had accepted his proposal replacing the word "may" by the word "shall" in article II, paragraph 3 of his text (E/CN.4/Sub.2/L.308). That paragraph as amended, in directing States to take special measures to protect backward groups, went much further than the statement suggested by Mr. Mudawi. There would be no harm, however, in adding such a statement to the article defining racial discrimination.

There was some value in using the term "nationality" in quotation marks in the definition because in South Africa, for example, there was a problem of racial discrimination against persons of Indian national origin. "National origin" and "ethnic origin" were not synonymous.

Mr. AWAD was grateful to Mr. Mudawi for raising the problem of groups which the State had to favour in order to ensure their integration into the life of the country. The Sub-Commission must be very careful, however, to phrase any provision on that point in such a way as to leave no opportunity for abuse.

Mr. ABRAM said he preferred Mr. Krishnaswami's position on the question of nationality to Mr. Capotorti's.

Mr. BOUQUIN remarked that the three definitions before the Sub-Commission were not very different. Article 1, paragraph 1, of the text submitted by Mr. Ivanov and Mr. Ketrzynski (E/CN.4/Sub.2/L.314) contained some excellent ideas. He too preferred the word "distinction" to the word "differentiation", however, and he thought that, as the expressions "ban on access" and "exclusion" were synonymous, one of them should be omitted. The definition of the word "person" proposed in Mr. Calvocoresi's text (E/CN.4/Sub.2/L.309) should be retained. A reference to discrimination based on nationality or national origin in multi-national States might be helpful, but he wondered whether there would be any point in referring to such discrimination in States that were not multi-national. In all countries a distinction was made between nationals and aliens. The problem was a difficult one and should be carefully considered.

On the question of special protective measures raised by Mr. Mudawi, he recalled
that the Sub-Commission, in drafting paragraph 11 of the Declaration on the Elimination of All Forms of Racial Discrimination, had inserted a proviso to the effect that such measures should not be maintained after the achievement of their objective. The Sub-Commission should continue to treat such special measures as exceptional and provisional.

Mr. MATSCH felt that the terms "ban on access" and "exclusion" were synonymous, as were the terms "distinction" and "differentiation". If, therefore, Mr. Abram would agree to add the word "limitation" to his definition (E/CN.4/Sub.2/L.308), the list of terms equated with discrimination would be identical in the three definitions before the Sub-Commission. On the question of national origin, he preferred the full explanatory text suggested by Mr. Abram in article I of his text (E/CN.4/Sub.2/L.308).

Mr. IVANOV pointed out that the text which he and Mr. Ketrzynski had suggested (E/CN.4/Sub.2/L.314) contained at the end of article I, paragraph 1, an essential element in the definition of discrimination, namely, a description of the purpose or effect of discrimination as "nullifying or impairing equality in granting or practising human rights and freedoms". That part of the definition not only complemented the first part, but might, he felt, dispel the concern of previous speakers with regard to the inclusion in the convention of a reference to special measures for the protection of certain groups. As such measures were usually designed to place such groups on an equal footing with other sectors of the population which might be more advanced from educational or other points of view, the formula he had quoted should have the effect of ensuring that any such measures could not but be in accordance with the convention.

Mr. ABRAM accepted Mr. Matsch's suggestion regarding the inclusion of the word "limitation" in article I of his own text.

Mr. CUEVAS CANCINO found the definitions of discrimination contained in the three texts before the Sub-Commission on the whole very similar.
He did not agree that the definition contained in article I of the text suggested by Mr. Ivanov and Mr. Ketrzynski (E/CN.4/Sub.2/L.314) was repetitious. For instance, the meaning of "ban on access" was not identical with that of "exclusion", as one meant that certain persons might be prohibited access to certain places, whereas the other would imply that certain people might be excluded from certain institutions and activities from which they were not in fact officially banned. The word "preference" acquired quite a definite meaning if it was considered in the context of the way in which whites were treated in the Republic of South Africa. Similarly, "limitation" had a perfectly definite meaning in the sense that it could refer to the prejudice to an individual's career caused by discrimination. A list of the various forms of discrimination in the article which defined the term was not only useful - it was absolutely necessary, because it would constitute the backbone of the convention, and he did not consider any of the terms used in the text suggested by Mr. Ivanov and Mr. Ketrzynski to be redundant.

With regard to the special measures which might be necessary for the protection of certain groups of the population, he still thought that the formula proposed by five Latin American countries in the Third Committee for article 2, paragraph 3 of the Declaration (A/5603, para. 66) was the most satisfactory. It was important to bear in mind that protection of certain groups did not constitute discrimination. Nor should such measures be abruptly discontinued. In some cases, they became part of national institutions, and a permanent means of securing rights which were in the interests of the country as a whole. As an example, he cited the case of Mexico, where the ownership of the land by the Indians had been originally recognized by the Spanish Crown, and subsequently, withdrawn on legal grounds, after the revolution of 1870, so that the Indian villages had been left entirely without land. It had required the revolution of 1910, with its ensuing land reform, to restore the original more equitable situation.

He was opposed to Mr. Krishnaswami's proposal to put the word "nationality" between quotation marks, and also against the insertion of a foot-note on the subject in the draft convention. Such an apparently special interpretation of
of the word might prove misleading, and could cause problems. The term "nationality" as used in Mr. Abram's text (E/CN.4/Sub.2/L.308) might be taken to mean persons who had not been integrated into the national life of the State because they had originally come from other countries, and the existence of such groups raised problems of jurisdiction in any case. The term "national origin", used in document E/CN.4/Sub.2/L.314, seemed to him more satisfactory.

Mr. CALVOCORESSI said that he would withdraw paragraph 1(b) of article I of his text (E/CN.4/Sub.2/L.309) if the Sub-Commission agreed to retain parts of the other two clauses. He had some doubts about the use of the term "national origin" and preferred the term "nationality". He would like to see the last part of article I, paragraph 1 as suggested by Mr. Ivanov and Mr. Ketrzynski with its reference to discrimination with the purpose or effect of nullifying or impairing equality in the granting or practising of human rights, retained in the draft convention.

He also hoped that the Sub-Commission would retain his own version of article I, paragraph 2. With regard to article I, paragraph 2 of Mr. Ivanov and Mr. Ketrzynski's text, he had no objection to its inclusion in the convention, but did not think that the article defining discrimination was the right place for it.

The CHAIRMAN, speaking in his personal capacity, remarked that he found the text suggested by Mr. Ivanov and Mr. Ketrzynski satisfactory, particularly since Mr. Cuevas Cancino's arguments had convinced him of the need to include a diversity of terms in the definition. He also thought that a reference to the purposes of discrimination was valuable, and that the second part of article I, paragraph 1 in that text should therefore be retained, but he suggested the addition, at the end of the sub-paragraph, of a phrase along the following lines: "as well as equality of treatment or opportunity in respect of such rights".

He agreed with Mr. Cuevas Cancino that the term "national origin" was preferable to "nationality", and he would certainly not be in favour of putting that word in quotation marks or using a foot-note. Such a procedure would not make for clarity, a primary requirement in the convention.
It was sometimes necessary for Governments to take special measures to protect certain sections of the population, and in that connexion he too still felt a preference for the formula proposed in the Third Committee by five Latin American countries (A/5603, para. 66).

Mr. BARTON (International Confederation of Free Trade Unions) thought that the basic definition of discrimination should include some indication that the differences of race, colour, etc., might be either real or presumed. There were many cases where the difference between groups of a population, which were being used as a pretext for discrimination, were in fact non-existent, or at least debatable. Ceylon was one case in point, and another was South Africa, where the population was arbitrarily divided into the categories of white, black and coloured, and where persons and families were often changed from one category to another merely by decision of the authorities.

While Mr. Krishnaswami's suggestions concerning the treatment of the word "nationality" were unconventional, they probably represented the only way of solving the complex problem involved. Like the word "race", the word "nationality" represented different concepts, some ethnic, some political, in different countries.

Where special protection of certain groups was concerned, he felt some misgivings about the wisdom of including in the convention a reference to individuals belonging to certain racial groups, as had been done in article II of Mr. Abram's text (E/CN.4/Sub.2/L.308). While presumably the reference did not imply special protection to every single member of a group, it made the provision less clear.

Mr. INGLES thought that the Sub-Commission had already expressed a consensus of opinion regarding the contents of article I of the draft convention. In the interests of precision and to take care of the point raised by the Chairman, he suggested that the phrase "of opportunity or treatment in the enjoyment of human rights and fundamental freedoms proclaimed in the Universal Declaration of Human Rights" should be inserted in article I, paragraph 1, after the word "equality", to replace the words "in granting or practising human rights and freedoms" in the text suggested by Mr. Ivanov and Mr. Ketrzynski (E/CN.4/Sub.2/L.314).
The CHAIRMAN, speaking in his personal capacity, said that he found Mr. Ingles's amendment more satisfactory than his own, which he would accordingly withdraw.

Mr. SAARIO remarked that the difference between the terms "nationality" and "national origin" was clear. In international law, the term "nationality" was frequently used to mean "citizenship". He accordingly felt that the use of the term "national origin" would avoid ambiguity.

Mr. AWAD, observing that it was difficult to draft a document on the basis of three separate texts, suggested that the Sub-Commission might work more effectively if it selected one of the proposed texts as the basis of its work. The other proposals could then be submitted in the form of amendments to the working text.

The CHAIRMAN favoured the suggestion. The Sub-Commission was proceeding very slowly by its present method of work.

Mr. IVANOV felt that such a procedure would give an unjustifiable preference to one text over the others. In the past the Sub-Commission had been successful in working with a number of texts, either in plenary or through a working group. While the Sub-Commission should try to accelerate its work, it must avoid undue haste.

The meeting rose at 1.5 p.m.
